

Special Issue on Planning, Controlling, and Project

Management

Call for Papers

Project management is to plan, organize, command, coordinate, control and evaluate the whole process from the beginning of investment decision to the end of the project, so as to achieve the objectives of the project. Project management techniques include critical path method (CPM), plan review technique (PERT) and Gantt chart. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **Planning, Controlling, and Project Management**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Planning, Controlling, and Project Management**. Potential topics include, but are not limited to:

- Benefits realization management
- Investment project management
- Information project management
- Engineering project management
- Project risk management
- Methods in project controlling
- Monitoring and controlling
- Project evaluation and standard
- Project management software and system
- Project portfolio management
- Project management techniques

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Planning, Controlling, and Project Management**” should be selected during your submission.
