A. INTRODUCTION AND FINANCING OF THE GENERAL BUDGET

INTRODUCTION

The general budget of the European Union is the instrument which sets out and authorises the total amount of revenue and expenditure deemed necessary for the European Community and the European Atomic Energy Community for each year.

The budget is established and implemented in compliance with the principles of unity, budgetary accuracy, annuality, equilibrium, unit of account, universality, specification, sound financial management and transparency.

- The *principle of unity* and the *principle of budgetary accuracy* mean that all Community revenue and expenditure and that of the European Union when it is charged to the budget must be incorporated in a single document.
- The *principle of annuality* means that the budget is adopted for one budgetary year at a time and that both commitment and payment appropriations for the current budgetary year must, in principle, be used in the course of the year.
- The *principle of equilibrium* means that forecasts of revenue for the budgetary year must be equal to payment appropriations for that year: borrowing to cover any budget deficit which may arise is not compatible with the own resources system and will not be authorised.
- In accordance with the *principle of unit of account*, the budget is drawn up and implemented in euro and the accounts shall be presented in euro.
- The *principle of universality* means that total revenue is to cover total payment appropriations with the exception of a limited number of revenue items which are assigned to particular items of expenditure. All revenue and expenditure is entered in full in the budget without any adjustment against each other.
- The *principle of specification* means that each appropriation must have a given purpose and be assigned to a specific objective in order to prevent any confusion between appropriations.
- The *principle of sound financial management* is defined by reference to the principles of economy, efficiency and effectiveness.
- The budget is established in compliance with the *principle of transparency*, ensuring sound information on implementation of the budget and the accounts.

The budget presents appropriations and resources by purpose (activity-based budgeting), with a view to enhancing transparency in the management of the budget with reference to the objectives of sound financial management and in particular efficiency and effectiveness.

The expenditure authorised by the present budget totals EUR 126 551,10 million in commitment appropriations and EUR 115 497,22 million in payment appropriations, representing growth rates of 4,96 % and 7,56 % respectively by comparison with the 2006 budget.

Budgetary revenue totals EUR 115 497,22 million. The uniform rate of call for the VAT resource is 0,3334 % whilst that for the GNI resource is 0,6769 %. Traditional own resources (customs duties, agricultural duties and sugar levies) account for 14,99 % of the financing of the budget for 2007. The VAT resource accounts for 15,44 % and the GNI resource for 68,53 %. Miscellaneous revenue for this financial year is estimated at EUR 1 209,27 million.

The own resources needed to finance the 2007 budget account for 0,98 % of the total GNI, thus falling below the ceiling of 1,24 % of GNI calculated using the method set out in Article 3(1) of Council Decision 2000/597/EC, Euratom of 29 September 2000 on the system of the European Communities' own resources (OJ L 253, 7.10.2000, p. 42).

The tables below set out step by step the method used to calculate the financing of the 2007 budget.

**Calculation of the uniform call rate for VAT own resources
(Article 2(4) of Decision 2000/597/EC, Euratom):**

Uniform rate (%) = maximum call rate – frozen rate

A. The maximum call rate is set at 0,50 % for 2007.

B. Determination of the rate frozen by the correction of budgetary imbalances granted to the United Kingdom (Article 2(4)(b) of Decision 2000/597/EC, Euratom):

(1) calculation of the theoretical share of the countries with a restricted financial burden:

In accordance with Article 5(1) of Decision 2000/597/EC, Euratom, the financial contribution of Germany (DE), the Netherlands (NL), Austria (AT) and Sweden (SE) is restricted to a quarter of their normal contribution.

Formula for a country with a restricted financial burden, for example Germany:

Germany's theoretical VAT contribution = (Germany's capped VAT base / (EU capped VAT base – UK capped VAT base)) x 1/4 x United Kingdom correction

Example: Germany

Germany's theoretical VAT contribution = 9 919 942 000 / (53 473 109 000 – 9 693 423 000) × 1/4 × 5 251 202 631 = 297 464 591

(2) calculation of the frozen rate:

Frozen rate = (UK correction – theoretical VAT contributions (D + NL + A + S)) / [EU capped VAT base – capped VAT bases (UK + D + NL + A + S)]

Frozen rate = 5 251 202 631 – (297 464 591 + 76 765 475 + 34 259 575 + 39 897 761) / (53 473 109 000 – (9 693 423 000 + 9 919 942 000 + 2 559 999 000 + 1 142 499 000 + 1 330 523 000))

TABLE 4

Correction of budgetary imbalances for the United Kingdom for 2006 pursuant to Article 4 of Decision 2000/597/EC, Euratom (Chapter 1 5)

| Description | Coefficient ⁽¹⁾ (%) | Amount |

| 1. United Kingdom's share (in %) of total non-capped VAT bases | 17,5894 | |
| 2. United Kingdom's share (in %) of PAE-adjusted total allocated expenditure | 8,6985 | |
| 3. (1) – (2) | 8,8909 | |

| 6. PAE-adjusted total allocated expenditure = (4) – (5) | | 98 627 174 202 |
| 7. United Kingdom's correction original amount = (3) × (6) × 0,66 | | 5 787 446 312 |

| 11. Correction for the United Kingdom = (9) – (10) | | 5 251 202 631 |
| <p>⁽¹⁾ Rounded percentages.</p> <p>⁽²⁾ The amount of pre-accession expenditure (PAE) corresponds to payments made to the 10 new Member States (which joined the EU on 1 May 2004) under 2003 appropriations, as adjusted by applying the EU GDP deflator for 2004 and 2005. This amount is deducted from total allocated expenditure to ensure that expenditure which is unabated before enlargement remains so after enlargement.</p> <p>⁽³⁾ The 'UK advantage' corresponds to the effects arising for the United Kingdom from the changeover to capped VAT and the introduction of the GNP/GNI-based own resource.</p> <p>⁽⁴⁾ These windfall gains correspond to the net gains of the United Kingdom resulting from the increase — from 10 to 25 % as of 1 January 2001 — in the percentage of traditional own resources retained by Member States to cover the collection costs of traditional own resources (TOR).</p> | | |

