COMMISSION
TITLE 06 — ENERGY AND TRANSPORTCHAPTER 06 06 — RESEARCH RELATED TO ENERGY AND TRANSPORT (*cont'd*)*Remarks*

These remarks are applicable to all the budget headings in this chapter.

These appropriations will be used for the seventh framework programme of the European Community for research, technological development and demonstration activities, which covers the period 2007 to 2013.

It will be carried out in order to pursue the general objectives described in Article 163 of the Treaty, in order to contribute to the creation of a society of knowledge, based on the European Research Area, i.e. supporting transnational cooperation at all the levels throughout the EU, raising the dynamism, creativity and the excellence of European research to the limits of knowledge, strengthening the human resources of research and of technology in Europe at the quantitative and qualitative level and the capacities of research and of innovation in the whole of Europe and ensuring optimum use of it.

It will be organised in programmes, corresponding to four major objectives of European research policy: transnational cooperation on topics defined in relation to the policies (cooperation), research proposed by the research workers themselves, on the initiative of the research workers' Community (ideas), individual research workers' support (people), and the support of the capacities of research (capacities).

2007 constitutes the first year of effective implementation of this programme, the objectives of which rest on the carrying out of the sixth framework programme for the creation of the European Research Area, and giving them an extension while tending to the development of the economy and of the society of knowledge in Europe.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Community to investigate new areas of research suitable for Community action, *inter alia*, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations also cover administrative expenditure, including expenditure on staff, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure linked with the achievement of the objective of the measure of which they form an integral part, including the action and measures necessary for preparation and monitoring of the Community's RTD strategy.

The possibility of third countries or organisations from third countries taking part in European cooperation in the field of scientific and technical research is envisaged in the case of some of these projects. Any financial contribution will be entered in Item 6 0 1 3 of the statement of revenue and may lead to additional appropriations being made available in accordance with Article 18 of the Financial Regulation.

Any revenue from the contribution from candidate countries for participation in Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 18(1)(d) of the Financial Regulation.

Additional appropriations will be made available under Article 06 06 04.

Remarks

This appropriation is intended to cover financial contributions to technical assistance projects in accordance with Article 5 of Regulation (EC) No 1655/2000 pertaining to the third thematic component of LIFE III, 'LIFE-third countries'. Actions covered will support the establishment of capacities and administrative structures needed in the environmental sector in third countries. The financial framework for the implementation of the extension in the period 2005 to 2006 is set at EUR 317 200 000. The allocation of available appropriations for accompanying measures is limited to 6 % for the period 1 January 2005 to 31 December 2006. The countries eligible to participate in the LIFE-third countries programme are Albania, Algeria, Bosnia and Herzegovina, Croatia, Egypt, Israel, Jordan, Lebanon, Morocco, Syria, Tunisia, Turkey, the West Bank and Gaza Strip and the Baltic shoreline of Russia (Kaliningrad and St Petersburg regions). The European Union and bordering countries acting together to address environmental problems will be far more effective than individual national actions; many such issues being of a transnational nature. The activities undertaken aim at contributing to the development and strengthening of national environmental policies and action programmes with the objective of increasing environmental protection in countries bordering on the Mediterranean and the Baltic Sea, other than candidate central and east European countries who have signed association agreements with the European Union.

Support to actions promoting cooperation and coordination between several countries (European Union and bordering countries) is particularly targeted by the multiannual programme.

Irrespective of the beneficiary, no administrative expenditure against this article is authorised.

Remarks

This appropriation is intended to cover financial contributions to actions contributing to the implementation, updating and development of Community environmental policy and legislation, including the integration of the environment into other policies, thereby contributing to sustainable development. In particular, LIFE+ shall support the implementation of the 'Sixth Environmental Action Programme', including the thematic strategies, and finance measures and projects with European added value in Member States (through indirect centralised management via a network of national agencies and through multi-stakeholder cooperation and capacity building facilitated by other institutions and organisations with expertise in environmental policy consultation and implementation), including transboundary projects, and at Community level (direct centralised management by the Commission).

LIFE+ will support projects and measures of Community interest, i.e. which make a significant contribution to the achievement of the general objective of LIFE+, and relating to the three following strands: nature and biodiversity, environmental policy and governance, and information and communication.

Projects financed at national level will be selected and managed by national Agencies on the basis of national annual work programmes approved by the Commission, these annual programmes being established on the basis of multiannual strategic programmes (2007 to 2010 and 2011 to 2013) drawn up by the Commission.

The projects financed within the framework of national programmes shall be:

- of Community interest by making a significant contribution to the achievement of the general objective of LIFE+,
- technically and financially coherent, feasible and provide value for money.

CHAPTER 07 03 — IMPLEMENTATION OF COMMUNITY ENVIRONMENTAL POLICY AND LEGISLATION (*cont'd*)**07 03 07** (*cont'd*)

In addition, and to ensure European added value and avoid the financing of recurring activities, the projects selected within the framework of national programmes shall meet one of the following criteria:

- best practice measures and projects or demonstration measures and projects for the implementation of Directive 79/409/EEC or Directive 92/43/EEC, or
- innovative measures and projects or demonstration measures and projects relating to Community environmental objectives, including the development or dissemination of best practice techniques, know how or technologies; or awareness raising campaigns and special training for agents involved in fire prevention interventions, or
- measures and projects for the development and implementation of Community objectives relating to the broad-based, harmonised, comprehensive and long-term monitoring of forests and environmental interactions.

A maximum 2 % of the Community contribution to a Member State's national annual work programme for the related year may be used to cofinance the staff costs of this Member State's national agency(ies).

The projects and measures financed or co-financed both at national and Community level may be implemented through grants or procurement procedures and may consist of:

- studies, surveys, modelling and scenario building,
- monitoring, including the monitoring of forests,
- capacity building assistance,
- training, workshops and meetings, including the training of agents participating in forest fire prevention initiatives,
- networking and best practice platforms,
- information and communication actions, including awareness raising campaigns and, in particular, public awareness campaigns on forest fires,
- demonstration of innovative policy approaches, technologies, methods and instruments,
- specifically for the nature and biodiversity component: site and species management and site planning, including the improvement of the ecological coherence of the Natura 2000 network, the monitoring of conservation status, including — but not limited to — setting up procedures and structures for such monitoring, the development and implementation of species and habitats conservation action plans, the extension of the Natura 2000 network in marine areas and, in limited cases, the purchase of land.

In addition to the categories above, projects and measures supported at Community level may consist of:

- support to certain operational activities of non-governmental organisations that are primarily active in protecting and enhancing the environment at European level,
- developing and maintaining networks and information and computerised systems directly linked to the implementation of Community environmental policy and legislation. The expenditure covered will include costs of development, maintenance, operations and support (hardware, software and services) of information and communication systems. It will also cover cost of project management, quality control, security, documentation and training linked to the implementation of these systems.

Remarks

This appropriation is intended to cover expenditure on measures and actions for monitoring the effects of atmospheric pollution on forests, monitoring and preventing forest fires and collecting information and data on forest ecosystems. Monitoring activities will address concerns relating to soil, biodiversity and forest sinks. These actions will involve grants and study and service contracts in addition to the financial contributions to the costs of programmes submitted by Member States and local authorities for activities to:

- continue and further develop the network of observation plots providing information on forest ecosystems,
- continue and further develop a forest fire information system,
- promote measures to prevent and combat forest fires, especially in regions classified as high-risk, as an extension of measures provided for under former Council Regulation (EEC) No 2158/92 of 23 July 1992 on protection of the Community's forests against fire (OJ L 217, 31.7.1992, p. 3),
- promote reforestation measures for areas destroyed by fire, especially in nature reserves and protected areas, respecting the relevant bioclimatic and environmental features and using species and varieties suited to local conditions,
- promote and further develop the monitoring scheme and the evaluation of information gathered and develop a platform for exchange of data with and between Member States and other interested stakeholders,
- support reforestation programmes in fire-affected regions,
- investigate the causes and consequences of fires, which have been particularly serious in recent years, in particular for the European forestry sector,
- promote appropriate measures to prevent forest fires, such as firebreaks, forest tracks, access points, water points and forest management programmes.

Meetings of Member States' experts may also be covered by this appropriation.

Remarks

New article

This appropriation is intended to cover expenditure actions in the field of civil protection. It aims at the enhancement of civil protection capabilities of Member States, EEA and candidate countries having signed a memorandum of understanding for dealing with disaster, and in particular:

- mobilisation of experts to reinforce and assist Member States or third countries facing natural disasters or technological accidents,
- transportation of European civil protection assistance in the event of disaster as well as associated logistical support
- the hiring of equipment and means necessary to ensure a rapid European response and which cannot be obtained from the Member States
- training courses (including general training courses in the context of the mechanism as well as training courses focusing on specific issues or for a specialised audience) to provide experts and team leaders with the knowledge and tools needed to participate effectively in Community interventions and to develop a common European intervention culture;
- command post exercises and full-scale exercises to test interoperability, train civil protection officials and create a common intervention culture;
- the exchange of experts to enhance understanding of European civil protection and to share information and experience;
- workshops to enhance information sharing and promote a common understanding of civil protection issues;

CHAPTER 07 04 — RAPID RESPONSE AND PREPAREDNESS INSTRUMENT FOR MAJOR EMERGENCIES (*cont'd*)**07 04 01** (*cont'd*)

- projects, studies, surveys, modelling, scenario-building and contingency planning, capacity building assistance; demonstration projects; technology transfer; awareness and dissemination actions; communication actions; provision of adequate means and equipment and monitoring assessment and evaluation.
- IT system facilitating the exchange of information with Member States during emergencies — CECIS (Common Emergency Communication and Information System) — to improve efficiency and to enable also the exchange of 'EU restricted' information. This will cover the costs of development, maintenance, operations and support (hardware, software and services) of information and communication systems. It will also cover cost of project management, quality control, security, documentation and training linked to the implementation of these systems.

The rapid response and preparedness instrument for major emergencies builds upon the existing instruments (the Community mechanism and the Community action programme) and aims at supporting and complement the efforts of Member States in the event of major disaster and building a more robust rapid reaction capability.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, the EFTA amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation according to Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

RESEARCH

Overall objectives

The Commission's policy initiatives to achieve the European Research Area are devised, developed and followed up within this policy area.

European research contributes to attaining the objectives of the other Community policies and, in return, promotes the incorporation of research policy needs in these policies.

Community actions required to achieve the European Research Area are devised and implemented within this policy area, in particular the research and technological development framework programmes.

This domain contributes to implementing the Lisbon strategy for employment, international competitiveness, economic reform and social cohesion in the European Union, in particular in connection with the establishment of an area of education, training, research and innovation.

Remarks

These remarks apply to all the budget headings in this title (with the exception of Chapter 08 22).

These appropriations will be used in accordance with Regulation (EC) No 1906/2006 of the European Parliament and of the Council of 18 December 2006 laying down the rules for the participation of undertakings, research centres and universities in actions under the Seventh Framework Programme and for the dissemination of research results (2007 to 2013) (OJ L 391, 30.12.2006, p. 1) and Council Regulation (Euratom) No 1908/2006 of 19 December 2006 laying down the rules for the participation of undertakings, research centres and universities in action under the Seventh Framework Programme of the European Atomic Energy Community and for the dissemination of research results (2007 to 2011) (OJ L 400, 30.12.2006, p. 1).

For all appropriations under this title the same definition of small- and medium-sized enterprises (SMEs) as is used for the horizontal SME-specific programmes within the same framework programme will be applicable. That definition reads as follows: 'An eligible SME is a legal entity that complies with the SME definition set out in Commission Recommendation 2003/361/EC and is not a research centre, research institute, contract research organisation or consultancy firm'. All research activities conducted pursuant to the seventh framework programme will be carried out in compliance with fundamental ethical principles (in accordance with Article 6(1) of Decision No 1982/2006/EC of the European Parliament and of the Council of 18 December 2006 concerning the Seventh Framework Programme of the European Community for research, technological development and demonstration activities (2007 to 2013) (OJ L 412, 30.12.2006, p. 1)), including animal welfare requirements. This will include, in particular, the principles laid down in Article 6 of the Treaty on European Union and in the Charter of Fundamental Rights of the European Union. Particular account will be taken of the need to step up efforts to enhance the participation and role of women in science and research.

Also entered against these articles and items are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Community to investigate new areas of research suitable for Community action, *inter alia*, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

These appropriations also cover administrative expenditure, including expenditure on staff, whether covered by the Staff Regulations or not, information, publications, administrative and technical operation, and certain other expenditure items relating to internal infrastructure linked with the achievement of the objective of the measure of which they form an integral part, including the action and initiatives necessary for preparation and monitoring of the Community's RTD strategy.

