

Special Issue Cognitive Psychology

Call for Papers

Cognitive psychology focuses on the way people process information. In this lesson, you will gain an overview of the field of cognitive psychology and learn about prominent theories. Cognitive psychology is goal-oriented and problem-focused from the beginning. Imagine you are entering treatment with a cognitive psychologist. One of the first things you will be asked to do is identify your problems and formulate specific goals for yourself. Then you will be helped to organize your problems in a way that will increase the chances of meeting your goals.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **cognitive psychology**. In this special issue, potential topics include, but are not limited to:

- Mental processes
- Cognitive psychology theories
- Cognitive approach
- Language processing
- perception
- Thinking
- Neurophysiology
- Application of cognitive psychology

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Cognitive Psychology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	April 13th, 2016
Publication Date	June 2016