CHAPTER 1 1 — LEVIES AND OTHER DUTIES PROVIDED FOR UNDER THE COMMON ORGANISATION OF THE MARKETS IN SUGAR (ARTICLE 2(1)(A) OF DECISION 2000/597/EC, EURATOM)

Under the common organisation of the market in the sugar sector, sugar producers pay basic and B production levies to cover market support expenditure.

However, the application of a ceiling to the levies as provided for in Article 15 of Regulation (EC) No 1260/2001 may lead to their not fully covering the estimated total loss due to the existence of an exportable surplus calculated in accordance with paragraphs 1 and 2 of the said Article. The complementary levy referred to in Article 1 1 6 of this chapter will then have to be paid by sugar producers in accordance with Article 16 of Regulation (EC) No 1260/2001.

Forecasts are net figures (without collection costs).

Legal basis

Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1), as last amended by Regulation (EC) No 318/2006 (OJ L 58, 28.2.2006, p. 1).

This article is intended for recording the income charged by new Member States in the event of non elimination of sugar stocks considered surplus within the meaning of Commission Regulation (EC) No 60/2004 of 14 January 2004 laying down transitional measures in the sugar sector by reason of the accession of the Czech Republic, Estonia, Cyprus, Latvia, Lithuania, Hungary, Malta, Poland, Slovenia and Slovakia (OJ L 9, 15.1.2004, p. 8).

It is also intended to record revenue from the outstanding sugar storage levies as Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1) abolished the storage levy.

This article also covers the amounts due pursuant to Article 5 of Commission Regulation (EEC) No 65/82 of 13 January 1982 laying down detailed rules for carrying forward sugar to the following marketing year (OJ L 9, 14.1.1982, p. 14) when the obligation to store sugar carried forward is not complied with and the amounts due according to Council Regulation (EEC) No 1789/81 laying down general rules concerning the system of minimum stocks in the sugar sector (OJ L 177, 1.7.1981, p. 39) when the general rules concerning the system of minimum stocks in the sugar sector are not complied with.

Forecasts are net figures (without collection costs).

CHAPTER 1 1 — LEVIES AND OTHER DUTIES PROVIDED FOR UNDER THE COMMON ORGANISATION OF THE MARKETS IN SUGAR (ARTICLE 2(1)(A) OF DECISION 2000/597/EC, EURATOM) (cont'd)

Isoglucose production levies

| Financial year 2007 | Financial year 2006 | Financial year 2005 |
|---------------------|---------------------|---------------------|
| 1 725 000 | 1 125 000 | 6 591 141,27 |

The common organisation of the markets in sugar provides that isoglucose-production undertakings pay basic and B production levies intended to cover market support expenditure.

However, the application of a ceiling to the levies as provided for in Article 15 of Regulation (EC) No 1260/2001 may lead to their not fully covering the estimated total loss due to the existence of an exportable surplus calculated in accordance with paragraphs 1 and 2 of the said Article. The complementary levy referred to in Article 1 1 6 of this chapter will then have to be paid by isoglucose producers in accordance with Article 16 of Regulation (EC) No 1260/2001.

Forecasts are net figures (without collection costs).

|---------------------|---------------------|---------------------|
| 1 050 000 | 1 125 000 | 2 632 765,32 |

Continuation of the existing production quota arrangements for sugar requires that similar arrangements be applied to the production of inulin syrup, a direct substitute for isoglucose and liquid sugar, to prevent this product from disturbing a market which, because of the surplus, could further increase the export costs of sugar and isoglucose producers alone.

The common organisation of the market in sugar provides that inulin syrup producers pay basic and B production levies and where necessary the additional levy covering market support expenditure.

Article 15 of the Financial Regulation states that the balance from each financial year, whether surplus or deficit, is entered as revenue or expenditure in the budget of the subsequent financial year.

The relevant estimates of such revenue or expenditure are entered in the budget during the budgetary procedure and, where appropriate, in a letter of amendment submitted pursuant to Article 34 of the Financial Regulation. They are drawn up in accordance with the principles set out in Article 15 of Regulation (EC, Euratom) No 1150/2000.

After the closure of the accounts for each financial year, any discrepancy in relation to the estimates is entered in the budget for the following financial year through an amending budget.

A deficit is entered in Article 27 02 01 of the statement of expenditure of Section III 'Commission'.

Article 127 of the Act of Accession of Greece provided that during the transitional period (1981 to 1985) a decreasing proportion of the GNP-based financial contributions or of the VAT own resources paid by Greece into the general budget of the European Communities should be refunded.

Only the corrections to the VAT balances for 1981 to 1985 entered in Chapter 3 1 may lead to adjustments of the financial contributions made by Greece for the years in question.

Articles 187 and 374 of the Act of Accession of Spain and Portugal provided that during the transitional period (1986 to 1991) a decreasing proportion of the VAT own resources or of the GNP-based financial contributions paid by Spain and Portugal into the general budget, but not including their share in financing the United Kingdom's rebate, should be refunded.

With effect from 1988, Spain and Portugal also receive a refund of a proportion of their payments in respect of the additional resource and their share in financing the United Kingdom's rebate.

