Table of Contents

Volume 4 Number 2

May 2014

Comparative Study of Hydrogen Electrooxidation on Gold and Platinum in Solutions Containing Perchlorate Ion

A. E. Von Mengershausen, N. V. Almeida, M. N. Barzola, J. O. Zerbino, S. M. Esquenoni, M. G. Sustersic.....55

Coupling of Wind Energy and Biogas with a High Temperature Steam Electrolyser for Hydrogen and Methane Production

N. Monnerie, M. Roeb, A. Houaijia, C. Sattler.....60

New One-Pot Methods for Preparation of Cyclohexanecarbonitrile—Green Chemistry Metrics Evaluation for One-Pot and Similar Multi-Step Syntheses

J. Simbera, R. Sevcik, P. Pazdera.....70

Enhancement of Photocatalytic Water Splitting Rate via Rayleigh Convection

S. Deguchi, B. Kariya, N. Isu, S. Shimasaki, H. Banno, S. Miwa, K. Sawada, J. Tsuge, S. Imaizumi, H. Kato, K. Tokutake.....80

Effect of TiO₂ Crystallite Diameter on Photocatalytic Water Splitting Rate

H. Banno, B. Kariya, N. Isu, M. Ogawa, S. Miwa, K. Sawada, J. Tsuge, S. Imaizumi, H. Kato, K. Tokutake, S. Deguchi.....87

Nano- γ -Fe₂O₃: Efficient, Reusable and Green Catalyst for *N*-*tert*-Butoxycarbonylation of Amines in Water

V. Medisetti, U. Parimi, R. B. Anagani, K. V. V. V. Satyanarayana.....95

Call for Papers

Green and Sustainable Chemistry (GSC)

ISSN Print: 2160-6951 ISSN Online: 2160-696X

<http://www.scirp.org/journal/gsc>

Green and Sustainable Chemistry (GSC) covers subjects relating to reducing the environmental impact of chemicals and fuels by developing alternative and sustainable technologies that are non-toxic to living things and the environment. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of Green and Sustainable Chemistry.

Subject Coverage

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

- Biotechnology Alternatives
- Chemical Aspects of Renewable Energy
- Design of New, Greener and Safer Chemicals and Materials
- Environmentally Improved Routes and Methods
- Flow Chemistry and Continuous Processing
- Improved Process Engineering
- Improved Production Methods, Formulation and Delivery Systems
- Methodologies and Tools for Measuring Environmental Impact
- Sustainable Resources
- The Use of Biotechnology Alternatives to Chemistry-Based Solutions

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the GSC.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
