

Special Issue on Biopsy

Call for Papers

A biopsy is the removal of a piece of tissue or a sample of cells from the body for laboratory examination. The tissue is generally examined under a microscope and can also be chemically analyzed. Biopsies can help identify many medical conditions, and are most often done to look for cancers.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Biopsy**. Potential topics include, but are not limited to:

- Needle biopsy
- Liver biopsy
- Skin biopsy
- Prostate biopsy
- Renal biopsy
- Muscle biopsy
- Cancer liquid biopsy
- Biopsied material

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Biopsy**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 10th, 2016
Publication Date	October 2016