The participation of third countries or organisations from third countries in European cooperation in the field of scientific and technical research is possible in the case of some of these projects. Any financial contribution will be entered in Items 6 0 1 3 and 6 0 1 6 of the statement of revenue and may lead to additional appropriations being made available in accordance with Article 18 of the Financial Regulation.

Any revenue from third parties sharing the cost of projects with the Community (firms in European Free Trade Association Member States, industrial consortia, etc.) entered in Article 6 0 1 5 of the statement of revenue may give rise to additional appropriations being made available in accordance with Article 18 of the Financial Regulation.

Any revenue from the contribution from candidate countries for participation in Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may lead to additional appropriations being made available in accordance with Article 18(1)(d) of the Financial Regulation.

Any revenue from the contribution from outside bodies for participation in Community programmes, entered in Item 6 0 3 3 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 18(1)(d) of the Financial Regulation.

Additional appropriations will be made available under Article 08 21 04.

In order to be able to meet the goal of 15 % SME participation in the projects financed by these appropriations, as laid down in the regulation, more specific action is needed. Qualifying projects under the SME Specific Programmes should be made eligible for funding under the thematic programme when they fulfil the necessary (thematic) requirements.

Remarks

New item

Fusion offers the prospect of an almost limitless supply of clean energy, with ITER being the crucial next step in the progress towards this ultimate goal. To this end, the European Organisation for ITER and the Development of Fusion Energy, in the form of a Joint Undertaking will be established. This European Joint Undertaking for ITER and the Development of Fusion Energy (Fusion for Energy) will have the following tasks:

- to provide the contribution of Euratom to the ITER International Fusion Energy Organisation,
- to provide the contribution of Euratom to broader approach activities with Japan for the rapid realisation of fusion energy,
- to implement a programme of activities in preparation for the construction of a demonstration fusion reactor and related facilities including the International Fusion Materials Irradiation Facility (IFMIF).

*Remarks**New Article*

The actions carried out in the area of health are intended to improve the health of the European public and boost the competitiveness of industries and companies linked to the health sector in Europe, while at the same time addressing world health problems, including new epidemics. The emphasis will be on translational research (transposing basic findings into clinical applications), developing and validating new treatments, identifying ways of promoting health and preventing illness, diagnostic tools and technologies for making diagnoses, as well as sustainable and effective healthcare systems. Special attention will be given to communicating research findings and to the initiation of a dialogue with civil society, in particular patient groups, at as early a stage as possible in new developments produced by biomedical and genetics research.

Funding may be given to clinical research on many diseases (e.g. cancer, cardiovascular diseases, auto-immunity and infectious diseases, allergic diseases, epilepsy, trauma, rheumatic diseases, respiratory system diseases and mental and neurological diseases, in particular those linked with ageing, such as osteoporosis and Alzheimer's and Parkinson's diseases).

To the appropriations entered in this item must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Remarks*New article*

The actions carried out in this area are intended to help establish the integrated scientific and technological bases needed to develop a European 'Knowledge-based bioeconomy' by bringing together science, industry and other stakeholders. Three pillars support this approach: (1) Sustainable production and management of biological resources from land, forest, and aquatic environments; (2) Fork to farm: food, health and well being, and (3) Life sciences and biotechnology for sustainable non-food products and processes. This way new and emerging research opportunities can be exploited that address social and economic challenges, such as the growing demand for environmentally friendly systems of production and distribution of safer, healthier and higher quality food in line with consumer requirements and control of food-related risks, relying in particular on biotechnology tools, as well as health risks associated with environmental changes.

This appropriation is also intended to fund the development and improvement of analysis methods (e.g. residue analysis in food and feedingstuffs).

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Remarks

New article

Environmental research within the seventh framework programme will be implemented through the Environment (including Climate Change) theme. The objective is to promote sustainable management of the natural and human environment and its resources by advancing our knowledge of the interactions between the biosphere, ecosystems and human activities, and developing new technologies, tools and services, in order to address in an integrated way global environmental issues. Emphasis will be put on prediction of climate, ecological, earth and ocean systems changes, on tools and technologies, for monitoring, prevention and mitigation of environmental pressures and risks including on human health and for the sustainability of the natural and man-made environment.

Research on this theme will contribute to the implementation of international commitments and initiatives such as Global Earth Observation (GEO). In addition, it will support the research needs arising from the existing and emerging EU legislation and policies, associated thematic strategies and the action plans on environmental technologies and on environment and health. Research will also contribute technological developments that will improve the market positioning of European enterprises, in particular of SMEs, in areas such as environmental technologies.

Remarks

New article

For the seventh framework programme (FP7) for the period 2007 to 2013, an integrated approach has been proposed which links all transport modes (aeronautics, road, rail, waterborne), addresses the socio-economic and technological dimensions of research and knowledge development, and encapsulates both innovation and the policy framework. It is in line with the White Paper on transport and the updated versions of the strategic research agendas of the four technology platforms in the field of transport. Based on technological advances, the general objective is to develop integrated, 'greener', 'smarter' and safer pan-European transport systems for the benefit of the citizen and society, respecting the environment and natural resources; and securing and further developing the competitiveness and the leading role attained by the European industries in the global market.

The objective of RSFF is to foster private investment in research by improving access to debt financing for participants in large European research projects. RSFF will enable the European Investment Bank to expand, directly and indirectly (via its network of intermediary banks), its portfolio of loans to participants in such projects.

RSFF will contribute to the implementation of the Lisbon strategy, in particular to the achievement of the 3 % investment in research objective, by helping overcome market deficiencies, increasing the total amount of funds available for research and diversifying its sources.

Remarks

New article

Europe needs to become more attractive to researchers, in order to increase Europe's capacity and performance in research and technological development and to consolidate and further develop the European Research Area. Against the background of growing competition at world level, the development of an open and competitive European labour market for researchers with diversified, attractive career prospects is needed.

The value added of the support provided in the People programme is the promotion of mobility, both trans-national and inter-sectoral, the structuring effect throughout the EU on the organisation, performance and quality of research training, on the active career development of researchers, and on knowledge sharing through researchers between sectors and research organisations, and on a strong participation of women.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. The objective of RSFF is to foster private investment in research by improving access to debt financing for participants in European research infrastructures. RSFF will enable the European Investment Bank to expand, directly and indirectly (via its network of intermediary banks), its portfolio of loans to participants in such infrastructures.

RSFF will contribute to the implementation of the Lisbon strategy, in particular to the achievement of the 3 % investment in research objective, by helping overcome market deficiencies, increasing the total amount of funds available for research and diversifying its sources.

Remarks

New article

Fusion offers the prospect of an almost limitless supply of clean energy, with ITER being the crucial next step in the progress towards this ultimate goal. The realisation of the ITER project therefore lies at the heart of the present EU strategy. It must be accompanied by a strong and focused European R & D programme to prepare for the exploitation of ITER and to develop the technologies and knowledge base that will be needed during ITER operation and beyond.

Fusion offers the prospect of an almost limitless supply of clean energy, with ITER being the crucial next step in the progress towards this ultimate goal. To this end, the European Organisation for ITER and the Development of Fusion Energy, in the form of a Joint Undertaking will be established. This European Joint Undertaking for ITER and the Development of Fusion Energy (Fusion for Energy) will have the following tasks:

- a) to provide the contribution of Euratom to the ITER International Fusion Energy Organisation,
- b) to provide the contribution of Euratom to broader approach activities with Japan for the rapid realisation of fusion energy,
- c) to implement a programme of activities in preparation for the construction of a demonstration fusion reactor and related facilities including the International Fusion Materials Irradiation Facility (IFMIF).

*Remarks**Former Article 09 03 03*

This action is geared, in a balanced manner, to the implementation of operational and technical measures designed to promote safer use of the Internet and new online technologies, particularly for children, and to fight against illegal content and content unwanted by the end-user. In line with this, the programme will focus on the end-user, particularly parents, educators and children.

The specific objectives are:

- fighting against illegal content by allowing users to report illegal content, with a network of hotlines,
- tackling unwanted and harmful content: benchmarking of filtering software, coordination of exchanges of information and best practices on effective enforcement against spam, development of effective filtering technology; adaptation of existing content rating systems to take account of convergence,

COMMISSION
TITLE 09 — INFORMATION SOCIETY AND MEDIACHAPTER 09 02 — I2010 — ELECTRONIC COMMUNICATIONS POLICY AND NETWORK SECURITY (*cont'd*)09 02 02 (*cont'd*)

- promoting a safer environment by supporting a self-regulatory approach (design and implementation of European codes of conduct for industry) and ensuring cooperation at Community level,
- increasing awareness about safer use of the Internet, by supporting a European network of awareness activities.

Content providers, Internet service providers and mobile network operators, regulators, standards bodies, industry self-regulatory bodies, national, regional and local authorities responsible for industry, education, consumer protection, families, children's rights and child welfare and non-governmental organisations active in consumer protection, families, children's rights and child welfare will all be called on to contribute to putting this programme into action.

These measures will be implemented by means of the following shared-cost action:

- pilot projects and best practice actions; ad hoc projects in areas relevant to the programme, including projects demonstrating best practice or involving innovative uses of existing technology,
- networks bringing together a variety of stakeholders to ensure action throughout the European Union and to facilitate coordination activities and transfer of knowledge. They may be linked to best-practice actions,
- applied Europe-wide research carried out on a comparable basis into the way people, especially children, use new media.

Accompanying measures will contribute to the implementation of the programme or the preparation of future activities. They will include:

- benchmarking and opinion surveys to produce reliable data on safer use of the Internet and new online technologies for all Member States collected through a comparable methodology,
- technical assessment of technologies such as filtering designed to promote safer use of Internet and new online technologies,
- studies in support of the programme and its actions, including self-regulation and the work of the Safer Internet Forum, and the preparation of future activities,
- prize competitions for best practice; exchange of information, conferences, seminars, workshops or other meetings and the management of clustered activities plus dissemination, information and communication activities.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation according to Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Any revenue from the contribution from candidate countries for participation in the Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 18(1)(d) of the Financial Regulation.

*Remarks**New article*

The ICT PSP is one for the three specific programmes of the Competitiveness and innovation framework programme (CIP). It corresponds to a new legal instrument in the context of the 2007 to 2013 Financial Framework.

Actions will be reinforced at the EU level for stimulating a wider uptake of ICTs. Synergistic actions at EU level aim to reduce uncertainties and risks of duplication by sharing and replicating experiences and lessons learned and foster the internal market dimension of services triggered by ICTs promoting interoperability and fighting against fragmentation. They aim also to stimulate the regulatory and technological environments necessary to promote innovation and to overcome potential barriers (e.g. cultural, linguistic, technical and legal).

The ICT Policy Support programme shall provide for the following actions:

- (a) development of the single European information space and strengthening of the internal market for ICT products and services,
- (b) stimulation of innovation through a wider adoption of and investment in ICTs,
- (c) development of an inclusive information society and more efficient and effective services in areas of public interest, and improvement of the quality of life.

This will be done in particular by supporting the development and use of digital content ⁽¹⁾ and the development of ICT based services in areas of public interest including in the areas of eHealth, eGovernment, eInclusion, education and learning and environment. The ICT in the CIP will ensure also that European businesses and in particular SMEs can benefit from the new opportunities brought by the increasing demand for these ICT based services.

⁽¹⁾ During a transition phase for 2007 and 2008, this will be done under the eContentplus programme which will continue to have its own legal base.

The main part of the support will go to a limited number of high-impact pilot projects per year. Accompanying measures, such as best practice actions to spread knowledge and thematic networks bringing together a variety of stakeholders around specific objectives, will be also launched. They will be complemented by the monitoring of the European information society, by measures providing the background knowledge that is needed for policy decision-making, and by actions for promoting and raising awareness of the benefits brought by ICT to citizens, businesses (in particular SMEs) or public organisations.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation according to Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Any revenue from the contribution from candidate countries for participation in the Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 18(1)(d) of the Financial Regulation.

Any revenue from contributions from third parties entered in Item 6 0 3 3 of the statement of revenue will give rise to the provision of additional appropriations to be entered in this Item, in accordance with Article 18(1)(d) of the Financial Regulation.

Remarks

The overall objective of this programme is to make digital content in Europe more accessible, usable and exploitable in areas of public interest — such as public sector information, education and culture — facilitating the creation and diffusion of information and knowledge at the Union level. The programme will support the development of multilingual content for innovative, online services across the EU. Such content should help to drive demand for broadband access and bring wider benefits for businesses, citizens and the economy. The programme seeks to support the combination of information from different systems — irrespective of format, language or location — and to ensure that content works on different platforms, and is better tailored to the specific needs of the user.

The operational focus will be on:

- facilitating access to, use and exploitation of digital content,
- improving quality and facilitating best practice for digital content,
- reinforcing cooperation and awareness.