Only the adjustments to the VAT and GNP bases for 1986 to 1991 entered in Chapters 3 1 and 3 2 may lead to positive or negative refunds to Spain and Portugal.

Pursuant to Article 4 of Decision 2003/76/EC, net revenue from the investment of available assets will constitute revenue in the general budget of the European Union earmarked for a specific purpose, namely financing research projects in sectors related to the coal and steel industry by a coal and steel research fund.

The net revenue available for financing research projects in year n+2 appears in the balance sheet of the ECSC in liquidation for year n, and after the liquidation process has been completed will appear as assets in the balance sheet of the Coal and Steel Research Fund. This financing mechanism took effect in 2003. Revenue coming from 2005 will be used for research in 2007. In order to reduce as far as possible the fluctuations that movements in the financial markets could cause in the financing of research, a smoothing arrangement is applied. The amount of net revenue expected to be available for research in 2007 comes to EUR 53 875 000.

In accordance with Article 4 of Decision 2003/76/EC, 72,8 % of the fund's appropriations will be for the steel-related sector and 27,2 % for the coal-related sector.

As part of its audit work, the Court of Auditors has to call on outside experts for technical studies and analyses (chemical, physical and statistical). The need for appropriations to cover the cost of studies contracted out to experts is justified by the specialised and sometimes unforeseeable nature of the studies in question. Without such appropriations, the Court of Auditors could be seriously hampered in performing its duties and its independence could be jeopardised. This appropriation also includes the cost of the audit of the Court of Auditors' accounts by independent auditors whose report is published in the *Official Journal of the European Union*.

|---------------------|---------------------|---------------------|
| p.m. | p.m. | 41 922 000,— |

Remarks

Council Decision 2003/76/EC of 1 February 2003 establishing the measures necessary for the implementation of the Protocol, annexed to the Treaty establishing the European Community, on the financial consequences of the expiry of the ECSC Treaty and on the Research Fund for Coal and Steel (OJ L 29, 5.2.2003, p. 22) stipulates that the Commission shall be entrusted with winding up the financial operations of the European Coal and Steel Community which are still in progress when the ECSC Treaty expires.

Pursuant to Article 4 of Decision 2003/76/EC, net revenue from the investment of available assets will constitute revenue in the general budget of the European Union earmarked for a specific purpose, namely financing research projects in sectors related to the coal and steel industry by a coal and steel research fund.

The net revenue available for financing research projects in year n+2 appears in the balance sheet of the ECSC in liquidation for year n, and after the liquidation process has been completed will appear as assets in the balance sheet of the Coal and Steel Research Fund. This financing mechanism took effect in 2003. Revenue coming from 2005 will be used for research in 2007. In order to reduce as far as possible the fluctuations that movements in the financial markets could cause in the financing of research, a smoothing arrangement is applied. The amount of net revenue expected to be available for research in 2007 comes to EUR 53 875 000.

In accordance with Article 4 of Decision 2003/76/EC, 72,8 % of the fund's appropriations will be for the steel-related sector and 27,2 % for the coal-related sector.

In accordance with Article 18 of the Financial Regulation, any revenue will be used to provide additional appropriations under Chapter 08 22 of the statement of expenditure in this section.

Revenue from contributions from the EFTA States to the Community's general costs under Articles 76 and 82 of the Agreement on the European Economic Area gives rise to the opening of supplementary appropriations to be entered in the budget headings concerned, in accordance with the Financial Regulation. - a study on the feasibility of and obstacles to the creation of a federal police force for the European Union;

The main idea underlying it is that social and ecological standards should be applied as parameters for granting or denying access to European markets and for charging different duties and agricultural levies according to the standards established. These levies/duties will be channelled to a fund for rural development in developing countries and benefit the products for which standards need to be improved;

- a study on desertification; the study should cover inter alia the economic and social repercussions for European regions affected by desertification, with an appraisal of the current and likely future implications, particularly for the sectors most at risk, such as farming and tourism, environmental impact, solutions and strategies for combating desertification, identification of the means of combating desertification that the EU should have at its disposal, and techniques and instruments for the recovery and use of water resources;

TITLE 01
ECONOMIC AND FINANCIAL AFFAIRS

Overall objectives

Action in this policy area aims to ensure the smooth functioning of Economic and Monetary Union (EMU) both inside and outside the European Union, by advancing economic policy coordination, conducting economic surveillance and providing the Commission and other Community institutions with high-quality policy assessment and advice on economic and financial questions. This entails monitoring economic developments in the Union and in third countries, cooperating with international organisations and following international financial issues. Operational activities include the implementation of EU investment financing programmes on behalf of other Commission departments, in close cooperation with the EIB, EIF and EBRD and financial market operations (borrowing and lending, treasury management and management of the Guarantee Fund as well as macro-financial assistance to third countries).

The main objective for 2007 is to strengthen economic governance in the Union aimed at raising the contribution of public finances and other economic policies to growth and employment in line with the Lisbon Strategy, in addition to securing the core budgetary objectives of sound and stable public finances, by implementing the revised Stability and Growth Pact. Integration of the new Member States in EMU will continue in 2007, in the expectation that some of them will participate in the exchange rate mechanism (ERM II) and, subsequently, in the euro zone. Furthermore, the full integration of Bulgaria and Romania into the Community economic policy coordination framework is to be further corroborated after their accession in 2007. Also, in 2007, new financial instruments will be implemented, notably for TEN-transport and RTD projects and SMEs, in order to support the Lisbon Strategy and the European Initiative for Growth.

