

Special Issue on Biomedical Waste

Call for Papers

Biomedical Waste is generated from biological and medical sources and activities, such as the diagnosis, prevention, or treatment of diseases, is any kind of waste containing infectious materials. It may also include waste associated with the generation of biomedical waste that visually appears to be of medical or laboratory origin, such as packaging, unused bandages, infusion bags and so on.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **Biomedical Waste**. Potential topics include, but are not limited to:

- healthcare setting
- pathological waste
- infectious waste
- Classification of biomedical waste
- Biomedical waste treatment
- Production and storage of biomedical waste
- Management of Biomedical Waste
- The harm of biomedical waste to human health

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Biomedical Waste**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 18th, 2017
Publication Date	December 2017
