

SolarWinds Access Rights Manager

Manage and audit user access rights across your IT infrastructure

SolarWinds® Access Rights Manager (ARM) is designed to assist IT and security administrators in quickly and easily provisioning, de-provisioning, managing, and auditing user access rights to systems, data, and files so they can help protect their organizations from the potential risks of data loss and breaches. By analyzing user authorizations and access permissions, you visualize who has access to what and when they accessed it. Customized reports can be generated with a few clicks to help demonstrate compliance with many regulatory requirements. Provision and de-provision users via role-specific templates to help assure conformity of access privilege delegation in alignment with security policies.

ARM BENEFITS AT A GLANCE

- Easily analyze user access rights across your IT infrastructure
- Rapidly identify and reduce the risk of unauthorized system access and data breaches
- Quickly demonstrate compliance with reports created on-demand or scheduled for automated delivery
- Identify and manage risks through the detection of malicious or accidental access attempts and compromised accounts
- Easily create user accounts and review user permissions, groups, and access across all systems, data, and files
- Support timely and complete de-provisioning of user access
- Reduce IT workload and save time by delegating permission management to data owners

	ARM AUDIT EDITION	ARM FULL VERSION
User permissions analysis for Microsoft® Active Directory®, Azure® AD, file servers (Windows®, EMC, NetApp®), SharePoint®, and SharePoint Online, Exchange™, Exchange Online, Teams®, OneDrive®, SAP/R3	✓	✓
Auditing (reporting) for Active Directory, file servers (Windows, EMC, NetApp), SharePoint, SharePoint Online, Exchange, Exchange Online, Teams, OneDrive, and SAP/R3	✓	✓
Monitoring (logging) for Active Directory, Azure AD, file servers (Windows, EMC, NetApp), SharePoint Online, Exchange/Exchange Online, and OneDrive	✓	✓
Risk analysis overview	✓	✓
Risk management		✓
User provisioning for Active Directory and Azure AD		✓
Permission management for Active Directory, file servers (Windows, EMC, NetApp), SharePoint, SharePoint Online, Exchange, Exchange Online, Teams, OneDrive		✓
Data owner concept (delegation of access rights management)		✓
Self-service permissions portal		✓
Remediation of user permissions and AD group memberships		✓
Scan Windows Distributed File Systems (DFS) namespaces and their sites separately	✓	✓

ACCESS RIGHTS MANAGER – AUDIT EDITION

Analyzing, monitoring, and auditing of:

Active Directory

Enhance security by monitoring, analyzing, and auditing Active Directory and Group Policy to see what changes have been made, by whom, and when.

File Share

Monitor and audit your file servers to help prevent data leaks and unauthorized changes to sensitive files and data by visualizing permissions on file servers.

Exchange

Simplify Exchange monitoring and auditing to help prevent data breaches. Track changes to mailboxes, mailbox folders, calendars, and public folders. Help improve compliance and detect unauthorized Exchange changes.

SharePoint

Display SharePoint permissions in a tree structure and quickly see who can access a given SharePoint resource. Using the scan comparison report, you can find out who has made changes to permissions and what they were.

User Permissions Analysis

Help protect against internal security threats by analyzing user access to services and file servers, with visibility into group memberships from Active Directory and file servers.

Custom Report Generation

Create and generate management- and auditor-ready reports to help demonstrate regulatory compliance by showing user access rights in a few clicks. Log activities in Active Directory and file servers by the user.

ACCESS RIGHTS MANAGER – FULL EDITION

(All features from the audit edition, plus the following)

User Provisioning and Management for Active Directory

Set up and manage new user accounts typically in seconds with standardized role-specific templates to provide access to file servers and Exchange.

Data Owner Concept for Access Rights Delegation

Define data categories across your organization, assign its functional owners, and delegate parts of permissions management to data owners.

Self-Service Permissions Portal

Put data access rights directly in the hands of data owners instead of administrators with a web-based, self-service permissions portal.

ARM Audit Edition: User permissions analysis, monitoring, auditing, and risk analysis

ARM Full Edition: All the above, plus user management, user provisioning, self-service permissions portal, and data-owner-driven rights delegation

SYSTEM REQUIREMENTS

Main server requirements (based on usage level)

	UP TO 4,000 USERS	GREATER THAN 4,000 USERS
Hard Drive	60 GB	100 GB
Memory	16 GB	32 GB
CPU	Dual Core Processor or better	
Operating System	Windows Server 2016, 2019, & 2022	
Databases	Microsoft SQL Server 2016, 2017, 2019, 2022 (32-bit and 64-bit)	
.NET Framework	.NET 4.8 (or higher)	

Collector requirement

Hard Drive	10 GB
Memory	16 GB
CPU	Dual Core Processor or better
Operating System	Windows Server 2016, 2019, & 2022
.NET Framework	.NET 4.8 (or higher)

ABOUT SOLARWINDS

SolarWinds (NYSE:SWI) is a leading provider of simple, powerful, and secure IT management software built to enable customers to accelerate their digital transformation. Our solutions provide organizations worldwide—regardless of type, size, or complexity—with a comprehensive and unified view of today’s modern, distributed, and hybrid network environments. We continuously engage with technology professionals—IT service and operations professionals, DevOps and SecOps professionals, and database administrators (DBAs)—to understand the challenges they face in maintaining high-performing and highly available IT infrastructures, applications, and environments. The insights we gain from them, in places like our [THWACK®](#) community, allow us to address customers’ needs now, and in the future. Our focus on the user and our commitment to excellence in end-to-end hybrid IT management have established SolarWinds as a worldwide leader in solutions for observability, IT service management, application performance, and database management.