Remarks

Former Items 01 03 02 01 and 01 03 02 02

This exceptional assistance aims to ease financial constraints on certain third countries experiencing macroeconomic difficulties characterised by balance of payment deficits and/or serious budgetary imbalances.

It is directly linked to the implementation by the recipient countries of macroeconomic stabilisation and structural adjustment measures. Community action generally complements that of the International Monetary Fund, coordinated with other bilateral donors.

The Commission informs the budgetary authority twice a year on the macroeconomic situation of the beneficiary countries and reports extensively on the implementation of this assistance on a yearly basis.

If, on expiry of this period, the loans granted by the European Investment Bank have not attained the overall amounts referred to above, the period will be automatically extended by six months.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 12 of Council Regulation (EC, Euratom) No 1150/2000 of 22 May 2000 implementing Decision 94/728/EC, Euratom on the system of the Communities' own resources (OJ L 130, 31.5.2000, p. 1) will apply.

Remarks

New item

This appropriation is intended to cover expenditure on Community financial instruments implemented in the framework of the Competitiveness and Innovation Framework Programme (2007 to 2013), and to facilitate the access of SMEs to finance.

Poor access to appropriate forms of finance is frequently quoted as a main barrier to entrepreneurship and enterprise innovation. This problem may be exacerbated by new accounting standards which will make banks more sensitive to risk and lead to a rating culture. The Entrepreneurship and Innovation Programme will address persistent recognised market gaps leading to poor access to equity, venture capital and loans for SMEs, through Community Financial Instruments operated on behalf of the Commission by the European Investment Fund (EIF), the Community's specialised institution for providing venture capital and guarantee instruments for SMEs.

Under the Multiannual Programme for Enterprise and Entrepreneurship, independent evaluations identified the market-based approach and the implementation via the EIF of these instruments as a best practice. They will therefore be continued and adapted in the new programme.

The Community Financial Instruments for SMEs will ease the supply of seed and early stage capital for innovative start-ups and young companies.

The High Growth and Innovative SME Facility (GIF) will share risk and reward with private equity investors providing important leverage for the supply of equity to innovative companies. The GIF instruments will increase the supply of development equity for innovative SMEs in their early stages and in the expansion phase, leveraging 'follow-on' capital to help them bring their products and services to market and continue research and development activities.

The SME Guarantee Facility will continue to provide counter or co-guarantees to guarantee schemes operating in eligible countries, and direct guarantees to financial intermediaries. It will concentrate on addressing market failures: (i) in the access of SMEs with growth potential to loans (or loan substitutes such as leasing); (ii) in the provision of microcredit and (iii) in access to equity or quasi-equity. A (iv) new securitisation window will mobilise additional debt financing for SMEs under appropriate risk-sharing arrangements with the targeted institutions.

A Capacity Building Scheme will support the capacity of financial intermediaries to focus on additional investment and technology aspects. Action will also be undertaken to facilitate SME financing in countries where banking intermediation is significantly lower than the EU average.

To the appropriations entered in this article must be added the contributions from the EFTA States ⁽¹⁾ pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Any revenue from the contribution from candidate countries for participation in the Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 18(1)(d) of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item, in accordance with the Financial Regulation.

Remarks

This appropriation is intended to cover the financing of the provision of paid-up shares of the capital subscribed by the European Community.

The European Investment Fund (EIF) was created in 1994. Its founder members are the European Community, represented by the European Commission, the European Investment Bank (EIB) and a number of financial institutions. The Community membership to the EIF is determined by Council Decision 1994/375/EC.

The EIF is expected to exhaust its own resources by mid-2007 and will be unable to continue its own resources operations. Therefore, it has proposed to its Board of Directors to increase the subscribed capital up to 50 % in nominal terms.

Article 3 of Council Decision 1994/375/EC specifies that the position of the Community on a possible capital increase in the capital of the EIF and on its participation in that increase shall be decided unanimously by the Council, acting on a proposal from the Commission and after consulting the European Parliament. The Commission will prepare a new Council Decision on Community participation in the capital increase of the EIF, which could possibly be adopted by the Council early 2007. Consequently, the purpose of the proposal for a Council Decision is to approve the 50 % increase in the nominal capital of EIF. It will be proposed to maintain the level of the Community participation at 30 %.

The intention is to increase the total subscribed share capital from EUR 2 billion to EUR 3 billion and, maintaining the current paid-in ratio of 20 %, the paid-in capital from EUR 400 million to EUR 600 million. The capital increase of the EIF was endorsed within the framework of EIB Group's contribution to growth and jobs which was welcomed by the Ecofin of 14 March 2006 and European Council of 23 and 24 March 2006.

The aim is to secure closer cooperation between Member States with a view to laying down principles for an 'expanded mentoring' scheme involving the transfer of the knowledge and core competences that are essential for the successful transfer of business ownership. The pilot project will also seek to ensure that experience is pooled at European level among young entrepreneurs (owners or managers of SMEs, VSEs and craft undertakings) by means of traineeships and training courses within SMEs in key or complementary sectors. The relevant representative bodies (chambers of commerce and industry and craft associations) will be responsible for supporting and promoting this programme. The beneficiaries will be young entrepreneurs (owners or managers of SMEs, VSEs and craft undertakings) who are in the process of setting up in business or are planning to transfer their business in the short to medium term.

Remarks

On 21 April 2004, the European Parliament and the Council adopted Decision 2004/387/EC laying down a programme on interoperable delivery of pan-European eGovernment services to public administrations, businesses and citizens (IDABC). This programme, which is aimed at promoting the establishment of pan-European eGovernment services and the telecommunications networks on which they are based, will contribute to the eEurope initiatives (in the context of the Lisbon objectives) and the related action plans. It will also contribute to eliminating or reducing the obstacles to the free movement of goods, persons, services and capital, support the creation of a European area of security, justice and freedom, and facilitate the application of the Community *acquis* following enlargement.

