Published: 3 May 2018

The article “Saharan dust and ice nuclei over Central Europe” by Klein et al. published in *Atmos. Chem. Phys.*, 10, 10211–10221, <https://doi.org/10.5194/acp-10-10211-2010>, 2010 has been retracted. We received the following statement from the author Heinz Bingemer:

We found a mistake in the identification procedure for ice nucleating particles (INP) due to water droplets being miscounted as ice crystals. This error is described in more detail by Schrod et al. (2016). The error considerably affects the published figures, discussions and conclusions related to INP. Therefore, we request the retraction of the article.
