Protecting Personal Trajectories of Social Media Users through Differential Privacy

Shuo Wang, Richard O. Sinnott

Shuo Wang and Richard O. Sinnott are with the CIS, University of Melbourne, Australia
e-mail:shuow4@unimelb.student.edu.au, rsinnott@unimelb.edu.au

Professor Richard O. Sinnott is Director of eResearch at the University of Melbourne and holds a Professorial Role in Applied Computer Systems. He was formerly technical director of the National e-Science Centre, UK; director of e-Science at the University of Glasgow. He has a PhD in Distributed Systems; a Master of Science in Software Engineering and a Bachelor of Science in Theoretical Physics (Hons). He has published over 200 peer-reviewed papers in conferences/journals across a wide range of computing science areas with specific focus over the last ten years in supporting communities demanding finer-grained access control (security).

Mr Shuo Wang is a PhD at the University of Melbourne. He research interests are in the area of security and big data analytics on Cloud infrastructures.

Abstract—Road traffic congestion is an important issue in modern cities, however most existing traffic jam identification solutions are based on expensive facilities such as sensors or transport