The measures described above will be the subject of shared-cost actions covering: projects designed to augment knowledge to improve existing products, processes and/or services and/or to meet the needs of Community policies; best practice actions to spread knowledge and thematic networks bringing together a variety of stakeholders around a given technological and organisational objective. There will also be parts that are fully financed by the Community, such as the accompanying measures that will contribute to the implementation of the programme or the preparation of future activities (studies in support of the programme; exchange of information, conferences, seminars, workshops or other meetings and the management of clustered activities; dissemination, information and communication activities, evaluation and monitoring of the measure and projects).

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. Remarks

New article

The objective of the Information and Communication Technologies (ICTs) theme of the cooperation programme is to enable Europe to master and shape the future developments of ICTs so that the demands of its society and economy are met.

Activities will strengthen Europe's scientific and technology base in ICTs, help drive and stimulate innovation through ICT use and ensure that ICT progress is rapidly transformed into benefits for Europe's citizens, businesses, industry and governments.

The ICT theme prioritises strategic research around key technology pillars, ensures end-to-end integration of technologies and provides the knowledge and the means to develop a wide range of innovative ICT applications.

The activities will leverage industrial and technological advances in the ICT sector and improve the competitive edge of important ICT-intensive sectors — both through innovative high-value ICT-based products and services and from improvements of organisational processes in businesses and administrations alike. The theme will also support other policies of the European Union, by mobilising ICTs to meet public and societal demands.

Activities will cover collaboration and networking actions, support to joint technology initiatives and national programme coordination initiatives. The work programmes will specify the funding schemes (collaborative projects, networks of excellence, coordination and support actions, etc.) to be used for the topics on which proposals are invited, based on the different forms of Community grants (reimbursement of eligible costs, lump sum financing, flat rates).

New article

Investing in knowledge is the best way for Europe to foster sustainable growth in a globalised economy. Many EU programmes will contribute to leveraging knowledge for growth but the research programme is the corner stone of its knowledge policy. In particular, the specific 'Capacities' programme aims at enhancing research and innovation capacity throughout Europe to allow for the emergence, reinforcement of and access to multidisciplinary European poles of excellence.

Research infrastructures play a key role in the creation of knowledge, its diffusion, application and exploitation, thus fostering innovation. To this end, the Research infrastructures activity develops and fully exploits the EU's research capacities through large-scale infrastructures, building on past successes in realising a European Research Area.

Activities covered under this article address more specifically the deployment of ICT based infrastructures, or e-Infrastructures. The e-Infrastructures provide services to the research communities by bringing the power of distributed ICT based resources (computing, connectivity, storage, data and instrumentation) to virtual communities. The reinforcement of a European approach in this domain establishes synergies between national infrastructures and initiatives, ensures that critical masses are reached, rationalises new investments, and strives for world leadership. This can make a significant contribution to boosting the European research potential and its exploitation, and consolidating e-Infrastructures as a cornerstone of the European Research Area, a 'forerunner' of cross-discipline innovation and a driver in changing the way science is conducted.

Also entered in this article are the costs of high-level scientific and technological meetings, conferences, workshops and seminars of European interest organised by the Commission, the costs of studies, grants, monitoring and evaluation of the specific programmes and of the framework programmes, the funding of high-level scientific and technological analyses and evaluations carried out on behalf of the Community to investigate new areas of research suitable for Community action, *inter alia*, in the context of the European Research Area, and measures to monitor and disseminate the results of the programmes, including measures under previous framework programmes.

Remarks

The current programme covers the 2004 to 2006 period but a one-year extension is under consideration.

The Commission is currently trying to set up a 'joint undertaking' for the operation of the HFR. The proposal should be submitted to the Legislative authority around mid-2006. If it is approved, the joint undertaking could start as from 1 January 2007. Should delays occur, the extension of the current supplementary programme would be formulated for one more year and would require the support of this budgetary line.

CHAPTER 10 04 — COMPLETION OF PREVIOUS FRAMEWORK PROGRAMMES AND OTHER ACTIVITIES (*cont'd*)10 04 04 (*cont'd*)10 04 04 02 (*cont'd*)

The main objectives of the programme are as follows:

- to ensure over 250 days operation of the HFR per annum in order to guarantee the availability of neutrons for experimental purposes,
- to ensure the rational use of this reactor according to the needs of research institutes requesting the assistance of the HFR in areas such as:
 - improving the safety of existing nuclear reactors,
 - health, and in particular the development of medical isotopes for medical research and the testing of therapeutic techniques,
 - fusion,
 - basic research and training,
 - waste management, and in particular the possibility of developing nuclear fuels for the elimination of weapons-grade plutonium.

In accordance with Article 18 of the Financial Regulation, this item will, in the course of the financial year, be provided with additional appropriations within the limits of the revenue from, notably, the two Member States concerned (currently the Netherlands and France) to be entered in Item 6 2 2 1 of the statement of revenue.

Overall objectives

This policy area includes all the activities covered by the common fisheries policy (CFP) which comes under the exclusive competence of the Community. It concerns all fisheries activities as well as the processing and marketing of these products.

It also ensures that the relevant provisions of Community law are rightly applied in the fisheries sector.

The policy area covers five operational activities: specific measures in support of the CFP and maritime affairs (including conservation of fisheries resources, control and dialogue with the fisheries sector), relations and agreements with third countries and international organisations, common organisation of the fisheries market, fisheries research and structural measures for fisheries through the European Fisheries Fund (EFF).

Sixty per cent of appropriations is devoted to the EFF. However, the EFF operations are mainly implemented by the Member States as a part of shared management.

Remarks

This appropriation is intended to finance the following under the action plan for closer dialogue with the fishing industry and those affected by the common fisheries policy (CFP) and maritime affairs:

- grants to Regional Advisory Councils (RACs) to cover operational costs as well as interpretation and translation costs of RACs meetings,
- grants to European trade bodies for the organisation of internal coordination meetings in preparation for meetings of the Advisory Committee on Fisheries (ACFA), including the participation of ACFA representatives in the meetings of the RACs in order to ensure coordination of the work of the RACs with that of the ACFA,
- the implementation of measures to provide documentation about and explain the common fisheries policy aimed at the fishing industry and those affected by the common fisheries policy, as well as maritime affairs.

The Commission will continue supporting the functioning of the RACs with a financial contribution and by participating in meetings, preparing relevant documents and ensuring that all RAC opinions are included when drafting new legislation. If the Commission does not include the RAC opinion or only parts of the opinion, the Commission should state why and where it deviates from the RAC opinion. The involvement of people working in fisheries and other interest groups in the CFP process will be strengthened, so that greater account of specific regional characteristics is taken.

Part of the appropriation is earmarked also for information and communication activities linked to the common fisheries policy and maritime affairs as well as for communication activities addressed to the interested parties. Efforts will continue to inform the stakeholders and the specialised media in the new Member States as well as in the countries joining the EU in the forthcoming enlargement about the common fisheries policy.

Any revenue may result in the opening of additional appropriations in accordance with Article 18 of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1), as amended by Regulation (EC, Euratom) No 1995/2006 (OJ L 390, 30.12.2006, p. 1).

Remarks

This appropriation is intended to cover expenditure relating to the implementation of the action programme for Community customs, and in particular the financing of measures for monitoring licence management systems, working parties, pilot projects or schemes and seminars with officials from Member States' administrations and from non-member countries associated with customs policy and representatives of outside bodies, as well as the coordinated development of the use of computerised customs procedures, taking account of the current state of computerisation of national administrations and the interests of economic operators in the European Union, and of developments in the international environment in this area.

This support will take the form of the financing of expenditure on studies, the development, implementation and operation of common systems and the definition of common guidelines for training and technical assistance for implementation. The operating expenditure also covers financial contributions to the functioning of systems, in particular decentralised data input; the financing of information and training measures for system users; the acquisition and maintenance of shared equipment; the financing of technical assistance.

This appropriation is also intended to cover expenditure incurred by the implementation of the activities, particularly exchanges of officials and the organisation of joint training courses, provided for in the abovementioned Decisions for Community customs and indirect-taxation officials responsible for applying Community law in connection with the internal market and at the external borders of the Community.

These exchanges may also involve certain non-member countries if it is thought that this will be useful for achieving the objectives of the programme.

This appropriation also covers the financing of customs-related analyses and strategic studies, the development of harmonised working methods and measures to provide Member States with assistance and technical support.

Particular attention needs to be given to programmes for training and exchange of information to improve knowledge and control of the illegal trade in animal and plant species in the context of implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora.

This appropriation may also cover the involvement of non-member countries where cooperation with these countries, and particularly the adoption of common procedures, will facilitate trade and improve fraud prevention, and consequently make for more efficient administration of the internal market.

Remarks

The European Parliament resolution on the Commission's Annual Policy Strategy (APS) (recital G) argued that the 2007 budget should help 'to make entrepreneurs and businesses better able to succeed in global competition, notably through increased efforts in the field of research and development'. Innovation and research are key priorities for Parliament in the 2007 budget. Paragraph 28 of the APS resolution 'recalls the importance of strengthening the capacities of the knowledge triangle'. This pilot project is intended to boost technology transfer from research to business. The European Association of National Research Facilities Laboratories (ERF) provides an example of effective cooperation already under way in this area.

Remarks

This appropriation is intended to cover the completion of measures supported as special annual events.

EUR 400 000 is earmarked for the Jaca 2007 European Youth Olympic Festival, a week-long winter sports competition in which more than 1 350 top winter sports competitors between the ages of 15 and 18 from 44 European countries will be taking part. Remarks

These appropriations are intended to fund general information operations concerning the European Union, for the purpose of making the work of the Community institutions more visible, the decisions taken and the stages in the building of Europe. They concern essentially the funding or co-funding of the production and/or dissemination of multimedia information products.

The Commission has adopted communications to the European Parliament, the Council, the Economic and Social Committee and the Committee of the Regions on a new framework for cooperation in activities concerning the information and communication policy of the European Union (COM(2001) 354 final, COM(2002) 350 final and COM(2004) 196 final). These communications propose a framework for cooperation between the institutions and with the Member States and/or civil society for the development of a communication and information strategy for the European Union. In 2006, using in particular the Europa website, the Commission also published a White Paper on a European communication policy (COM(2006) 35 final) with the aim of bringing the Union closer to its citizens, and after consultations this will be followed by operational proposals.

The Interinstitutional Group on Information (IGI), co-chaired by the European Parliament, the Council and the Commission, lays down common guidelines for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on European topics. Each year the IGI gives its opinion on the priorities for the following years based on a report drawn up by the Commission.

With regard to decentralised work, the Commission's representations and the European Parliament's external offices jointly devise and carry out information and communication activities relating to European Union policies, with the exception of issues concerning each institution's specific institutional role.

Former Article 16 03 01 (in part), Article 16 03 02 (in part) and Article 16 04 02 (in part)

This appropriation is intended to cover the European Union's expenditure on decentralised communication. The aim of local communication activities is in particular to provide target groups with the tools to gain a better understanding of burning topical issues.

The Commission has adopted communications to the European Parliament, the Council, the Economic and Social Committee and the Committee of the Regions on a new framework for cooperation in activities concerning the information and communication policy of the European Union (COM(2001) 354 final, COM(2002) 350 final and COM(2004) 196 final). These communications propose a framework for cooperation between the institutions and with the Member States and/or civil society for the development of a communication and information strategy for the European Union. In 2006, using in particular the Europa website, the Commission also published a White Paper on a European communication policy (COM(2006) 35 final, 1.2.2006) with the aim of bringing the Union closer to its citizens, and after consultations this will be followed by operational proposals.

The Interinstitutional Group on Information (IGI), co-chaired by the European Parliament, the Council and the Commission, lays down common guidelines for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on European topics. Each year the IGI gives its opinion on the priorities for the following years based on a report drawn up by the Commission.

- direct communication measures targeted at opinion multipliers (local press, radio and television, satellite channels, databases, etc.),
- opening information centres for the public.

The amount of assigned revenue in accordance with Article 18(1)(e) to (j) of the Financial Regulation is estimated at EUR 50 000.

TITLE 16 — COMMUNICATION

CHAPTER 16 03 — 'GOING LOCAL' COMMUNICATION *(cont'd)*

16 03 04 *(cont'd)*

They fit into the Action Plan adopted by the Commission (SEC(2005) 985, 20.7.2005) to improve its communication with citizens, in the context of the White Paper on a European communication policy (COM(2005) 35, 1.2.2006) that it drew up in cooperation with the other institutions.

The appropriation is intended primarily to cover informing citizens about the Union's present and future options and involving them in a debate on this subject.

