

Special Issue on Production Planning and Control

Call for Papers

Production planning is to define what is to be done and how, which includes scheduling, dispatch, inspection, quality management, inventory management, supply management and equipment management. Production control ensures it can achieve required production target, optimum utilization of resources, quality management and cost savings. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Production Planning and Control.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Production Planning and Control**. Potential topics include, but are not limited to:

- Allocation of resources
- Industrial and production engineering
- Materials and resource planning
- Operations planning
- Product and process
- Production and operations management
- Production equipment scheduling
- Supply chain management

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Production Planning and Control**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	November 28th, 2022
Publication Date	January 2023

Guest Editor:

Scientific Research
Open Access

**American Journal of Industrial and
Business Management**

ISSN Online: 2164-5175
