

Special Issue Child Psychology Research

Call for Papers

Child psychology is one of the many branches of psychology and one of the most frequently studied specialty areas. This particular branch focuses on the mind and behavior of children from prenatal development through adolescence. Child psychology deals not only with how children grow physically, but with their mental, emotional and social development as well. Today, psychologists recognize that child psychology is unique and complex, but many differ in terms of the unique perspective they take when approaching development. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of child psychology research.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **child psychology research**. In this special issue, potential topics include, but are not limited to:

- Genetics
- Environmental influences
- Prenatal development
- Language
- Gender roles
- Cognitive development
- Sexual development
- Early child education
- Child psychopathology and prevent methods
- Child mental health

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Child Psychology Research**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	October 27th, 2016
Publication Date	December 2016