It covers in particular activities such as:

- the 'Debate on the future of the European Union' launched in connection with the Intergovernmental Conference,
- the 'Plan-D for Democracy, Dialogue and Debate' (COM(2005) 494, 13.10.2005).

Implemented in close cooperation with the authorities in the Member States and/or civil society, these activities take account of specific national and regional features. This appropriation may also finance activities by political foundations, which provide a forum for debate and reinforce dialogue and political choice for citizens.

The European Fund for Journalism will support small teams of journalists doing research on a European issue in different European Member States for publication in those countries. The funding is granted on the basis of proposals sent in by journalists and evaluated by an anonymous panel according to predefined criteria.

The Interinstitutional Group on Information (IGI), co-chaired by the European Parliament, the Council and the Commission, lays down common guidelines for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on European topics. Each year the IGI gives its opinion on the priorities for the following years based on a report drawn up by the Commission.

The measures are carried out:

- by the Commission's Representations in the Member States,
- by the Commission's departments at its headquarters,
- with the involvement of local media (press, television and radio).

They concern the funding or co-funding of:

- communication operations linked to specific annual or multi-annual priority themes,
- ad hoc communication operations on a national or international scale that fit in with the communication priorities,
- communication operations organised in partnership with the Member States in order to create synergies between the means of action employed by the Member States and the Commission and coordinate their information and communication activities on the European Union, with the involvement of local media (press, television and radio).

Irrespective of the beneficiary, no administrative expenditure against this article is authorised.

The amount of assigned revenue in accordance with Article 18(1)(e) to (j) of the Financial Regulation is estimated at EUR 5 000.

Remarks

The objective of this pilot project is to create communities of European parliamentarians (including at national and regional level), journalists and other opinion-formers to share information and knowledge about the European Union. To the fullest extent possible the aim of the pilot project is to use the Internet and on-line tools to allow 'ideas networks' to form and to grow organically. The project will build upon ideas set out in the Commission's White Paper on a European Communication Policy (COM(2006) 35 final), but its focus will be on assisting the formation of organic ideas/information networks, rather than through more 'traditional' structures such as information points in European Commission buildings in the Member States.

Legal basis

Pilot project within the meaning of Article 49(6) of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1), as amended by Regulation (EC) No 1995/2006 (OJ L 390, 30.12.2006, p. 1).

Remarks

Former Article 16 03 01 (*in part*)

The appropriations in this budget line are intended to cover the analysis of trends in public opinion, mainly by means of opinion polls (e.g. general-public 'Eurobarometer' surveys, 'flash' surveys, by telephone, of specific populations on particular subjects, at regional or nation level, or qualitative surveys), together with quality control of these surveys.

The Commission has adopted communications to the European Parliament, the Council, the Economic and Social Committee and the Committee of the Regions on a new framework for cooperation in activities concerning the information and communication policy of the European Union (COM(2001) 354 final, COM(2002) 350 final and COM(2004) 196 final). These communications propose a framework for cooperation between the institutions and with the Member States and/or civil society for the development of a communication and information strategy for the European Union. In 2006, using in particular the Europa website, the Commission also published a White Paper on a European communication policy (COM(2006) 35 final, 1.2.2006) with the aim of bringing the Union closer to its citizens, and after consultations this will be followed by operational proposals.

The Interinstitutional Group on Information (IGI), co-chaired by the European Parliament, the Council and the Commission, lays down common guidelines for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on European topics. Each year the IGI gives its opinion on the priorities for the following years based on a report drawn up by the Commission.

With regard to decentralised activities, the Commission's Representations and the European Parliament's external offices jointly devise and carry out information and communication activities relating to European Union policies, with the exception of issues concerning each institution's specific institutional role.

On-line tools make it possible to gather citizens' questions or reactions on European issues. This is a public service task. The information covers all the Community institutions.

Remarks

These appropriations are intended to cover:

- the financing of information and documentation outlets throughout Europe (*Europe Direct* network); these outlets supplement the work of the Commission's Representations in the Member States,
- support — training, coordination and assistance — for information networks,
- the financing of storage and distribution of information material by these outlets,
- the financing of national information centres financed together with the Member States.

The Commission has adopted communications to the European Parliament, the Council, the Economic and Social Committee and the Committee of the Regions on a new framework for cooperation in activities concerning the information and communication policy of the European Union (COM(2001) 354 final, COM(2002) 350 final and COM(2004) 196 final). These communications propose a framework for cooperation between the institutions and with the Member States and/or civil society for the development of a communication and information strategy for the European Union. In 2006, using in particular the Europa website, the Commission also published a White Paper on a European communication policy (COM(2006) 35 final, 1.2.2006) with the aim of bringing the Union closer to its citizens, and after consultations this will be followed by operational proposals.

Irrespective of the beneficiary, no administrative expenditure against this article is authorised.

The amount of assigned revenue in accordance with Article 18(1)(e) to (j) of the Financial Regulation is estimated at EUR 40 000.

Decision No 20/2004/EC establishes a general framework for financing Community actions in support of consumer policy as defined in the multiannual strategy. The decision and the strategy entail three strategic objectives in the medium term:

- a high, harmonised level of consumer protection throughout the EU,
- effective implementation of consumer protection rules,
- involvement of consumer organisations in Community policies.

These three aims are supported by the legal basis mentioned below, applicable for 2004 to 2006. A new legal basis will enter into force in 2007 and will be covered by a new Article 17 02 02.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. Remarks

New article

A proposal on a new health and consumer protection strategy and programme 2007 to 2013 was adopted by the Commission on 6 April 2005, replacing the existing public health programme 2003 to 2008.

The Commission Communication proposes the following objectives common to health and consumer protection:

- to protect citizens from risks and threats which are beyond the control of individuals and that cannot be effectively tackled by individual Member States,
- to increase the ability of citizens to take better decisions about their health and consumer protection interests,
- to mainstream health and consumer protection policy objectives across all Community policies.

In addition, health and consumer policies have their own specific objectives and actions. For consumers' protection there are two specific objectives:

- Objective 1: to ensure a high level of consumer protection, notably through an improved evidence basis, better consultation and better representation of consumers' interests,
- Objective 2: to ensure effective application of consumer protection rules notably through enforcement cooperation, information, education and redress.

The draft consumer programme aims at consolidating and expanding the action areas of the 2002 to 2006 consumer programme. It expands considerably Community activities on developing the knowledge and evidence base, enforcement cooperation, market surveillance and product safety, consumer education and capacity building for consumer organisations.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Remarks

In 2007, this appropriation is intended to cover commitments made in previous years in the context of the programme of Community action in the field of public health (2003 to 2008).

The aim of this programme was to contribute to attaining a high level of health protection by directing action towards improving public health, preventing human illness and diseases, and obviating sources of danger to health.

Its three main priorities were:

- to improve information and knowledge for the development of public health and the strengthening and maintenance of effective health interventions and efficient health systems, by developing and operating a well-structured and comprehensive system for collecting, analysing, evaluating and imparting health information and knowledge to competent authorities, health professionals and the public, and by undertaking assessments of and reporting on the health situation and health-related policies, systems and measures,
- to enhance the ability to respond rapidly and in a coordinated way to threats to health by developing, strengthening and assisting the operation and interlinking of surveillance, early warning and rapid reaction mechanisms covering health hazards,
- to address health determinants through health promotion and disease-prevention measures, by supporting and developing broad health-promotion activities and disease-prevention actions and specific risk-reduction and elimination instruments.

A new legal basis will enter into force in 2007 and will be covered by a new Article 17 03 06.

Remarks

New article

A proposal on a new Health and consumer protection strategy and programme 2007 to 2013 was adopted by the Commission on 6 April 2005.

The Commission Communication proposes the following objectives common to health and consumer protection:

- to protect citizens from risks and threats which are beyond the control of individuals and that cannot be effectively tackled by individual Member States,
- to increase the ability of citizens to take better decisions about their health and consumer interests,
- to mainstream health and consumer policy objectives across all Community policies.

In addition, Health and consumer policies have their own specific objectives and actions.

Health objectives:

- to improve information on and knowledge of health: the objective is to strengthen the collection, analysis, exchange and dissemination of health-related information in Europe,
- to improve the capacity to react rapidly to health threats to protect citizens against health threats,
- to promote good health and prevent disease through action on health determinants to improve prosperity and solidarity.

For 2007 and as far as the health area is concerned, the programme 2007 to 2013 will focus on three pillars, where European level action is essential:

(1) Health information

The objective of this pillar is to strengthen the collection, analysis, exchange and dissemination of health-related information in Europe which is necessary to provide a solid foundation for health policy making and is also needed by professionals for their work and by citizens to enable them to make healthy lifestyle choices.

COMMISSION

TITLE 17 — HEALTH AND CONSUMER PROTECTION

CHAPTER 17 03 — PUBLIC HEALTH (*cont'd*)17 03 06 (*cont'd*)*(2) Health security*

The overall objective is to protect citizen against health threats.

An effective rapid response capability is needed to avoid threats to public health, for example arising from communicable diseases or chemical or biological attacks. Tackling such threats need to be coordinated effectively at EU level. The integration of the EU based on the principle of free movement increases the need for vigilance, to respond to major cross-border health threats such as avian flu, or bioterrorism.

(3) Promote health to improve prosperity and solidarity

The overall objective is to contribute to EU prosperity by fostering healthy ageing and bridging inequalities as well as to enhance solidarity between national health systems

Actions would include initiatives to increase healthy life years and promote healthy ageing; explore health's impact on productivity and labour participation; support the reduction of inequalities between Member States and investment in health, thus contributing to the Lisbon agenda, and to productivity and growth. Actions would also enhance solidarity between health systems, including cooperation on shared challenges, thus facilitating the development of a Community framework for safe, high-quality and efficient health services.

Actions would further include the promotion of health by tackling environmental, addiction and lifestyle determinants.

Non-governmental organisations are key players in the implementation of the programme. Therefore, they should be allocated adequate funds.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Any revenue from the contribution from candidate countries for participation in Community programmes, entered in Item 6 0 3 1 of the statement of revenue, may lead to additional appropriations being made available in accordance with Article 18(1)(d) of the Financial Regulation.

Legal basis

Decision No 1926/2006/EC of the European Parliament and of the Council of 18 December 2006 establishing a programme of Community action in the field of consumer policy (2007-2013) (OJ L 404, 30.12.2006, p. 39).

Amended proposal for a Decision of the European Parliament and of the Council, submitted by the Commission on 24 May 2006, establishing a second programme of Community action in the field of Health and consumer protection 2007 to 2013 (COM(2006) 234 final).

Remarks

Former Article 17 04 01

The Community's financial assistance helps accelerate the eradication or control of animal diseases by providing funds to supplement national financial resources and contributes to harmonise measures at Community level. A major part of these diseases or infections are zoonoses communicable to man (BSE, brucellosis, salmonellosis, tuberculosis, etc.). Moreover, the persistence of these diseases hampers a smooth operation of the internal markets. Fighting them helps to improve the level of public health and to boost food safety in the European Union.

In 2007, these credits will become dissociated credits.

Thus, it is important that the Community makes a financial contribution in order to allow the fastest eradication possible of any outbreak of a serious infectious disease in Member States deploying Community means to fight these diseases.

Remarks

The purpose of the action is to test hypotheses in the field of migration management. On the basis of its evaluation, it could lead to the development of a global approach, an objective set by the European Union. The action will be based on four related components.

Component 1: Extension for a third year (cf. the former preparatory action on return management in the area of migration, Article 18 03 08) of preparatory measures for:

- the implementation of integrated actions to return illegal residents to their country of origin, or countries of former residence and transit, as well as measures aimed at ensuring sustainability of these returns. The plans would include actions involving both voluntary and forced returns,
- encouraging the development of cooperation between Member States both in devising return plans and in implementing actions within these plans.

Component 2: Financial assistance for the employment of immigrants returning to their countries of origin with which there are admission agreements.

Component 3: Organising information campaigns, in countries of origin, for applicants for immigration into the European Union so as to inform them in particular about the dangers of illegal immigration.

Component 4: Reception in dignity and solidarity — Assistance to Member States in coping with reception of irregular migrants arriving by sea. Measures would:

- assist Member States affected by sudden arrivals of migrants, e.g. by improving and exchanging good/best practices and providing interpreters and medical and legal teams,

COMMISSION

TITLE 18 — AREA OF FREEDOM, SECURITY AND JUSTICE

CHAPTER 18 03 — MIGRATION FLOWS — COMMON IMMIGRATION AND ASYLUM POLICIES (*cont'd*)

18 03 12 (*cont'd*)

- assist Member States to enhance reception quality and capacity, including temporary capacity, reception of irregular migrants at arrival points, e.g. by providing first aid and transport to adequate reception centres and improving/increasing reception facilities and conditions at those facilities,
- assist Member States in pooling resources to address particular pressures on their asylum systems, in particular through activities where specific expertise is needed, sharing knowledge and promoting joint approaches to address mass arrivals of asylum seekers at the external border of the EU.

