## Special Issue on Heterocyclic Compounds

### Call for Papers

Heterocyclic compound (also called heterocycle) is a cyclic compound that has atoms of at least two different elements as members of its ring(s). Heterocyclic compounds constitute the largest and most varied family of organic compounds, which are pervasive in many areas of life sciences and technology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Heterocyclic Compounds**. Potential topics include, but are not limited to:

- Bipyridine
- Carbazole
- Cyclization
- Cycloaddition
- Epoxide
- Furan
- Imidazole
- Indole
- Pyrazole
- Pyridine
- Pyrrole
- Quinoline
- Thiophene
- Triazine

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Heterocyclic Compounds**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 20th, 2017
Publication Date	December 2017

**Guest Editor:**
