

UiPath Automation Cloud™

Today's most comprehensive business automation platform, ready when you are

Put your plans for enterprise automation on the fast track with UiPath Automation Cloud. Everything you need for a complete automation solution is available instantly. You can start quicker, see value sooner, and lower your ongoing total cost of ownership. And when your automation needs to expand, you can scale up to support new workloads and use cases—all in a secure, cloud-based environment.

Benefits

Start instantly and stay flexible with no infrastructure to design, deploy, and manage.

Get access to the latest UiPath products and enhancements as soon as they become available and that's always up-to-date.

Focus on solving your automation challenges and leave the maintenance to UiPath experts.

Create and deploy automations with the peace of mind that comes with enterprise-grade security.

- Orchestrator
- Studio
- Actions
- Automation Hub

- Processes
- Insights
- Test Manager
- Integration Service
- Data Service
- Task Mining
- Process Mining
- AI Center
- Document Understanding
- Automation Ops
- Admin
- Automation Store

“The fact that this is a SaaS solution means that **we can innovate much faster** when it comes to automation...”

Senior Analyst
Energy company

Put the UiPath Platform to work—all of it, everywhere, anytime

Access the complete UiPath Platform—including SaaS robots, self-hosted robots, server products, and cloud-specific capabilities—in minutes. Run automations from anywhere in the world, with no infrastructure overhead. Manage the entire automation lifecycle in a convenient, cloud-based environment.

Deploy flexible enterprise-ready capabilities

Capitalize on tenant-based management for all services with hosting in Australia, Canada, Europe, Japan, Singapore, and the United States. Integrate seamlessly with technologies such as Azure AD and third party credential stores. Maintain secure client app access with OAuth 2.0 support. Manage and support robots across cloud deployments.

Trust and security at the core

Keep every service in-scope for regular audit and verification through SOC 2®, ISO 9001, ISO/IEC 27001, HIPAA, and Veracode Verified™ compliance. Innovate with confidence based on 99.9% guaranteed uptime, disaster recovery services, and 24/7 UiPath support. Identify potential threats quickly and with minimal disruption through integration with CrowdStrike Falcon® EDR/RPA.

Jump on the fastest path to automation value, now and in the future

Accelerate your automation plans without major IT investments, and reassign IT resources to other needs. Focus on innovation instead of installation, hardware and virtual machine (VM) maintenance, and ongoing system upgrades. Lower your total cost of ownership with no local server or public cloud infrastructure requirements.

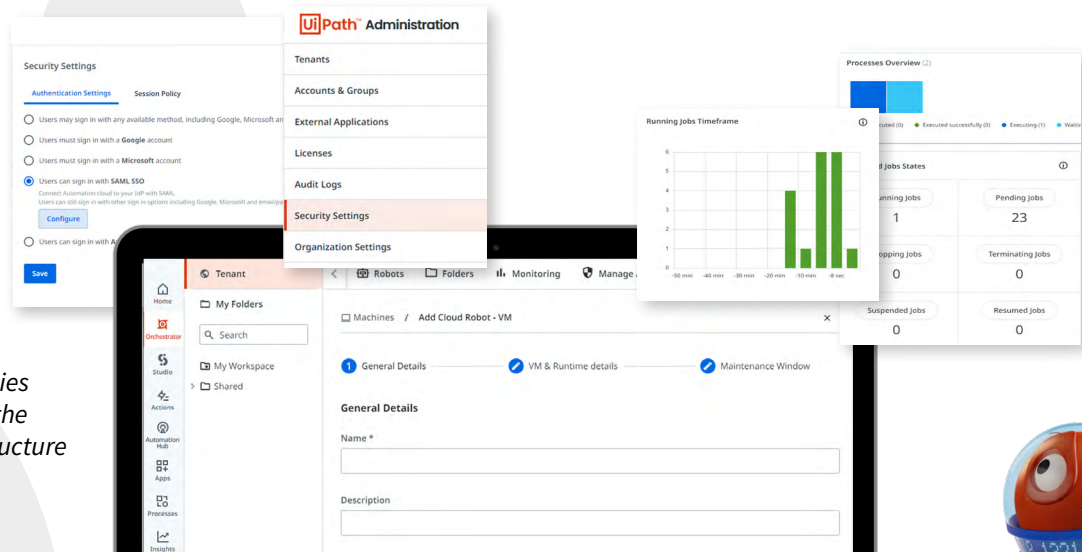

Get infinite robot capacity—with zero robot infrastructure

Tap into limitless unattended automation capacity instantly—when needed, as needed—with VM Automation Cloud robots. Run cross-platform automations with no provisioning or configuration through a pool of Serverless Cloud Robots.

Scale automation delivery on demand

Expand automation scope from a single user or robot to thousands at any time. Manage all robots from the cloud, whether self-hosted, public cloud, SaaS, or on-premises. Migrate existing UiPath Orchestrator functions to the cloud. Keep costs and complexity in check with a standards-based architecture and API-based service management and integration options.

Deploy fast and flexible enterprise-ready capabilities with trust and security at the core and zero robot infrastructure

Ready to take automation to new heights with cloud?

Find out what 55% of all new UiPath customers already know. UiPath Automation Cloud is the fastest route to automation innovation.
