

Special Issue on Clinical Trials

Call for Papers

Clinical Trials are prospective biomedical or behavioral research studies on human subjects that are designed to answer specific questions about biomedical or behavioral interventions, generating safety and efficacy data. They are conducted only after satisfactory information has been gathered. Our aim is to have the knowledge about the design, conduct, analysis, history, ethics, regulation and policy impact of all types of **clinical trials** and related medical research methodologies.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **clinical trials**. Potential topics include, but are not limited to:

- Clinical trials history
- Clinical trials Types
- Clinical study design
- Clinical trials Phases
- Clinical trials technology
- Clinical trials Safety
- Clinical research ethics

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Clinical Trials**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 27th, 2014
Publication Date	January 2015
