**IJCNS** is an international refereed journal dedicated to the latest advancement of communications and network technologies. The goal of this journal is to keep a record of the state-of-the-art research and promote the research work in these fast moving areas.

## Subject Coverage

This journal invites original research and review papers that address the following issues in wireless communications and networks. Topics of interest include, but are not limited to:

|  |  |
|--|--|
| Ad Hoc and Mesh Networks                         | Network Protocol, QoS and Congestion Control |
| Coding, Detection and Modulation                 | Network Survivability                        |
| Cognitive Radio                                  | Next Generation Network Architectures        |
| Communication Networks Architecture Design       | Reconfigurable Networks                      |
| Communication Reliability and Privacy            | Resource Management                          |
| Communication Security and Information Assurance | Satellite Communication                      |
| Cooperative Communications                       | Sensor Networks                              |
| Embedded Distributed Systems                     | Simulation and Optimization Tools            |
| Global Networks                                  | UWB Technologies                             |
| Heterogeneous Networking                         | Wave Propagation and Antenna Design          |
| MIMO and OFDM Technologies                       | Wireless Personal Communications             |

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the IJCNS.

## Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
