## Special Issue on Thrombosis Research

### Call for Papers

Thrombosis is the formation of a blood clot inside a blood vessel, obstructing the flow of blood through the circulatory system. When a blood vessel is injured, the body uses platelets and fibrin to form a blood clot to prevent blood loss. Even when a blood vessel is not injured, blood clots may form in the body under certain conditions. A clot, or a piece of the clot, that breaks free and begins to travel around the body is known as an embolus.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Thrombosis Research**. Potential topics include, but are not limited to:

- Causes and mechanism
- Treatment and prevention
- Thromboembolism and thrombophilia
- Deep vein thrombosis
- Pulmonary embolism
- Venous thrombosis
- Coronary thrombosis
- Thrombolysis
- Cancer associated thrombosis
- Antiphospholipid syndrome
- Anticoagulant therapy

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Thrombosis Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	April 21st, 2020
Publication Date	June 2020

**Scientific Research**  
*Open Access*

## **International Journal of Clinical Medicine**

**ISSN Online: 2158-2882**
