

## Special Issue on Space Physics

### Call for Papers

Space physics is the study of the natural phenomenon that occur in our solar system. Specifically, the sun, the particles and radiation it creates and how these affect the planets. This includes the solar wind and its interaction with the Earth and near-Earth space; so-called space weather. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **space physics**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **space physics**. In this special issue, potential topics include, but are not limited to:

- Upper atmospheric physics
- Ionospheric physics
- Magnetosphere physics
- Interstellar physics
- Cosmic ray physics
- Solar physics
- Space exploration

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Space Physics**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 20th, 2019
Publication Date	October 2019