For component 4, recipients of funding should be national authorities. Projects may include partnerships with other Member State authorities, international organisations and NGOs.

For all components, part of the appropriations should be used by the Commission to help in the management of this action (external experts, studies, etc.).

Legal basis

Preparatory action within the meaning of Article 49(6) of the Financial Regulation.

Remarks

This appropriation is intended to cover the funding of priority information measures on Community policies.

It covers information in the field of justice and home affairs in relation to the establishment of an area of freedom, security and justice. This measure is designed to be an effective channel of communication and dialogue between the people of the European Union and the Community institutions and take account of specific national and regional characteristics, in close cooperation with the Member State authorities.

The Commission has adopted two communications to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions on a new framework for cooperation in activities concerning the information and communication policy of the European Union (COM(2001) 354 final and COM(2002) 350). These communications propose an interinstitutional framework for cooperation between the institutions and with the Member States for the development of a communication and information policy strategy for the European Union.

The Interinstitutional Group on Information (IGI), co-chaired by the European Parliament, the Council and the Commission, lays down common guidelines for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on European topics. Each year the IGI gives its opinion on the priorities for the following years on the basis of information provided by the Commission.

This appropriation is intended to cover the funding of an information campaign on the new transparency measures based on Article 255 of the EC Treaty and Regulation (EC) No 1049/2001 and of the creation of an interinstitutional server giving online access to the EU law-making process.

In this context, this appropriation is intended to cover also the development of the TRANS-JAI project (maintenance of the system developed up to the end of 2006, evolution, dissemination).

This appropriation is intended to bring in a specific and complementary way, technical and financial assistance for neighbouring countries, to support them in their efforts to ensure a better management of migratory flows in all aspects. The continuation of a programme 'migration & asylum' is envisaged within the framework of the thematic actions to be implemented from 2007 onwards on the basis of a new legislation for external actions.

Within the framework of the rationalisation and simplification of the instruments for external actions for the period of the financial framework 2007 to 2013, the Commission has proposed to replace the 'Aeneas' programme from 2007 onwards by a thematic cooperation programme with third countries in these fields.

Remarks

This appropriation is intended to bring in a specific and complementary way, technical and financial assistance for developing countries, to support them in their efforts to ensure a better management of migratory flows in all aspects. The continuation of a programme 'migration and asylum' is envisaged within the framework of the thematic actions to be implemented from 2007 onwards on the basis of a new legislation for external actions.

Within the framework of the rationalisation and simplification of the instruments for external actions for the period of the financial framework 2007 to 2013, the Commission has proposed to replace the 'Aeneas' programme from 2007 onwards by a thematic cooperation programme with third countries in these fields.

Remarks

Former Article 19 02 03

This appropriation follows on from the preparatory action for 2001 to 2003 and the Commission communication on integrating migration issues in the European Union's relations with third countries (COM(2002) 703), which have paved the way for a legal basis.

Priority will be given to comprehensive programmes that are consistent with Community efforts which contribute to addressing the root causes of migration.

The EU has approved a Community programme for the cooperation with non-EU countries and regions of origin and transit in the field of migration and asylum, which will provide a specific, additional response to the needs encountered by these countries in their efforts to better manage south-south migratory flows, and combat poverty, the root cause of migration, as well as mitigating the brain drain from south to north in the process, and to help them to improve their capacities to fulfil their international obligations in the field of asylum and migration; full attention will be given to the way individuals (migrants, refugees or readmitted persons) are treated, which will be subject to strict controls.

This Community cooperation programme will finance appropriate actions which will join in a coherent way national and regional Community cooperation and development strategies regarding the non-EU countries concerned and complete the actions — in particular in the fields of migration, asylum, border control, refugees and displaced people — provided for in the implementation of these strategies and financed from other Community instruments in the field of cooperation and development.

The respect of democratic principles and rule of law, as well as of human and minority rights and of fundamental freedoms, will constitute an essential element for the application of this instrument. If necessary, and as far as possible, the actions financed will be associated with measures aiming to strengthen democracy and the rule of law and the compliance with international instruments in this field, including the Geneva Convention on Refugees.

Partners eligible for financial support under this appropriation may include regional and international organisations and agencies (in particular, UN agencies), non-governmental organisations (NGOs) or other non-State actors, federal, national, provincial and local governments of third countries, their departments and agencies, institutes, associations and public and private operators. As regards cooperation with the authorities of the States involved, all necessary steps will be taken to ensure that the monies allocated are not used for purposes other than those for which they are intended.

Remarks

The Council Presidency must ensure that the European Parliament is closely involved in all stages of the decision-making process. The joint consultation meetings provided for under point 43 of the Interinstitutional Agreement of 17 May 2006 between the European Parliament, the Council and the Commission on budgetary discipline and sound financial management (OJ C 139, 14.6.2006, p. 1) will provide an opportunity to establish a continuous dialogue between the two institutions on the main choices for and aspects of the Union's Common Foreign and Security Policy.

The regular joint consultation meetings should provide an opportunity for a real political dialogue, instead of which they are considered merely an obligation to inform Parliament after the event.

Remarks

For conflict prevention and crisis management activities, by their nature, a capacity to react to relatively unforeseeable external developments is required. In view of the diversity and scale of these activities, a substantial capacity to respond to situations where conflict or crisis is imminent is required under the CFSP. ESDP crisis management operations in the area of monitoring fall under this article. As with all actions financed under this budget chapter, monitoring and verification actions in crisis situations or in support of peace processes must be civilian in nature.

Remarks

This appropriation is intended to finance measures which contribute to the non-proliferation of weapons of mass destruction (nuclear, chemical and biological), primarily in the framework of the strategy against the proliferation of Weapons of Mass Destruction of December 2003. This includes support for actions implemented by international organisations in this field. It is also intended to finance operations to combat the destabilising accumulation and trafficking of small arms and light weapons (SALW). New SALW actions are foreseen in new geographic areas, in particular in Eastern Europe.

Remarks

This appropriation is for funding preparatory measures to establish the conditions for EU actions in the field of the CFSP and the adoption of the necessary legal instruments. It may cover evaluation and analysis measures (*ex ante* evaluation of means, specific studies, organisation of meetings, fact-finding on the ground). In the field of EU crisis management operations and for EU Special Representatives, in particular, preparatory measures may, *inter alia*, serve to fund exploratory work to assess the operational requirements for an envisaged action, to provide for a rapid initial deployment of personnel and resources (e.g. mission expenses, purchase of equipment, pre-financing of running and insurance costs in the start-up phase), or to take the necessary measures on the ground to prepare for the launching of the operation.

It also covers follow-up measures and audits of common foreign and security policy measures and the financing of any expenditure on the regularisation of previously closed measures.

This appropriation is also intended to cover expenditure on studies, meetings of experts, information and publications directly linked to the achievement of the objective of the measures coming under Articles 19 03 01, 19 03 02, 19 03 03, 19 03 06 and 19 03 07.

Remarks

Former Item 19 05 02

United States of America

The planned activities will contribute to implement the new transatlantic agenda (NTA), signed in December 1995 which provides the framework for EU relations with the United States of America. The NTA is complemented by a joint action plan under which the EU and the United States of America have committed themselves to achieving a wide range of objectives concerning bilateral relations and cooperative actions towards non-member countries, in multilateral forums and on global challenges. Activities will focus on Public diplomacy and Outreach, to raise awareness and increase the visibility of the EU in the United States of America by encouraging policy research and debate on EU/US relations, as well as actions to promote and invigorate the political and economic dialogue with the US in areas of current interest such as democracy promotion, energy security.

Canada

The wide agenda of EU-Canada cooperation is reflected in the diversity of activities, which fit into the overall programme for cooperation set up by the joint political declaration on EU-Canada relations and the EU-Canada Partnership Agenda. The Commission will pursue the activities intended to enhance cooperation and to develop economic relations. Efforts to raise awareness about the EU in Canada and the benefits of EU-Canada relations will be continued, through targeted Public diplomacy and Outreach initiatives.

Japan

The planned activities are intended to improve market access of EU goods and cross-border services to Japan through:

- measures aimed at improving knowledge of the Japanese market; the executive training programme (ETP), designed to build up a pool of European executives able to communicate and operate in Japan's business environment, will be continued,
- measures aimed at improving the commercial presence of EU industry in Japan;
- other measures facilitating access to the Japanese market (business linkages, partnership programmes, competitiveness initiatives).

Continuing efforts will have to be made in view of converting the EU-Japan action plan adopted at the summit of December 2001 into concrete action (e.g. conferences, seminars, development of Europe centres in Japan, People-to-people links, education cooperation, etc.).

Any revenue from financial participation by outside parties in promotional activities, notably the ETP programme, may lead to additional appropriations being made available in accordance with Article 18 of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1), as amended by Regulation (EC, Euratom) No 1995/2006 (OJ L 390, 30.12.2006, p. 1).

South Korea

The main activities will be the continuation of the executive training programme (ETP), intended to build up a pool of European executives able to communicate and operate in the Korean business environment and other measures to promote economic partnerships and business collaboration.

Australia and New Zealand

The Commission will consider activities in line with the objectives laid down in particular by the Joint Declaration of June 1997, revised in 2003. As regards New Zealand, possible projects envisaged will be intended to reinforce cooperation in areas referred to in the Joint Declaration of May 1999, revised in 2004, in order to meet the common objectives on economic cooperation, political and security cooperation and various other areas of cooperation.

The focus will be on initiatives aimed at (i) reinforcing people-to-people links and education cooperation between the EU and AUS/NZ; (ii) at fostering a better understanding of the EU, its initiatives, its policies in AUS/NZ in particular through curriculum development, research and outreach activities and public diplomacy initiatives; (iii) other activities in pursuit of the objectives set out in the joint political declarations.

Newly industrialised Asian Countries and Territories (Brunei, Chinese Taipei, Hong Kong, Macao and Singapore) and GCC countries (Kuwait, Qatar, UAE, Bahrain and Saudi Arabia)

The planned initiatives are intended to foster a better understanding of the EU, its initiatives and its policies through public diplomacy and outreach activities; the promotion of economic partnerships and business collaboration; people-to-people links and education cooperation.

This pilot project is intended to foster common transatlantic approaches to key international policy challenges, e.g. environmental issues, such as climate change, and financial assistance coordination in countries such as Afghanistan or Kosovo. Measures under this pilot project will aim at improving the efficacy of actions by the international community and be complementary to existing mechanisms. The pilot project will be used to fund innovative ventures between European and US policymakers that are beyond the scope of the current tools available under existing legal instruments. In implementing this action the Commission will ensure a balanced distribution of subsidies.

*Remarks**Former Article 19 02 05*

The quick-release of financing through the Stability instrument is designed to address situations of urgency, crisis or emerging crisis, a situation posing a threat to democracy, law and order, to the protection of human rights and fundamental freedoms, to the security and safety of individuals, situations threatening to escalate into armed conflict or to destabilise the country concerned and where such situations are likely to jeopardise the beneficial effects of assistance and cooperation policies and programmes, their effectiveness and/or conditions for their proper implementation.

This appropriation is intended to cover an integrated programme of response measures designed to re-establish the minimum conditions necessary for the conduct of assistance under the Community's long term assistance instruments. Such programmes will ensure a smooth link between relief, rehabilitation and development. They shall also provide complementary measures falling under Community competence relating to measures adopted under the CFSP, as part of a comprehensive EU approach to crisis.

Operations covered will include:

- A. technical and logistical support for the efforts of international and regional organisations, state and non-state actors in promoting confidence-building, mediation, dialogue and reconciliation,
- B. the relaunch of basic public services and economic activity,
- C. the initial physical and operational rehabilitation of basic infrastructure, including mine clearance,
- D. social reintegration, in particular of refugees, displaced persons and demobilised combatants,
- E. the restoration of the institutional capacities needed for good governance and ensuring the rule of law and democracy,
- F. assisting with the special needs of women and children affected by armed conflict, particularly rehabilitation of children affected by war, including child soldiers,

Remarks

The purpose of development cooperation under this heading is primarily its contribution to achieving the millennium development goals (MDGs), particularly Goal 1: to halve the proportion of people whose income is less than USD 1 per day and to halve the proportion of people who suffer from hunger before 2015. The MDGs give an overall benchmark for this.

