

# ***Interactive comment on “Characterizing the Spatial and Temporal Availability of Very High Resolution Satellite Imagery for Monitoring Applications” by Myroslava Lesiv et al.***

## **Anonymous Referee #1**

Received and published: 21 April 2018

Page 3, Line 15: Capitalize May Minor Detail, on Page 18, Line 18, Global Forest Watch is powered by Google Earth Engine, so maybe worth mentioning that tool, it also needs validation with VHR imagery when doing classifications.

Other than that, no big comments, this is very good article and very useful...I didn't realize the lack of literature in this area so thank you for doing this!
