

Special Issue on Organ Transplantation

Call for Papers

Organ Transplantation is a medical procedure in which an organ is removed from one body and placed in the body of a recipient, to replace a damaged or missing organ. Transplantation medicine is one of the most challenging and complex areas of modern medicine. Worldwide, the kidneys are the most commonly transplanted organs, followed by the liver and then the heart. Some of the key areas for medical management are the problems of transplant rejection.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **Organ Transplantation**. Potential topics include, but are not limited to:

- Organ transplant operation
- Transplantation medicine
- Transplant rejection
- Allograft
- Xenotransplantation
- Kidney transplantation
- Heart transplantation
- Common complications of organ transplantation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Organ Transplantation**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 26th, 2017
Publication Date	February 2018
