

Special Issue Personality Psychology

Call for Papers

Personality psychology is a branch of psychology that studies personality and its variation among individuals. "Personality" is a dynamic and organized set of characteristics possessed by a person that uniquely influences their environment, cognitions, emotions, motivations, and behavioral science in various situations. The study of personality is based on the essential insight that all people are similar in some ways, yet different in others. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of personality psychology.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **personality psychology**. In this special issue, potential topics include, but are not limited to:

- Evolutionary personality psychology
- Personality assessment, measurement
- Genetics and personality
- Physiological approaches to personality
- Motives and personality
- Cognitive topics in personality
- Personality and social interaction
- Sex, gender, and personality

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue – Personality Psychology**" should be selected during your submission.

Special Issue timetable:

Submission Deadline	July 20th, 2017
Publication Date	September 2017
