

Special Issue on Virtual Network

Call for Papers

A **Virtual Network** is a network consists of virtual network links, which does not consist of a physical connection between electronic devices. The method virtual network used to implement is network virtualization.

Two most common forms of network virtualization are protocol-based virtual networks and virtual networks that are based on virtual devices. Both of these forms can be used in practice.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **virtual network**. Potential topics include, but are not limited to:

- Network virtualization
- VLANs
- VPNs
- Network segmentation
- Protocol-based virtual networks
- Virtual networks based on virtual devices

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Virtual Network**” should be chosen during your submission.

According to the following timetable:

Manuscript Due	April 16th, 2014
Publication Date	June 2014

Scientific Research
Open Access

**Int'l J. of Communications,
Network and System Sciences**
ISSN Online: 1945-3124
