

Special Issue on Evolutionary Psychology Research

Call for Papers

This special issue is a forum for the analysis of evolutionary psychology foundation and development. Evolutionary psychology is an approach to studying psychology, it can be applied to any of a wide range of content areas of psychology, such as developmental psychology, social psychology, clinical psychology, perception, language, judgment and decision making, and so on. Evolutionary psychology spawned many different aspects of the research, in particular the logic of adaptationism, to derive and test hypotheses about the design and operation of the human mind. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **evolutionary psychology**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **evolutionary psychology research**. The topics to be covered by this special issue include, but are not limited to:

- Modern evolutionary
- Psychological adaptations
- Evolutionary adaptations
- Evolutionary physiology
- Adaptive mechanisms
- Human evolution
- Developmental psychology

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Evolutionary Psychology Research**” should be chosen during your submission.

According to the following timetable:

Manuscript Due	March 4th, 2014
Publication Date	May 2014
