

1 S2 Table. Two-way ANOVA factorial analysis of biochar type \times dose effects on cumulative priming after
 2 90 days. Amendment type: *Miscanthus* feedstock (MS), BC_{MED} and BC_{LAB}; amendment dose: high (5.5%
 3 BC_{MED} and BC_{LAB} and 0.58% MS) and low (1.1% BC_{MED} and BC_{LAB} and 0.12% MS).

Source of Variation	<i>F</i>	<i>P</i>
Type	190	<0.001
Dose	1321	<0.001
Type \times Dose	80	<0.001
