

Special Issue on Research on Geomorphology

Call for Papers

Geomorphology is the scientific study of landforms and the processes that shape them. Geomorphologists seek to understand why landscapes look the way they do, to understand landform history and dynamics and to predict changes through a combination of field observations, physical experiments and numerical modeling. Geomorphology is practiced within physical geography, geology, geodesy, engineering geology, archaeology and geotechnical engineering. This broad base of interest contributes to many research styles and interests within the field. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **research on geomorphology**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **research on geomorphology**. Potential topics include, but are not limited to:

- Ancient geomorphology
- Early modern geomorphology
- Quantitative geomorphology
- Contemporary geomorphology
- Hillslope processes
- Overlap with other fields
- Scales in geomorphology

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Research on Geomorphology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	February 27th, 2014
Publication Date	April 2014

Scientific Research
Open Access

International Journal of
Geosciences

ISSN Online: 2156-8367

Guest Editor:

Prof. **Jacques Bourgois**

University Pierre et Marie Curie, Paris 6, France