IDABC falls into two sections: projects of common interest and horizontal measures.

In cooperation with the Member States, the Community must implement projects of common interest in support of sectoral policies, interinstitutional cooperation and the operation of the European Agencies. The projects cover the preparation, feasibility, development and implementation of pan-European eGovernment services; these (information and interactive) services must be provided by public administrations to public administrations, businesses and the general public.

In cooperation with the Member States, the Community must also implement horizontal measures to support interoperability. These will include:

- horizontal (trans-sectoral) pan-European services,
- infrastructure services, identified in response to the general requirements of the projects of common interest aimed at facilitating interoperability, this being the essential condition in both technical and economic terms,

- strategic activities and support for the evaluation and promotion of eGovernment services and the promotion of good practice and cost/benefit analyses,
- greater promotion of the use of open source software by public administrations for citizens,
- services accessible to disabled citizens.

To the appropriations entered in this item must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation according to Annex V to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the candidate countries' contribution to participation in Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may give rise to the opening of additional appropriations, pursuant to Article 18(1)(d) of the Financial Regulation.

Revenue is estimated at EUR 200 000.

Remarks

Former Article 02 02 09

The aim of this initiative is to enhance the visibility of European tourist destinations and create awareness of their quality and diversity. This will be done through the presentation of awards for social, cultural and environmentally sustainable forms of tourism development and the creation of a platform for the exchange of good practice at the European level.

The Commission together with a group of public and private experts will establish the theme for each event and the award criteria. For each year, all Member States will have the opportunity to nominate one destination through a competition to be held at national level.

The project's aims are to:

- enhance the visibility of European tourist destinations,
- create awareness of the diversity and quality of Europe's tourist destinations,
- promote all European countries and regions,
- present awards for sustainable forms of tourism,

TITLE 03
COMPETITION

Overall objectives

The objective of the Commission in this area is to enforce the competition rules of the Community Treaties in order to ensure that competition in the European Union market is not distorted, thereby contributing to the welfare of consumers and the competitiveness of the European economy.

Competition policy aims at protecting consumer welfare and at ensuring a level playing field for companies competing in the market, in particular by combating obstacles to parallel trade which distort the functioning of the internal market. Undistorted competition is also a key dimension of the enlargement process and a factor in Europe's global competitiveness. The single currency calls for an even greater role for competition policy in order to further dynamically integrate markets. Hence, competition policy, including merger control, cartel dismantling, enforcement of the antitrust rules, market liberalisation, State aid control and international cooperation between competition authorities is one of the Commission's key tasks under the Treaty.

In this context, the appropriation in question may cover expenditure on temporary support staff (contractual agents, auxiliaries, seconded national experts, staff from agencies) employed at headquarters to perform the tasks of the technical assistance office,
- expenditure on temporary support staff at headquarters, limited to EUR 370 000, which corresponds to an estimated four man-years. This estimate is based on an annual unit cost per man-year, of which 97 % is accounted for by remuneration for the staff concerned and 3 % by the cost of training, meetings, missions, IT and telecommunications relating to those staff members,
- expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the programme or measures coming under this item, plus any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

To the appropriations entered in this item must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation according to Annex V to this part of the statement of expenditure in this section, which forms an integral part of the general budget.

Any revenue from the contribution from candidate countries for participation in Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations, according to the same ratio as between the amount authorised for expenditure on administrative management and the total appropriations entered for the programme, pursuant to Article 18(1)(d) of the Financial Regulation.

Remarks

The action taken by the Community pursuant to Article 158 of the Treaty shall be designed to strengthen the economic and social cohesion of the enlarged Community in order to promote the harmonious, balanced and sustainable development of the Community. This action shall be taken with the aid of the Funds, the European Investment Bank (EIB) and other existing financial instruments. It shall be aimed at reducing the economic, social and territorial disparities which have arisen particularly in countries and regions whose development is lagging behind, at the speeding-up of economic and social restructuring, and at the ageing of the population.

The action taken under the Funds shall incorporate, at national and regional level, the Community's priorities in favour of sustainable development by strengthening growth, competitiveness and employment, and social inclusion, as well as protecting and improving the quality of the environment.

The 'Convergence' objective shall be aimed at speeding up the convergence of the least-developed Member States and regions by improving conditions for growth and employment through increasing and improving the quality of investment in physical and human capital, the development of innovation and of the knowledge society, the adaptability to economic and social changes, the protection and improvement of the environment as well as administrative efficiency. This objective shall constitute the priority of the Funds.

Remarks

This appropriation is intended to cover the financing of the social partners' participation in the European employment strategy and the implementation of the Lisbon strategy. It is intended to cover grants for promoting the social dialogue at cross-industry and sectoral level in accordance with Articles 138 and 139 of the Treaty. The appropriations will therefore be used to finance consultations, meetings, negotiations and other operations designed to achieve these objectives.

In addition, as the heading suggests, this appropriation can cover support for industrial relations measures, in particular those designed to develop expertise and exchange of information on a European basis.

It also covers measures to promote the actions set out in the Commission Communication on a framework for the promotion of employee financial participation (COM(2002) 364 final).

Pilot projects intended to develop codes of conduct and social labels in order to guarantee respect for fundamental social and employment rights, with the participation of companies, trade unions and NGOs that defend fundamental social rights will also be eligible.

