

## Special Issue on Therapies for Diabetes

### Call for Papers

Diabetes is a chronic disease that occurs when the blood glucose (also called blood sugar) is too high. Too much sugar in the blood can lead to serious health problems. Insulin is a hormone made by the pancreas that regulates blood sugar. Although diabetes has no cure, we can take steps to manage our diabetes and stay healthy. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of diabetes.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Therapies for Diabetes**. Potential topics include, but are not limited to:

- Diabetes medications
- Exercise and diet
- Herbal remedies
- Injectable insulin
- Insulin therapy
- Metformin
- Alternative medicine
- Artificial pancreas
- Bariatric surgery
- Complementary therapies
- Pancreatic islet transplantation
- Stem cell and gene therapies

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Therapies for Diabetes**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	June 29th, 2022
Publication Date	August 2022

**Guest Editor:**
