

Special Issue on Burns and Scalds

Call for Papers

Burns and scalds are among the most common causes of serious injury among children. A burn is a type of injury to skin or flesh caused by heat, electricity, chemicals, friction, or radiation while a scald is caused by something wet, such as hot water or steam. As one of the most important research fields of health and disease, **burns and scalds** are of great attractions to researchers.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **burns and scalds**. Potential topics include, but are not limited to:

- Cause of burns and scalds
- Diagnosis of burns and scalds
- Signs and symptoms
- Pathophysiology of burns and scalds
- Prevention of burns and scalds
- Management of burns and scalds

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Burns and Scalds**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 18th, 2015
Publication Date	May 2015
