

# Virtualization Manager

## Simplified virtualization monitoring and management

### Virtualization Summary

Virtualization Assets

VIRTUALIZATION SETTINGS EDIT HELP

-  **VMware**
  -  10.196.1.92
  -  10.196.1.93
-  **Hyper-V**
  -  HVCluster1
-  **Nutanix**
  -  LONDON-NUTX-CL01
  -  TestCluster

*Ultimate end-to-end visibility for your hybrid IT environment*

**SolarWinds Virtualization Manager (VMAN)** is designed to be an intuitive tool for virtualization monitoring, performance management, capacity planning, and optimization across VMware® vSphere, Microsoft® Hyper-V, and Nutanix® AHV environments. Virtualization Manager is affordable and easy to download, deploy, and use.

## FEATURES

### Complete visibility into your entire environment

Monitor VMware vSphere, Nutanix AHV, and Microsoft Hyper-V environments, whether on-premises or in the cloud—with a single tool. VMAN can also deliver visibility into how your virtualization environment connects to application, server, and storage infrastructure for faster troubleshooting.

### Easily access what you need to maximize performance

Get at-a-glance insight into the performance, capacity, configuration, and usage of your virtualized infrastructure, including hosts, VMs, clusters, containers, vSANs, and other data stores. VMAN is also designed to deliver predictive recommendations to address active or potential performance issues. These recommendations can be run immediately or scheduled to run later—or use batch execution for quicker problem resolution.

### Address virtualization issues efficiently

The VMAN console can execute a variety of management actions, including power on/off, suspend and reboot a VM, or take and delete snapshots. You can migrate VMs

Microsoft  
Azure

Certified

to a different host and VM disks to a different datastore or shared cluster volume. These actions can be triggered manually or through customized alerts or scripts, which can help you optimize your resources without jumping to a separate tool.

### **Reclaim resources for improved performance and cost savings**

You can reclaim virtual resources quickly with VM sprawl alerts and recommendations. VMAN can automatically find idle, stale, and zombie VMs and orphaned VMDKs to help you free up storage space and improve overall performance. VMAN can guide you in rightsizing your VMs to recapture CPU and memory resources for further savings.

### **Assign costs to specific workloads**

SolarWinds VMAN delivers easy-to-use chargeback reporting to calculate the computing costs of specific virtual workloads. With this information, you can clearly communicate virtual infrastructure cost information for more effective budgeting.

## **END-TO-END VISIBILITY**

Use Virtualization Manager to access the SolarWinds AppStack™ and PerfStack™ dashboards for end-to-end visibility into application and infrastructure performance, including your virtualization resources.

## **SYSTEMS REQUIREMENTS**

SolarWinds® Platform products can be deployed on physical or virtual servers on-premises or in the cloud. These products can also be deployed via Azure or AWS marketplaces. For detailed system requirements, visit [support.solarwinds.com](https://support.solarwinds.com).

NOTE: The minimum server requirements listed assume default configuration. Significantly increasing the poll rate or statistic collection rate could result in additional load on the server, which may require a larger CPU or additional memory.

SolarWinds modules installed on software versions 2022.x or later are implemented on the SolarWinds platform. SolarWinds software modules implemented on versions 2020.6.x and earlier were implemented on the SolarWinds Orion® Platform. For more details see the VMAN [release notes here](#).

Virtualization management is also available as part of SolarWinds full-stack Hybrid Cloud Observability (HCO) solutions. [Find out more here](#).

## **TRY BEFORE YOU BUY. DOWNLOAD A FREE TRIAL.**

Don't just take our word for it. At SolarWinds, we believe you should try our software before you buy. That's why we offer free trials delivering full product functionality. Products can be downloaded from the SolarWinds website and run on-premises in IaaS environments or deployed in Microsoft® Azure® by the [Azure Marketplace](#).

## ABOUT SOLARWINDS

SolarWinds (NYSE:SWI) is a leading provider of simple, powerful, and secure IT management software built to enable customers to accelerate their digital transformation. Our solutions provide organizations worldwide—regardless of type, size, or complexity—with a comprehensive and unified view of today’s modern, distributed, and hybrid network environments. We continuously engage with technology professionals—IT service and operations professionals, DevOps and SecOps professionals, and database administrators (DBAs)—to understand the challenges they face in maintaining high-performing and highly available IT infrastructures, applications, and environments. The insights we gain from them, in places like our THWACK® community, allow us to address customers’ needs now, and in the future. Our focus on the user and our commitment to excellence in end-to-end hybrid IT management have established SolarWinds as a worldwide leader in solutions for observability, IT service management, application performance, and database management. Learn more today at [www.solarwinds.com](http://www.solarwinds.com).
