

## Special Issue on Universal Gravitation Research

### Call for Papers

**Gravitation** is a natural phenomenon by which all physical bodies attract each other. It is most commonly experienced as the agent that gives weight to objects with mass and causes them to fall to the ground when dropped. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **universal gravitation research**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **universal gravitation research**. In this special issue, potential topics include, but are not limited to:

- Newton's theory of gravitation
- Gravity and quantum mechanics
- Earth's gravity
- Gravity and astronomy
- Gravitational radiation
- Speed of gravity

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Universal Gravitation Research**” should be chosen during your submission.

Also please note the following timetable:

Submission Deadline	March 26th, 2014
Publication Date	May 2014

#### Guest Editor:

Prof. **Jacques Bourgois**

University Pierre et Marie Curie, Paris 6, France
