**Special Issue on**  
**Psychological Assessment and Psychometrics**  
**Call for Papers**

Psychological assessment defined as a way of assessing an individual's behavior, personality, cognitive abilities, and several other domains. The purpose behind many modern psychological evaluations is to try to pinpoint what is happening in someone's psychological life that may be inhibiting their ability to behave or feel in more appropriate or constructive ways; it is the mental equivalent of physical examination. Other psychological evaluations seek to better understand the individual's unique characteristics or personality to predict things like workplace performance or customer relationship management. Psychometrics is a field of study concerned with the theory and technique of psychological measurement.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on **Psychological Assessment and Psychometrics**. Potential topics include, but are not limited to:

- Measurement of skills, knowledge and abilities
- Personality test
- Instruments and procedures
- Evaluation standards
- Assessment and observation
- Clinical psychometrics
- Mental health care and assessment
- Problems, behaviors and psychological treatment
- Anxiety and depression evaluation
- Emotional evaluation and intervention
- Mental examination in medicine
