

Special Issue on The Elderly and Aging and Psychological Research

Call for Papers

Psychologists are at the forefront of research on questions related to health and aging. Why are most older adults successful in adapting to the stressors of late life, while others become suicidal? Why do most older adults remain mentally sharp, while others have memory problems? Research on the aging brain provides clues to the risks and protective factors for mental disorders across the life span. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of the elderly aging and psychological research.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **the elderly aging and psychological research**. In this special issue, potential topics include, but are not limited to:

- The mental health of the elderly
- The old people's emotions
- The old people's intelligence
- The psychology of aging
- Dementia, depression, and anxiety
- Death psychological

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – *The Elderly Aging and Psychological Research***” should be selected during your submission.

Special Issue timetable:

Submission Deadline	March 24th, 2016
Publication Date	June 2016
