Safety and handling

See "Safety, handling, and support" in the *MacBook Essentials* guide.

Built-in battery

Don't attempt to replace or remove the battery yourself—you may damage the battery, which could cause overheating and injury. The built-in battery should be replaced by Apple or an authorized service provider, and must be recycled or disposed of separately from household waste. For information about battery service and recycling, go to www.apple.com/batteries/service-and-recycling.

Avoid hearing damage

To prevent possible hearing damage, do not listen at high volume levels for long periods. More information about sound and hearing is available online at www.apple.com/sound (www.apple.com/la/sound in Latin America).

Prolonged heat exposure

Your MacBook may become very warm during normal use. It's important to keep your MacBook on a hard, stable, and well-ventilated work surface when in use or charging. Use common sense to avoid situations where your body is in prolonged contact with a device or its power adapter when it's operating or plugged into a power source, as sustained contact with warm surfaces may cause discomfort or injury. Take special care if you have a physical condition that affects your ability to detect heat against the body.