This appropriation may also cover funding of measures involving representatives of the social partners in the candidate countries. It is also intended to promote equal participation of women in the decision-making bodies of both trade unions and employers' organisations. These last two components are of a horizontal nature.

Remarks

Former Article 04 02 12

This appropriation is intended, for completion of the internal market and implementation of the European employment strategy, to cover the implementation and operation of the EURES network.

This network is aimed at developing cooperation between the Commission and the Member States, and in particular their employment services, with a view to:

- the provision of placement, advice and information services for workers as regards employment in another Member State and for employers wishing to recruit in another Member State,
- the exchange of job vacancies and applications at Community level and across borders,
- the exchange of information between Member States concerning labour-market trends and living and working conditions.

The EURES network may include special cooperation and service structures, at the initiative of border regions.

The EURES network has close operational links with the relevant activities in the Commission DGs for Education and Culture and Justice, Freedom and Security, such as Europass and Leonardo.

Further studies will be conducted to explore the feasibility of a European approach to the certification of non-formal qualifications.

The network will ensure that the principle of freedom of movement is respected and that it operates in a transparent and non-discriminatory fashion, with particular regard to access to employment for Community nationals in a country other than that of their origin.

CHAPTER 04 03 — WORKING IN EUROPE — SOCIAL DIALOGUE AND MOBILITY (*cont'd*)04 03 04 (*cont'd*)

This appropriation covers measures that are essential to the smooth running of the EURES network, in particular the following support measures:

- subsidies for national and cross-border support activities organised by EURES partners,
- initial and further training of EURES advisers in the Member States,
- contacts between the EURES advisers and cooperation between government employment services, including those of candidate countries,
- promotion of EURES among firms and the general public,
- measures to help remove mobility obstacles, particularly in the field of work-related social security,
- development of multilingual computerised systems consisting of the two databases ('job vacancies and applications' and 'living and working conditions'), as well as maintenance and expansion of an Internet site,
- development of special structures for cooperation and services in border areas, pursuant to Article 17(b) of Regulation (EEC) No 1612/68, as amended by Regulation (EEC) No 2434/92,
- participation in the creation of a single site containing information on mobility in Europe, providing access to job vacancies and information on job offers (with links to public and private employment services), jobseekers, living and working conditions, education and training, and student and teacher mobility. This portal should also address the needs of nationals from third countries, in particular from countries coming under the EU's Neighbourhood Policy.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation according to Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

This appropriation is also to be used to set up and run specific cooperation and service structures for border areas.

This appropriation is intended to fund initiatives to promote active ageing, including access to the labour market in accordance with the goals of:

- the Barcelona European Council of 15 and 16 March 2002, which called for a progressive increase in the effective average age at which people stop working in the European Union,
- the Stockholm European Council of 23 and 24 March 2001, which called upon the Council and the Commission to report jointly on how to increase labour force participation and promote active ageing,
- Article 2 of the EC Treaty, which calls for a high level of employment, the raising of the standard of living and quality of life as well as economic and social cohesion and solidarity among Member States,
- Council Decision 2003/578/EC of 22 July 2003 on guidelines for the employment policies of the Member States (OJ L 197, 5.8.2003, p. 13), which recalls the Lisbon and Stockholm targets and the demographic challenge for the employment rate for older women and men. Guideline 5 specifically refers to increasing the labour supply and promoting active ageing,

- Council Recommendation 2003/579/EC of 22 July 2003 on the implementation of Member States' employment policies (OJ L 197, 5.8.2003, p. 22), which identifies certain actions to be taken with regard to the labour supply and active ageing.

It is also intended to finance measures to encourage the establishment of exchange programmes for the elderly through specialised organisations tasked with developing, *inter alia*, resources for mobility and adapting infrastructures, including within travel, in accordance with the contents of the:

- European Parliament resolution of 11 April 2002 on the second United Nations World Assembly on Ageing (Madrid, 8 to 12 April 2002) (OJ C 127 E, 29.5.2003, p. 675), which stressed the importance of promoting programmes encouraging mobility for the elderly, and in particular paragraphs 13 and 14 thereof,
- European Parliament resolution of 15 December 2000 on the Commission communication 'Towards a Europe for all ages — Promoting prosperity and intergenerational solidarity' (OJ C 232, 17.8.2001, p. 381).

Part of this appropriation is intended for the establishment of a European Monitoring Centre for Change, decided upon at the Nice European Council of 7 to 9 December 2000 with a view to identifying, anticipating and managing technological, social and economic trends. To this end, high quality information must be collected, processed and analysed.

For this purpose, EUR 500 000 has been earmarked to finance the activities of the European Monitoring Centre for Change.

This appropriation will also cover studies on the impact of new technologies in the workplace and on occupational illnesses, such as, for example, the impact of repetitive movements when performing a task.

During the budgetary procedure and even during the financial year, when a letter of amendment or an amending budget is submitted, the Commission shall inform the budgetary authority beforehand of any changes in the budget of the agencies, in particular concerning the establishment plans published in the budget. Such a procedure is in accordance with the provisions on transparency set out in the Interinstitutional Declaration of 17 November 1995 and implemented in the form of a code of conduct agreed by the European Parliament, the Commission and the agencies.

*Remarks**Former Article 04 02 16*

In its communication of 7 April 2000 (COM(2000) 196 final), the Commission refers to the need to motivate regional and local players to take part in the European employment strategy. The projects financed serve to encourage cooperation, improve knowledge, develop exchanges of information, promote best practices and innovative approaches at local and regional level as part of the European employment strategy.

The purpose of these activities is to make local and regional authorities and other key local partners, including representatives of the mutual and non-profit sector, aware of the scope for measures conducive to implementing the employment guidelines at local and regional level and the interlinking thereof at regional and local levels.

