

Special Issue on Organic Synthesis

Call for Papers

Organic synthesis is a special branch of chemical synthesis and is concerned with the construction of organic compounds via organic reactions. There are several main areas of research within the general area of organic synthesis: total synthesis, semisynthesis, and methodology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Organic Synthesis**. Potential topics include, but are not limited to:

- Total synthesis
- Semisynthesis
- Synthetic methodology
- Synthesis design
- Stereoselective synthesis
- Radical synthesis
- Synthetic method and synthetic route

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Organic Synthesis**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	January 12th, 2017
Publication Date	March 2017
