

Special Issue on Behavioral Economics

Call for Papers

Behavioral economics studies the effects of psychological, social, cognitive, and emotional factors on the economic decisions of individuals and institutions and the consequences for market prices, returns, and resource allocation. The study includes how market decisions are made and the mechanisms that drive public choice, which increases the explanatory power of economics by providing it with more realistic psychological foundations.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Behavioral Economics**. Potential topics include, but are not limited to:

- Competitive cheap talk
- Heuristics, framing and market inefficiencies
- Behavioral finance
- Financial models
- Behavioral game theory
- Evolutionary psychology
- Neuroeconomics

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Industrial Economics and Sustainable Development**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 18th, 2024
Publication Date	June 2024