They include in particular:

- promoting publicity work for the European employment strategy and its implementation at local and regional levels, studies on how mutual and non-profit institutions can be supported at local and regional levels, studies on how to improve transnational cooperation and the dissemination of proven practices in implementing local employment initiatives and studies on what measures can be taken to create incentives for local and regional partners to contribute towards implementing the European employment strategy,
- enhancing the employment potential of the 'third system', and financing innovative preparatory actions, not least at local level, in the areas of social and neighbourhood services, the environment and the arts.

Particular focus is to be on the gender aspects of employment policy.

In connection with calls for proposals under this article, no restrictions on access to funding which require cross-border partnerships to comprise partners from more than three Member States are permitted.

New article

This appropriation is intended to cover the European Globalisation Adjustment Fund (EGF), to enable the Community to provide support for workers made redundant as a result of major structural changes in world trade patterns where these redundancies have a significant adverse impact on the regional or local economy.

The maximum amount of expenditure from the Fund shall be EUR 500 million per year. According to the conclusions of the European Council of 15 and 16 December 2005 and in line with the Interinstitutional Agreement on budgetary discipline and sound financial management of 17 May 2006, no specific financial provision for the Fund will be made in the multiannual financial framework; based on the above guidelines, the Commission proposes to determine the level of 'underspends' relevant to the financing of the EGF in any given year (year n) in the following manner:

- (1) the margin left available under the global ceiling for commitment appropriations of the previous year, i.e. the difference between total commitment appropriations in the multiannual financial framework and total commitment appropriations entered in the budget of the year n - 1;
- (2) if the previous amount is not sufficient, cancelled commitment appropriations of the previous two years. Funds will be mobilised via an amending budget, if and when needed, with reference to the amount determined as laid down above. To streamline the decision-making process, the Commission will submit proposals in 'batches', as appropriate, during the budgetary year.

AGRICULTURE AND RURAL DEVELOPMENT

Overall objectives

The objectives of the common agricultural policy (CAP) derive directly from the Treaty and are, in particular, to stabilise markets, ensure a fair standard of living in the farming community and guarantee security of supplies.

The CAP has been reformed a number of times since it was first introduced, most recently with the sugar reform at the end of 2005. The key aim of these reforms, as part of Agenda 2000, was to shift the slant of the farm economy towards the market in order to make the agricultural sector more competitive. Reflecting the multipurpose application of agricultural activity, the CAP must also be fully compatible with sustainable development, in particular by promoting environmentally friendly production methods and the effective use of resources. Rural development, the second pillar of the CAP, aims at enhancing the competitiveness of rural areas and preserving the environment and rural heritage in order to secure the future of rural areas and promote job maintenance and creation.

2007 will be a year of consolidation following the CAP reforms, of implementation of the Council decisions on the rural development framework 2007 to 2013 and the new CAP financial regulation as well as of the enlargement to Romania and Bulgaria.

Remarks

The United Nations Environment Programme contends that more than a quarter of the planet's agricultural land has become degraded since the Second World War. Between 10 and 15 million hectares are currently lost each year.

In Europe, soil degradation and erosion is probably the most significant environmental problem caused by conventional agriculture, seriously affecting close to 157 m ha (16 % of Europe, i.e. almost three times the total area of France). The average soil erosion rate in Europe (17 tonnes per ha per year) is much higher than the average soil formation rate (1 tonne per ha per year). Most European Union countries are affected by this problem. In the Mediterranean regions, soil erosion is highly pronounced and may affect up to 50 to 70 % of agricultural land. Intensification of conventional agriculture (increased mechanisation and ploughing) over the last 50 years has contributed to this trend, increasing the risk of desertification in most vulnerable regions. Erosion has a major economic impact on the agricultural land concerned, but also on local public infrastructure because of the cost of maintaining water systems and water treatment.

There is reduced biodiversity in conventional agriculture because soil left bare for a lengthy period no longer provides food and shelter for wildlife at critical times. However, production systems which leave surface residues help to restore and maintain various types of wildlife (e.g. birds and small mammals).

Sustainable agriculture is a set of techniques designed to allow farming to take place on a lasting basis from a physical, social, economic and environmental perspective.

Simplified cultivation techniques are the core component; they are techniques aimed at better soil conservation (or conservation agriculture). Conservation agriculture refers to a set of soil management practices which minimise alteration of the composition, structure and natural biodiversity of soil, safeguarding it against erosion and degradation. These techniques combine surface working techniques, mulch sowing, direct sowing, non-incorporation of crop residues and vegetation cover in forestry (spontaneous vegetation or vegetation resulting from the sowing of appropriate species).

Over and above the purely environmental aspect, the economic aspect of conservation agriculture techniques is another major factor to be taken into account. Cultivation within conventional agriculture calls for a high level of machinery investment and maintenance, a high level of fossil energy consumption and considerable working time by comparison with conservation agriculture. For annual growing without ploughing, for instance, fuel savings over conventional systems are put at three to five litres per ha. In general, conservation agriculture reduces energy consumption by about 15 to 50 %, increasing production per energy unit by 25 to 100 %.

Rural development planning action for 2007 to 2013 affords a unique opportunity to make headway with these techniques. The pilot project could cover know-how dissemination activities, this being a fundamental component of the project. One of the basic objectives is to foster knowledge of these techniques so that future European legislation can be easily applied.

