

Special Issue on Advances in Mathematical and Computational Geosciences

Call for Papers

Mathematical geosciences or Computational geosciences is the application of mathematics on the geosciences. It is a new application of computer based technology in geophysics (geology) researches. Computational Geosciences covers mathematical modeling, simulation, numerical analysis, and other computational applications on geosciences. Mathematical Geosciences covers many different topics related to the earth, oceans, and atmosphere, which all belongs to the very wide field of geophysical fluid dynamics.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Advances in Mathematical and Computational Geosciences**.

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue —Advances in Mathematical and Computational Geosciences**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	October 29th, 2013
Publication Date	December 2013

Guest Editor:

Prof. **Jacques Bourgois**

Université Pierre et Marie Curie, Paris 6, France
