

Special Issue on Advances in Geochemistry

Call for Papers

Geochemistry focuses on study of the chemical elements in the minerals, soils, ores, rocks, water, and atmosphere and the distribution and circulation of the elements in nature as a result of their chemical and physical properties. The study also involves in the isotopes of chemical elements, especially their abundance and stability in the universe.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Geochemistry**. Potential topics include, but are not limited to:

- Agricultural geochemistry
- Biogeochemistry
- Trace metals in the ocean
- Distribution of chemical elements
- Isotope geochemistry
- Environmental geochemistry
- Medical geochemistry
- The application of geochemistry

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Advances in Geochemistry**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	January 20th, 2016
Publication Date	March 2016