In accordance with the Commission Declaration concerning Article 5 of Regulation (EC) No 1905/2006 of the European Parliament and of the Council of 18 December 2006 establishing a financing instrument for development cooperation (OJ L 378, 27.12.2006, p. 41) (the DCI), for countries defined as Official Development Assistance (ODA) recipients by the OECD Development Assistance Committee (DAC), the Commission will continue to report annually on the benchmark, used in the past but now superseded, of 35 % of assistance to developing countries to be allocated to social infrastructure and services, recognising that the EU contribution must be seen as part of the overall donor support to the social sectors and that a degree of flexibility must be the norm. Moreover, also in accordance with that Commission Declaration, the Commission will endeavour to ensure that a benchmark of 20 % of its allocated assistance under country programmes covered by the DCI will be dedicated, by 2009, to basic and secondary education and basic health, through project, programme or budget support linked to these sectors, taking an average across all geographical areas and recognising that a degree of flexibility must be the norm, such as in cases where exceptional assistance is involved.

Before July each year, the Commission will provide to the European Parliament and the Council an annual report on the Community's development policy and external assistance, meeting all the Commission's regulatory reporting requirements and giving full details of development cooperation, especially the extent to which it has met its objectives. In particular, the report will:

- present the strategic objectives of the Union's development policy and its contribution towards the previous 35 % benchmark for social infrastructure and services and the current 20 % benchmark for basic and secondary education and basic health, and assess the efficiency and effectiveness of cooperation, including progress made in coordinating aid, in improving the coherence of the Union's strategy in its external actions, and in integrating the cross-cutting issues such as gender, human rights, conflict prevention and the environment;
- present the main results of evaluation and monitoring reports, as an indication of the extent to which its actions are achieving their objectives;
- summarise the key features and events of co-operation in each geographical region; and
- provide financial information on the support given to each sector, in accordance with OECD reporting criteria.

Remarks

This appropriation is intended to cover Community operations in the framework of the Afghanistan reconstruction process. It is supplemented by expenditure from other chapters and articles, to which different procedures apply.

The Commission will monitor compliance with the conditions for the Community contribution to this process, notably full implementation of the post-Bonn process. It will keep the budgetary authority informed about its findings and conclusions.

This appropriation is intended to support basic social services and economic development in Afghanistan.

This appropriation is also intended to support the Afghanistan national drug control strategy, including halting the production of opium in Afghanistan, and the disruption and destruction of the opium networks and illegal export routes to European countries.

It is also intended to support the Community contribution to the processes for the return of Afghan refugees and displaced persons to their country and regions of origin in accordance with the commitments entered into by the Community at the Tokyo Conference in January 2002.

This appropriation will also finance activities of women's organisations which have worked for a long time for Afghan women's rights.

Part of this appropriation is intended to be used to improve the situation of women, with priority for actions in the fields of health and education, and to support their active involvement in all areas and at all levels of decision-making, with due regard for the provisions of the Financial Regulation.

Particular attention will also be paid to the situation of women and girls in all other actions and projects supported by this appropriation.

This is important in the context of improving links between EU businesses and researchers in fast-growing economies such as India. The action is in line with the European Parliament resolution of 18 May 2006 on the Commission's Annual Policy Strategy (APS) (paragraph 4), which noted that 'insufficient attention has been given... to the vast and very rapid changes underway in the global economy, notably in emerging economies such as India and China'.

Measures carried out from headquarters:

- the European Union visitors programme (EUVP), carried out jointly by the European Parliament and the Commission, provides some 170 participants a year, chosen by the delegations, with the opportunity of experiencing contact with the European Union by visiting the European Parliament and the Commission as part of a made-to-measure individual programme of visits based on a theme,
- the production and distribution of publications on priority themes as part of an annual programme,
- the production and dissemination of audiovisual material,
- the development of information delivered via electronic media (the Internet and electronic message systems),
- the organisation of visits for groups of journalists,
- the bulk purchase of promotional material to be made available to delegations,
- the support for the information activities of opinion leaders that are consistent with the European Union's priorities.

Decentralised measures carried out by delegations in non-member countries and vis-à-vis international organisations

In accordance with the communication goals laid down for each region and each country, the delegations propose an annual communication plan, which, once approved by headquarters, is assigned a budgetary allocation.

These measures fall into six categories:

- newsletters,
- websites,
- relations with the media (press conferences, seminars, radio programmes, etc.),
- information products (other publications, graphic material, etc.),
- organisation of events, including cultural activities,
- other activities. As of 2007, this will include the management of the network of information points currently known as 'European Documentation Centres'.

COMMISSION
TITLE 19 — EXTERNAL RELATIONSCHAPTER 19 11 — POLICY STRATEGY AND COORDINATION FOR 'EXTERNAL RELATIONS' POLICY AREA (*cont'd*)19 11 03 (*cont'd*)

The areas which will be covered by information activities include those below, but may embrace other aspects of the EU's external relations, particularly in relation to the future of the EU's external policy.

- Address a weak public perception of external assistance. The objective is to make clear that external assistance is an integral part of what the EU does and is one of the crucial policies that define the EU and its role in the world.
- The 'European Neighbourhood Policy' (ENP). The (ENP) was launched on the basis of a communication from the Commission to the Council and the European Parliament on 11 March 2003 (COM(2003) 104 final), 'Wider Europe — Neighbourhood: A new framework for relations with our eastern and southern neighbours'. The actions which are part of this activity will continue to provide information on the activities of the European Union in the framework of its 'European Neighbourhood Policy'.
- Information activities, to be carried out in cooperation with the Council, on the aims and development of the common foreign and security policy.

The Commission has adopted two communications to the European Parliament, the Council, the Economic and Social Committee and the Committee of the Regions on a new framework for cooperation in activities concerning the information and communication policy of the European Union (COM(2001) 354 final and COM(2002) 350). They propose an interinstitutional framework for cooperation between the institutions and with the Member States for the development of a communication and information policy strategy for the European Union.

The Interinstitutional Group on Information (IGI), co-chaired by the European Parliament, the Council and the Commission, lays down common guidelines for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on European topics. Each year the IGI gives its opinion on the priorities for the following years on the basis of information provided by the Commission.

Irrespective of the beneficiary of the measure, no administrative expenditure against this article is authorised.

Legal basis

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 49(6) of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1), as amended by Regulation (EC, Euratom) No 1995/2006 (OJ L 390, 30.12.2006, p. 1).

Regulation (EC) No 1049/2001 of the European Parliament and of the Council of 30 May 2001 regarding public access to European Parliament, Council and Commission documents (OJ L 145, 31.5.2001, p. 43).

TITLE 20

TRADE

TITLE 20**TRADE****Overall objectives**

This domain aims to contribute, in the general interest, to the harmonious development of world trade, the gradual removal of restrictions to international trade and the reduction of customs barriers.

An important pillar of the European Union's economic relations with the rest of the world, it contributes to the Union's broader goals of promoting sustainable development and assuming a larger role in multilateral governance. It covers all the main aspects of trade in goods and services (tariff and non-tariff barriers, trade protection measures, in particular in cases of dumping and subsidies, export credits) and the important issues of intellectual property, investment and competition.

This policy area comprises two operational activities: trade policy and anti-dumping strategy.

Overall objectives

The policy area covers a wide range of activities from political relations and policy formulation to programming and implementing cooperation programmes. It includes both budgetary appropriations under Heading 4 of the financial framework and funds under the various European Development Funds (EDF) for the African, Caribbean and Pacific States as well as the overseas countries and territories.

The amount of the EDF varies from year to year due to the five-year implementation cycle, and corresponds to a yearly average of approximately EUR 2 950 million in commitment appropriations. This is equivalent to about 55 % of total appropriations under Heading 4.

This implies that significant human resources, which are employed to implement the EDF and the complex operations under the Cotonou Agreement, are to be taken into account in the overall human resources requirements in this policy area.

Remarks

This appropriation is intended to increase the capacity of local authorities to act, mobilise and organise, to promote dialogue between government and non-governmental players. It is intended to cover the financing of social and economic development operations to benefit the poorest sections of the population in developing countries, in particular vulnerable groups. It supports sustainable development initiatives taken by local public authorities in developing countries, possibly in association with their European Union counterparts.

It is intended, in this context, mainly to cover information, educational, capitalisation and communication schemes so as to enable potential players to better assimilate the decentralised cooperation approach and to take a more active role in consultations regarding Community programmes and in the implementation of decentralised cooperation.

This appropriation will fund information and communication technologies that can assist with the process of decentralised cooperation.

- to provide financial assistance and appropriate expertise to promote the conservation and sustainable management of tropical forests and other forests in developing countries so as to meet the economic, social and environmental demands placed on forests at local, national and global levels.

This appropriation is also intended to finance research into how the EU could more proactively address deforestation by compensating countries that avoid logging.

This appropriation should be used to give extra funds to those countries that have prioritised education within their Country Strategy Papers.

It is noted that, during the legislative negotiations on the Development Cooperation Instrument, the Commission promised to respect the following minimum percentage breakdown in their programming of commitment appropriations for the thematic programme on Human and Social Development for the multiannual period 2007 to 2013:

- A. a minimum of 50 % will be allocated to health;
- B. a minimum of 12 % will be allocated to education;
- C. a minimum of 14 % will be allocated to other aspects of human and social development;
- D. a minimum of 2 % will be allocated to gender.

As these minimum allocations apply to the total multiannual allocation, they need not necessarily be respected for each annual budget during the period 2007 to 2013.

This appropriation is intended to cover a Community contribution to actions to improve reproductive and sexual health in developing countries and to secure respect for the rights related thereto.

Financial assistance shall be provided with a view to promoting the recognition of reproductive and sexual rights, safe motherhood and universal access to a comprehensive range of safe and reliable reproductive and sexual health services.

In the allocation of such funding and expertise, priority shall be given to the poorest and least developed countries and the most disadvantaged sections of the population within developing countries and to action that complements and reinforces both the policies and capacities of developing countries and the assistance provided through other instruments of development cooperation.

The purposes of the activities carried out shall be to:

- secure the right of women, men and adolescents to good reproductive and sexual health,
- enable women, men and adolescents to have access to a comprehensive range of safe and reliable reproductive and sexual healthcare services and products,
- reduce maternal mortality rates, with particular reference to the countries and populations where these are highest,
- combat female genital mutilation.

Financial support shall be given to projects or programmes specifically designed to attain the objectives described above.

This appropriation is intended to finance a preparatory action to combat poverty-related diseases other than HIV/AIDS, malaria and tuberculosis. It is in particular intended to contribute to immunisation programmes against illnesses such as measles, diphtheria, tetanus, pertussis, hepatitis B, Haemophilus influenzae B, yellow fever, meningitis and pneumococcus-induced diseases by complementing vaccination efforts under way in some developing countries.

CHAPTER 21 05 — HUMAN AND SOCIAL DEVELOPMENT (*cont'd*)21 05 03 (*cont'd*)

The preparatory actions aim through targeted and innovative measures to identify and provide the conditions for better coordination between the EU, the Member States and the main international public-private partnerships involved in the field of public health and immunisation as well as to secure more effective investment in health systems (prevention, education, capacity-building) in developing countries.

This appropriation is intended to cover a Community contribution to the implementation of the European Community action programme for targeting the three major communicable diseases, namely HIV/AIDS, malaria and tuberculosis, in developing countries.

Under that programme, the Community shall provide financial assistance and appropriate expertise with a view to promoting investment in health, poverty reduction and equitable economic growth in developing countries.

In the allocation of such funding and expertise, priority shall be given to the poorest and least developed countries and the most disadvantaged sections of the population, especially women and girls, within developing countries, and also to action that complements and reinforces both the policies and capacities of developing countries and the assistance provided through other instruments of development cooperation. These activities ought to contribute to innovative solutions which will improve the performance of current practices related to the fight against poverty-related diseases.

The purpose of all the activities carried out shall be to:

- optimise the impact of existing interventions, services, commodities and information targeted at the major communicable diseases affecting the poorest populations,
- increase the affordability of key pharmaceuticals,
- increase research and development, including vaccines and clinical trials, microbicides and innovative treatments,
- increase activities in the area of disease prevention, including VCCT testing, targeted information campaigns and counselling among high-risk groups,
- promote awareness-raising campaigns, education, information and communication efforts aimed at reducing risk-taking behaviour,
- integrate gender sensitivity in HIV/AIDS programming and the development of female-initiated and female-controlled prevention methods as well as to integrate men into programmes focusing on the impact on women and girls,
- promote leadership awareness training.

The appropriation is also intended to fund malaria vaccination programmes.

Community financial support shall be given to specific projects designed to further the objectives described above, including support for global initiatives targeting the major communicable diseases in the context of poverty reduction, notably the Global Fund to fight HIV/AIDS, tuberculosis and malaria which came into operation on 29 January 2002.

This appropriation is intended as a pilot project to support national programmes of aid for basic education in developing countries through relevant action and analyses.

