

## Special Issue on Gravity Research

### Call for Papers

**Gravitation** is a natural phenomenon by which all physical bodies attract each other. Gravity holds us firmly on the ground and also keeps the earth circling the sun. It draws rain from the sky and causes the tides. This mysterious gravity force continues to puzzle. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **gravity research**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **gravity research**. In this special issue, potential topics include, but are not limited to:

- Newton's theory of gravitation
- Gravity and quantum mechanics
- Earth's gravity
- Gravity and astronomy
- Gravitational radiation
- Speed of gravity
- Gravity particles
- Gravitational field

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Gravity Research**” should be chosen during your submission.

Also please note the following timetable:

Submission Deadline	December 18th, 2014
Publication Date	February 2015
