Special Issue on Medical Prognosis

Call for Papers

Prognosis is a medical term for predicting the likely outcome of one's chance of survival. It refers to the prediction of the possible course and outcome of the disease. Prognosis involves judging the specific consequences of the disease (such as rehabilitation, symptoms, signs, complications, and other abnormalities that appear or disappear). As well as providing time clues, predicting the possibility of a certain outcome over a period of time.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **Medical Prognosis.** Potential topics include, but are not limited to:

- Disease and prognostic indicators
- Prognostic methodology
- Prognostic information
- Factors that influence prognosis
- Blood fatty acids
- Cure rate and case fatality rate

Authors should read over the journal's For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's Paper Submission System.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue – *Medical Prognosis***" should be chosen during your submission.

According to the following timetable:

Submission Deadline	September 26th, 2017
Publication Date	November 2017