This appropriation is intended to promote cultural diversity by supporting cooperation in the field of culture, including:

- activities supporting mutual understanding between different cultures within partner countries,
- exchanges allowing for greater cultural understanding between developing countries and the European Union.

CHAPTER 21 05 — HUMAN AND SOCIAL DEVELOPMENT (*cont'd*)21 05 03 (*cont'd*)*Primary education*

This appropriation is intended to finance sectoral budget support targeted at ending school and uniform fees in primary education, especially for girls. The limited number of beneficiary countries will be chosen from the list of countries identified by the UN Millennium Project as potential candidates for MDG fast-tracking and in accordance with the rules applied by the Commission for the countries benefiting from budget support, with particular reference to their ability to fulfil criteria of good governance and sound financial management.

Part of this appropriation is intended to finance preparation of the beneficiary countries to offset the costs of ending the user fees by other means of public financing after the end of this temporary EU action.

School meals

This appropriation is intended to finance sectoral budget support targeted at school meals for children in primary schools. This measure complements the Quick Win action to end school and uniform fees and will be conducted with the same countries, chosen from the list of countries identified by the UN Millennium Project as potential candidates for MDG fast-tracking and in accordance with the rules applied by the Commission for the countries benefiting from budget support, in particular their ability to fulfil criteria of good governance and sound financial management.

Part of this appropriation is intended to finance preparation of the beneficiary countries to organise public financing for school meals after the end of this temporary EU action.

Food security

This appropriation is intended to finance aid to smallholder farmers for a massive replenishment of soil nutrients on land with nutrient-depleted soils, through free or subsidised distribution of chemical fertilisers and through agroforestry.

The countries benefiting from this action will be chosen from the list of countries identified by the UN Millennium Project as potential candidates for MDG fast-tracking.

This appropriation is intended to increase the capacity of civil society players and local authorities to act, mobilise and organise, to promote dialogue between government and non-governmental players. It is intended to cover the financing of social and economic development operations to benefit the poorest sections of the population in developing countries, in particular vulnerable groups. It supports sustainable development initiatives taken by the local public authorities, community-based organisations and associations or groupings in developing countries, possibly in association with their European Union counterparts.

It is intended, in this context, mainly to cover information, educational, capitalisation and communication schemes so as to enable potential agents to better assimilate the decentralised cooperation approach and to take a more active role in consultations regarding Community programmes and in the implementation of decentralised cooperation.

This appropriation will fund information and communication technologies that can assist with the process of decentralised cooperation.

This appropriation was intended to enable the Commission to establish in 2002 a mechanism to support capacity-building in developing countries for information and communication technologies (ICT) and sustainable energy. The programme should be well coordinated with other donor initiatives on ICT and sustainable energy.

From 2003 onwards, the sustainable energy component is addressed through Article 06 04 02, whereas the ICT component is addressed through national/regional programmes whenever relevant.

The Commission should also use this appropriation to work with the United Nations Development programme on joint pilot projects and ensure that the full benefits of ICT and sustainable energy technologies are explored and properly highlighted.

COMMISSION

TITLE 21 — DEVELOPMENT AND RELATIONS WITH AFRICAN, CARIBBEAN AND PACIFIC (ACP) STATES

CHAPTER 21 06 — GEOGRAPHICAL COOPERATION WITH AFRICAN, CARIBBEAN AND PACIFIC (ACP) STATES (*cont'd*)*Remarks**New chapter*

For countries defined as Official Development Assistance (ODA) recipients by the OECD Development Assistance Committee (DAC), a benchmark of 35 % of annual commitments has in the past been allocated to social infrastructure, mainly education and health, but also including macroeconomic assistance with social sector conditionality, recognising that the EU contribution must be seen as part of the overall donor support to the social sectors and that a degree of flexibility should be the norm. The Commission will continue to report on this benchmark.

Moreover, in parallel with the Commission Declaration concerning Article 5 of Regulation (EC) No 1905/2006 of the European Parliament and of the Council of 18 December 2006 establishing a financing instrument for development cooperation (OJ L 378, 27.12.2006, p. 41), the Commission will endeavour to ensure that a benchmark of 20 % of its allocated assistance under country programmes covered by the Development Cooperation Instrument (DCI) will be dedicated, by 2009, to basic education and basic health, through project, programme or budget support linked to these sectors, taking an average across all geographical areas and recognising that a degree of flexibility must be the norm, such as in cases where exceptional assistance is involved.

Before July each year, the Commission will provide the European Parliament and the Council with an annual report on the Community's development policy and external assistance, meeting all the Commission's regulatory reporting requirements and giving full details of development cooperation, especially the extent to which it has met its objectives. In particular, the report will:

- present the strategic objectives of the Union's development policy and its contribution towards the previous 35 % benchmark for social infrastructure and services and the current 20 % benchmark for basic health and basic education, and assess the efficiency and effectiveness of cooperation, including progress made in coordinating aid, in improving the coherence of the Union's strategy in its external actions, and in integrating the cross-cutting issues such as gender, human rights, conflict prevention and the environment;
- present the main results of evaluation and monitoring reports, as an indication of the extent to which its actions are achieving their objectives;
- summarise the key features and events of cooperation in each geographical region, and
- provide financial information on the support given to each sector, in accordance with OECD reporting criteria.

The report should also contain information on how budget support has contributed to the MDGs. Budget support will depend on prior demonstration of sufficient institutional capacity and compliance with detailed criteria for the custody and use of funds in the recipient country. The criteria must be stated in the annual report, and compliance therewith must be assessed in the report.

After the report has been presented the European Parliament, the Council and the Commission will enter into a dialogue on the results and on how further progress can be made towards achieving the objectives.

The appropriation also covers the protection and promotion of human rights, including children's rights, which are fully integrated into programming, including in the country strategy papers (CSPs), national indicative programmes (NIPs) and mid-term reviews.

In accordance with the Trade, Development and Cooperation Agreement (TDCA) between the European Union and South Africa, and with Regulation (EC) No 1726/2000 of the European Parliament and of the Council of 29 June 2000, as amended by Regulation 1934/2004 of the European Parliament and the Council (which expires at the end of 2006 and will be replaced by the new general instrument for Development Cooperation).

Development cooperation — the 'European Programme for Reconstruction and Development' (EPRD) — is implemented through CSP/MIPs in the framework of the TDCA and is financed from Community budget. For the period 2007 to 2013 the programme will be implemented under a new Country Strategy Paper and Multiannual Programme.

This appropriation is intended primarily to cover the financing of development cooperation projects and programmes with South Africa, which contribute:

- to improving basic health and basic education and help achieve the Millennium Development Goals by endeavouring to ensure that a benchmark of 20 % of allocated assistance will be dedicated, by 2009, to basic and secondary education and basic health, through project, programme or budget support linked to these sectors, taking an average across all geographical areas and recognising that a degree of flexibility must be the norm, such as in cases where exceptional assistance is involved.
- to South Africa's harmonious and sustainable economic and social development through programmes and measures designed to reduce poverty and encourage economic growth which benefits the poor,
- to its continued integration into the world economy,
- to consolidate the foundations laid for a democratic society and a State governed by the rule of law in which human rights and fundamental freedoms are fully respected.

Remarks

Former Article 21 04 02

Action A: coordination

Budget financing provides the Commission with the means of support it needs to prepare, formulate and follow up coordination measures under its development policy. Policy coordination is crucial to the consistency, complementarity and effectiveness of aid.

Coordination measures are essential in defining and shaping European development policy at a strategic and programming level. The specific nature of European development policy is directly enshrined in the Treaties (Articles 177 and 180 of the EC Treaty). Community aid is complementary to the national policies of the Member States in the sphere of development cooperation and complementarity cannot work without coordination. Article 180 of the Treaty requires the Commission to act as coordinator of national policies and coordinator of EU objectives with national objectives in the area of development cooperation and assistance.

COMMISSION

TITLE 21 — DEVELOPMENT AND RELATIONS WITH AFRICAN, CARIBBEAN AND PACIFIC (ACP) STATES

CHAPTER 21 08 — POLICY STRATEGY AND COORDINATION FOR 'DEVELOPMENT AND RELATIONS WITH ACP STATES'
POLICY AREA (cont'd)

21 08 02 (cont'd)

Coordination is not only a major factor in the Commission's value added vis-à-vis the policies of the Member States but also a priority in the work schedule at the point where the agendas of the European Union and the international community intersect. It therefore reflects a steadily growing demand from the other European institutions, as recognised by the Member States and by the European Parliament at the European Council in Barcelona in March 2002.

This appropriation covers various forms of action:

- effectiveness, efficiency, relevance, impact and viability studies in the area of coordination,
- meetings of experts and exchanges between the Commission and Member States,
- monitoring of operations in the course of implementation,
- support measures to improve the quality of the monitoring of ongoing operations and the preparation of future operations,
- measures to support external initiatives in the sphere of coordination,
- the preparation of common positions, statements and initiatives,
- the organisation of events relating to coordination,
- dissemination of information through the production of publications and the development of information systems.

Action B: raising awareness

This appropriation covers the financing of activities designed to draw attention to action by the EU and the Member States in the development field and to raise public awareness of development issues. Every activity financed under this article must include the following two components, which are complementary in the Commission's view:

- an 'information' component, designed to promote the various activities which the EU undertakes in the development aid field and the activities which it conducts in partnership with the Member States and other international institutions,
- an 'awareness-raising' component, covering public opinion in the Community and in the ACP States (78 countries). These activities are targeted primarily at the young. An immediate priority of this component is also to raise public awareness in the Member States about the Community's action in the development cooperation field.

These activities consist mainly, though not exclusively, of financial support for schemes in the audiovisual, publications, seminars and events fields as applied to development, the production of information material, the development of information systems, and also the Lorenzo Natali prize for journalism in the development field.

These activities are directed at public and private sector partners, and at the EU's representations and delegations in the Member States, the accession countries and the ACP States.

The appropriation also covers the introduction of a system which gives access to the public to follow via the Internet the progress of EU development aid from the decision on the budget to the implementation of the actual project in the developing country.

Irrespective of the beneficiary of the measure, no administrative expenditure against this article is authorised.

- the intensification of the Stabilisation and Association Process in the western Balkans, following the outcome of the talks on the status of Kosovo and the referendum in Montenegro; implementation of association agreements with all the countries in the region,
- the launch of the single Instrument for Pre-Accession in all candidate and potential candidate countries in support of their reforms and preparations for future membership,
- the support to the reunification of Cyprus, with the implementation of the aid package to the Turkish Cypriot community,
- the promotion of a dialogue between civil societies in member states and candidate and potential candidate countries as an integral part of the pre-accession processes,
- an effective information and communication policy on enlargement both in candidate and potential candidate countries and in Member States,
- the programming of the transition facilities for Romania and Bulgaria.

The Commission will also continue to phase out the pre-accession programmes and transition facilities in all new Member States.

- expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts for the mutual benefit of the beneficiaries and the Commission,
- expenditure on support staff in delegations (contract staff, detached national experts, individual experts, local staff and local technical assistance staff) for the purposes of devolved programme management in the Commission's delegations in non-member countries or for internalisation of tasks of phased-out technical assistance offices, as well as the additional logistical and infrastructure cost, such as cost of training, meetings, missions, IT and telecommunications and of renting directly caused by the presence in the delegation of the temporary staff remunerated from the appropriations in this item,
- expenditure on temporary support staff (contract staff, auxiliaries, detached national experts, staff from employment agencies) at headquarters intended to take over the tasks previously conferred on dismantled technical assistance offices; expenditure on temporary support staff at headquarters is limited to EUR 1 200 000 and this estimate is based on a provisional annual unit cost per man-year, of which 97 % is accounted for by remuneration for the staff concerned and 3 % by the additional cost of training, meetings, missions, IT and telecommunications relating to those staff members,

Remarks

Former Item 22 01 04 03

After enlargement, the Commission remains responsible for ensuring that all legal and financial requirements are met, in particular with regard to sound and efficient financial management. In line with the Act of Accession, all implementing agencies in the 10 new Member States that joined the EU in 2004 now operate under the extended decentralised implementation system (EDIS). In Bulgaria and Romania the extended decentralised implementation system will be introduced as soon as feasible. To accompany this transition in Bulgaria and Romania, the current administrative and personnel structures of delegations will be maintained for up to 15 months after accession.

However, a number of inalienable tasks relating to the completion of pre-accession programmes have been repatriated to headquarters from phased out delegations/representations in the ten new member states, to which the completion of the pre-accession programmes for Romania and Bulgaria will add following a time frame matching that of the phasing-out of the EC delegations in these countries. These tasks concern notably project follow-up in the context of both monitoring of outcomes and financial management, including payment requests, as well as the follow-up to corrective actions taken upon recommendations from EDIS audits and the implementation and follow-up to post-accession transitional financial aid. Modifications to project fiches and/or financial allocations must also be duly assessed and an appropriate decision submitted to the Commission.