Remarks

Article 39 of Regulation (EC) No 1260/1999 provides for financial corrections, any revenue from which is entered in Item 6 5 0 0 of the statement of revenue. That revenue may give rise to the provision of additional appropriations, in accordance with Article 18 of the Financial Regulation, in specific instances where they are necessary to cover risks of cancellation or of reductions in corrections previously decided upon.

Regulation (EC) No 1260/1999 determines the conditions for repayment of an advance without having the effect of reducing the contribution from the Structural Funds towards the assistance concerned. Any revenue from the repayment of advances, which is entered in Item 6 1 5 7 of the statement of revenue, will give rise to the provision of additional appropriations in accordance with Articles 18 and 157 of the Financial Regulation.

It also funds amounts outstanding from former multiannual measures, in particular those approved and implemented under the other abovementioned regulations, which are not covered by the priority Objectives of the Funds.

This appropriation will where applicable also be used to cover amounts payable in respect of the EAGGF Guidance Section for measures for which the corresponding commitment appropriations are neither available nor provided for in the programming for 2000 to 2006.

Remarks

New item

Twenty per cent of this appropriation will be placed in the reserve. The Commission (and the Council) will communicate to Parliament between the first and the second reading how it intends to cater for breaches of Parliament's budgetary prerogatives when laying down annual budgets following the recent proposal on voluntary modulation (COM(2006) 241) and whether this proposal on voluntary modulation, if applied by Member States, could have consequences for the classification of expenditure as defined in Annex III to the interinstitutional agreement of 17 May 2006, since it involves a reduction in compulsory expenditure and an increase in non-compulsory expenditure with a possible impact on the calculation of the MRI. Furthermore, the Commission should explain why it feels that its proposal is in line with its commitment, as expressed in Declaration No. 10 annexed to the interinstitutional agreement of 17 May 2006, concerning respect for the basic rules governing rural development policy and, moreover, whether it feels it has managed the risk of competition being distorted if voluntary modulation is applied by Member States.

This appropriation is intended to cover the financing of the 2007 to 2013 rural development programmes funded by the European Agricultural Fund for Rural Development (EAFRD). Part of the appropriation is intended for financing the management of the Natura 2000 network.

Since expenditure on staff and buildings is included in the appropriations entered in Items XX 01 01 01 and XX 01 03 01, the Commission subsidy, together with the Agency's own revenue, is intended to cover expenditure incurred by the Agency in its activities.

At its 23rd session on 1 and 2 February 1960, the Euratom Council proposed unanimously that the Commission postpone not only the levying of the charge (intended to cover the operating expenditure of the Euratom Supply Agency) but also the actual introduction of the said charge. Since then a subsidy has been included in the budget to balance the revenue side against the Agency expenditure figures shown in the statement of estimates.

Remarks

New article

This appropriation is intended to cover expenditure on implementation of a programme to promote alternatives to international road haulage, designated 'Marco Polo II'.

The programme Marco Polo II proposes five kinds of measures to achieve its objectives:

- modal transfer actions, to transfer, in the short term, an important share of road traffic to other less saturated transport modes,
- catalyst actions, that enable structural market barriers to be overcome through the implementation of new innovative services,
- common learning actions, with a view to improving cooperation, share of know-how and knowledge development in the logistics industry,
- actions to provide high-quality logistic services based on short sea shipping, that will be comparable to motorways and therefore called 'motorways of the sea',
- traffic avoidance actions, that will involve an active role for manufacturing industry and logistics systems within one coherent strategy to develop sustainable operations.

The transport infrastructure networks of the newest Member States are not at the moment adequate to serve the increased post-enlargement trade flows; in such cases intermodal transport solutions constitute the best response and thus there is huge scope for Marco Polo II as a continuation and strengthening of the successful Marco Polo I programme.

The support for commercial action in the market for freight transport services is different from the support given through research and development programmes and the trans-European network programme. Marco Polo II will foster modal shift projects in all segments of the freight market, not only in combined transport.

Remarks

New article

This appropriation is intended for the establishment and development of the trans-European transport network (TEN), which is held to be a key policy for the proper functioning of the internal market and for economic and social cohesion (Articles 154 to 156 of the Treaty establishing the European Community). This contribution takes the form of co-financing of projects of common interest identified in the Community guidelines for the development of the trans-European transport network (Decision No 1692/96/EC).

The aim is:

- to help define projects of common interest,
- to speed up the Member States' implementation of trans-European transport network projects of common interest,
- to overcome the financial obstacles which may hamper the start-up phase of a project, particularly by means of feasibility studies,
- to encourage the participation of private capital in project funding, as well as public/private partnerships,
- to ensure better financial arrangements for projects, minimising the use of public funding, thanks to flexible means of intervention.

Part of this appropriation is intended to promote cooperation in the Baltic Sea regions and the Northern Dimension projects.

Co-financing of the deployment of the European Rail Traffic Management System (ERTMS) must be a high priority.

Special attention must be paid to cross-border rail projects that contribute to better connections between old and new Member States and the reunification of Europe.

Funds for 2007 have been placed in the reserve until a satisfactory agreement is reached with the Council and/or Commission on how to maintain political control over the allocation of funds.

New article

This appropriation is intended to cover the costs of economic and technical feasibility studies, preparatory and evaluation studies and interest-rate subsidies, loan guarantees or direct subsidies, in duly justified cases, for projects of common interest identified under the guidelines adopted by the Council.

The objective of this measure is to contribute towards the competitive operation of the internal energy market and the strengthening of the security of energy supply through the establishment of the network infrastructure required, and in particular through the establishment and development of trans-European energy networks, promoting the interconnection and interoperability of the national networks and access to such networks and extending them beyond the Community.

All proposals will be subject to environmental impact assessment and local consultation.
