

Workshops 4 and 6

- Adapt food systems to **changes in EU's food demand and food supply** while making EU food production **resilient to crises** and more **environment-friendly**
- Ensure resilience of rural areas by addressing the **generational renewal** challenge (access to resources) and **supporting farmers** (bargaining power)
- Make rural areas attractive to live and work through **social innovation** and **local empowerment**. Implement **innovative and forward-looking solutions** to provide rural communities **access to services, transport and employment**
- Vitalise rural areas, **build bridges** between old and young generations & local rep's and decision-makers, facilitate, **involve marginalised rural groups**
- Guarantee **efficient, transparent policy framework** and adequate **training and advisory services**, help rural communities to optimise EU support to serve needs
