BORDER CONTROL

Border Control is a thin, paper-backed glue board that comes in a 60- foot roll. It is easy to carry, simple to deploy, and can fence off crawling insects or mice quickly and easily. Border Control can be cut to fit almost any situation.

BORDER CONTROL ZONES

• Corral work zones. Keep small rodents or insects from crawling away and infesting other areas.

• Monitor any area and quickly see where the trouble spots are.

• Protect sensitive product. Encircle pallets or shelves, and then see what tries to enter, or exit.

• Slide Border Control under pallets, or inside the fork- slots; tape to a thin sheet of plywood or paneling.

12 in. x 60 ft. Roll   PC-BP05

RAT-OUT GEL

STOP

Deters rats, mice, rodents, gophers, raccoons, squirrels and small mammals. Repel with Garlic and White Pepper

Green Rodent Control

RAT-OUT GEL IS AN INSTANT OFF SWITCH FOR RODENT ACTIVITY (WORKS ON BUGS LIKE A WALL).
• Dual Action - Garlic Oil and White Pepper repel rodents and most wildlife invaders
• Not harmful, doesn't burn • Will not melt, evaporate or freeze
• Stop rodents NOW; give your clients immediate relief (and reduce call backs)
• FIFRA 25(b) EPA Exempt; satisfy your clients' green requirements
• Enhance exclusion programs - Buy time while waiting for repairs
• Improve trapping programs - Move rodents to control zones away from customers.
• Clear gel - no mess, cleans up easily with soap and water

Three 1 oz. Tubes PC-RO30

Watch Mice, Rats, Squirrels, Raccoons, Possums, Cats, Moles & Gophers
