

Special Issue on Mathematical Psychology

Call for Papers

Mathematical Psychology is a branch of psychology, using quantitative methods to describe the psychological phenomenon. Mathematical psychology is an approach to psychological research that is based on mathematical modeling of perceptual, cognitive and motor processes, and on the establishment of law-like rules that relate quantifiable stimulus characteristics with quantifiable behavior.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **mathematical psychology**. Potential topics include, but are not limited to:

- Measurement theory
- Psychological measurement
- Experimental psychology
- Cognitive psychology
- Mathematical modeling
- Psychological variables

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue –Mathematical psychology**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	September 28th, 2017
Publication Date	November 2017
