

Special Issue on Polyamines

Call for Papers

Polyamines, organic compounds having two or more primary amino groups, are ubiquitous compounds thought to be synthesized by and required for all life. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in area of Polyamines.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Polyamines**. Potential topics include, but are not limited to:

- Cyclic and aromatic polyamines
- Polyamine complexes
- Chemical structure of polyamines
- Synthesis, properties and applications
- Polyamine metabolism in disease and therapies
- Regulation and role of polyamines in biology and Disease
- Metabolism and functions of polyamines
- Biochemistry and physiology of polyamines

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Polyamines**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	April 19th, 2017
Publication Date	June 2017