This appropriation is intended to cover the administrative costs of this remaining part of the phasing-out of the accession assistance programmes in the new Member States, namely:

- expenditure on temporary support staff in delegations/representations (detached national experts, individual experts, local staff and local technical assistance staff) for the purposes of the devolved programme management in the Commission's delegations/representations in non-member countries as well as the additional logistical, administrative and infrastructure costs, such as costs of training, meetings, missions, IT and telecommunications and of renting directly caused by the presence in the delegation of the temporary staff remunerated from the appropriations of this item,
- expenditure on short-term technical assistance, linked to the achievement of the objective of the programme (or measures coming under this article, plus any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts),
- expenditure on temporary support staff (contract staff, detached national experts, staff from employment agencies) at headquarters working on tasks directly related to the completion of the accession programmes; expenditure on temporary support staff at headquarters is limited to EUR 1 600 000 and this estimate is based on a provisional annual unit cost per man-year, of which 97 % is accounted for by remuneration for the staff concerned and 3 % by the additional cost of training, meetings, missions, IT and telecommunications relating to those staff members.

Remarks

The purpose of the transition facility is to continue to assist the new Member States in their efforts to strengthen their administrative capacity to implement Community legislation and to foster the exchange of best practice.

The transition facility for the 10 new Member States who joined the EU on 1 May 2004 ran from 2004 to 2006. Implementation will continue until at least 2009. A new transition facility for Bulgaria and Romania has been foreseen in their Act of Accession (2005) to last for one year following their accession to the EU.

The orientation of the transition facility is to continue institution-building activities according to the same principles as funded by Phare during the pre-accession period. Therefore, the structures and methods established under Phare for programming and decision-making will continue to apply for the transition facility with some small adaptations.

The purpose of the transition facility is to continue to provide assistance to new Member States in areas where their administrative and institutional capacity is still not able to deliver on a par with present Member States. The transition facility should provide the tools to enable them to react rapidly and precisely to weaknesses identified, primarily where safeguard clauses have been, or risk being, invoked.

The assistance shall address the continued need for strengthening institutional capacity in certain areas through actions which cannot be financed by the Structural Funds, in particular in the following areas:

- justice and home affairs (strengthening of the judicial system, external border controls, anti-corruption strategy, strengthening of law enforcement capacities),
- financial control,
- protection of the Communities' financial interests and the fight against fraud,
- the internal market, including customs union,
- the environment,
- veterinary services and administrative capacity-building related to food safety,
- administrative and control structures for agriculture and rural development, including the integrated administration and control system (IACS),

CHAPTER 22 03 — TRANSITION FACILITY FOR NEW MEMBER STATES (cont'd)

22 03 01 (cont'd)

- nuclear safety (strengthening the effectiveness and competence of nuclear safety authorities and their technical support organisations as well as public radioactive waste management agencies),
- statistics,
- the strengthening of public administration according to needs identified in the Commission's comprehensive monitoring report which are not covered by the Structural Funds.

The issues to be addressed by the transition facility will primarily be identified in the comprehensive monitoring report. Priority should be given to areas where safeguard clauses have been, or risk being, invoked to secure rapid remedial action.

Part of each allocation may be assigned to multi-beneficiary programmes, audit and evaluation actions being herein included. The remainder is distributed between the new Member States.

Legal basis

Tasks resulting from the specific powers assigned directly to the Commission by Article 34 of the Act of Accession of 16 April 2003 and Article 31 of Title III of the Act of Accession of 25 April 2005 (part of the Treaty concerning the accession of the Republic of Bulgaria and Romania to the European Union).

Remarks

This appropriation is intended to cover technical assistance in the field of approximation of legislation for the entire *acquis communautaire*, helping all bodies involved in the implementation and enforcement of the *acquis*, including non-governmental organisations to achieve their objectives and to monitor their rate of achievement.

The objective is to provide as rapidly as possible short-term assistance by means of seminars, workshops, study visits and expert visits, training arrangements, provision of tools and products, notably for information gathering and dissemination, translation/interpretation, as well as any other forms of technical assistance in the context of the approximation to the European Union *acquis*.

Remarks

This appropriation is intended to cover the funding of priority information and communication activities on enlargement mainly regarding Member States, impact assessments and evaluation actions being herein included.

The amount of the proposed appropriations reflects the information and communication priorities under the enlargement timetable. While 2004 was a transition year, with a focus on central communication policies, reflecting the transformation of Delegations to Representations in the 10 new Member States, since 2005 the aim of the policies is to promote support for accession, and to raise public awareness across Europe about the enlargement of the Union, but especially in those target countries where the public opinion is more sensitive to the next steps of enlargement.

The credits allocated will finance information and communication actions on priority EU policies such as: an effective dialogue on enlargement and pre-accession between the European citizens and the Union's institutions, taking into account each country's specificity and information needs; a dialogue between the civil society of the EU and that of candidate and pre-accession countries; informing journalists on the enlargement process; studies and opinion polls; developing and updating dedicated websites; preparing written and audiovisual material; organising conferences and seminars; evaluating the information programme.

The Interinstitutional Group on Information (IGI), co-chaired by the European Parliament, the Council and the Commission, lays down common guidelines for interinstitutional cooperation in matters of EU information and communication policy. It coordinates the central and decentralised public information activities on European topics. Each year the IGI gives its opinion on the priorities for the following years on the basis of information provided by the Commission.

Legal basis

Task resulting from the Commission's prerogatives at institutional level, as provided for in Article 49(6) of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1), as amended by Regulation (EC, Euratom) No 1995/2006 (OJ L 390, 30.12.2006, p. 1).

*Remarks**New article*

This appropriation is intended to cover the funding of priority information and communication activities on enlargement mainly regarding candidate and potential candidate countries, impact assessments and evaluation actions being herein included.

The main focus will be on the implementation of the re-orientated communication strategy on enlargement and pre-accession through working programmes. The large part of this appropriation will be allocated to cover information and communication activities in a deconcentrated manner to delegations in acceding, candidate and potential candidate countries.

Information and communication actions will be directed to the general public, relevant audiences, target groups, especially with youth, media and the rural population, and to enhance support among opinion leaders for the enlargement as well as the association and stabilisation process. The aim is also to strengthen the EU visibility and political leverage in those countries and generate public support for the reforms process during the accession and pre-accession periods.

The credits allocated will build on the strategy from the previous year and lessons learnt and finance activities, such as: management of information centres, organisation of information events, seminars, training; networking, media relations; research; studies and opinion polls, publications and internet websites.

Legal basis

Council Regulation (EC) No 1085/2006 of 17 July 2006 establishing an Instrument for Pre-Accession Assistance (IPA), (OJ L 210, 31.7.2006, p. 82).

- supervision and coordination of food aid operations, notably the terms for the supply, delivery, distribution and use of the products involved, including the use of counterpart funds,
- pilot schemes concerning new forms of transport, packaging or storage, studies of food aid operations and campaigns to increase public awareness,
- storage of food (including administrative costs, future operations, with or without options, training of technicians, purchase of packaging and mobile storage units, cost of maintaining and repairing stores, etc.),
- the technical assistance necessary for the preparation and implementation of humanitarian food aid projects, in particular expenditure incurred covering the cost of contracts of individual experts in the field and the infrastructure and logistics costs, covered by imprest accounts and expenditure authorisations, of DG Humanitarian Aid units deployed throughout the world.

Remarks

Former Article 24 02 01, Item 24 02 04 01 and Item 24 02 04 02

This appropriation is intended to guarantee Member States and OLAF access to the strategic information required for investigations; OLAF subscribes to key data sources on companies, international trade and vessels.

Similarly other on-line sources of information can be used for specific investigations or fraud prevention requirements, in particular in the areas of customs and agriculture.

This appropriation also covers:

- the organisation by OLAF of seminars or workshops,
- the organisation of the annual 'cigarettes' seminar,
- technical and scientific assistance for the development and provision of specific computer tools for intelligence work; administrative arrangements are being concluded with the Joint Research Centre (JRC).

This appropriation is intended for the purchase of specific equipment to combat fraud and to provide technical assistance for the purpose of combating fraud; it involves awarding grants to national departments or other public-sector bodies so that they can organise these actions themselves. Technical assistance also means organising seminars for the staff of the national departments concerned.

It also covers training measures supported by OLAF which contribute to the fight against fraud affecting the financial interests of the European Union by encouraging the pooling of experience and dissemination of general and operational knowhow in the areas concerned. These measures will also be designed to make OLAF and its working methods better known and to improve cooperation by enhancing understanding of Community and national mechanisms.

To the appropriations entered in this item must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

Any revenue from the contribution from candidate countries for participation in Community programmes, entered in Item 6 0 3 1 or the statement of revenue, may give rise to the provision of additional appropriations in accordance with Article 18 (1)(d) of the Financial Regulation.

Remarks

It is necessary to monitor new and assess old legislation. This pilot project should set up a multiannual project with the aim of establishing a small organisation that is apolitical and independent and does not target the policy objectives of the proposed legislation but focuses solely on the administrative burden brought about by a particular legislative proposal.

Furthermore this organisation should review how the Commission handles its responsibility to keep the administrative burden as low as possible in the context of and with due regard for the aim of the planned legislation.

Moreover this organisation should focus on considering the degree to which in the explanation for the planned legislation the consequences in terms of administrative burdens have been considered and whether the Commission has shown itself to have sought the least burdensome option to realise the policy objectives of the proposed legislation.

This chapter covers the measures necessary to ensure the proper functioning of the statistical production system. As such, the activities (including statistical governance, European Statistical training Programme, transmission and dissemination of data and metadata, integration of the newly adhered countries) contribute directly or indirectly to all the priorities of the Commission for 2007.

This appropriation is intended to cover the following:

- statistical surveys, studies and development of indicators/benchmarks,
- quality studies and activities designed to improve the quality of statistics,
- subsidies to national statistical authorities,
- processing, dissemination, promotion and marketing of statistical information,
- equipment, processing infrastructure and maintenance essential for statistical information systems,
- magnetically recorded statistical analysis and documentation,
- services rendered by external experts,
- joint-financing revenue for the public and private sectors,
- financing of surveys by commercial undertakings,
- organisation of advanced statistical technology training courses for statisticians,
- the cost of purchasing documentation,
- subsidies for the International Statistical Institute and subscriptions to other international statistical associations.

It is also intended to ensure the gathering of the information necessary to draw up annually a summary report on the economic and social state of the European Union on the basis of economic data and structural indicators/benchmarks.

CHAPTER 29 02 — PRODUCTION OF STATISTICAL INFORMATION (*cont'd*)**29 02 01** (*cont'd*)29 02 01 01 (*cont'd*)

This appropriation is also intended to cover costs incurred in connection with the training of national statisticians and the policy of cooperation with the developing countries, the countries of central and eastern Europe and the southern Mediterranean countries; expenditure relating to exchanges of officials, the costs of information meetings, subsidies, expenditure in payment for services rendered in connection with the adjustment of the remuneration of Community officials and other staff.

Also charged to this article is expenditure on the purchase of data and access for Commission departments to outside data-banks. In addition, funding should be used to develop new, modular techniques.

It is also intended to cover the provision of the necessary statistical information, at the request of the Commission or of the other Community institutions, for the assessment, monitoring and evaluation of Community expenditure. This will improve the implementation of financial and budgetary policy (drawing-up of the budget and periodic review of the financial perspective) and make it possible to compile medium and long-term data for Community financing.

To the appropriations entered in this article must be added the contributions from the EFTA States pursuant to the Agreement on the European Economic Area, and in particular Article 82 thereof and Protocol 32 thereto. By way of information, these amounts derive from contributions from the EFTA States entered against Article 6 3 0 of the statement of revenue, which constitute assigned revenue in accordance with Article 18(1)(d) of the Financial Regulation; they give rise to the provision of corresponding appropriations and to implementation under Annex V to this part of the statement of expenditure of this section, which forms an integral part of the general budget.

The amount of assigned revenue pursuant to Article 18(1)(e) to (j) of the Financial Regulation is estimated at EUR 800 000.

Remarks

The aim of this reserve, in accordance with point 25 of the Interinstitutional Agreement of 17 May 2006 on budgetary discipline and sound financial management, is to allow a rapid response to the specific aid requirements of third countries following events which could not be foreseen when the budget was established, first and foremost for humanitarian operations, but also for civil crisis management and protection where circumstances so require. The annual amount of the Reserve is fixed at EUR 221 million for the duration of the financial framework, in constant prices.

The Reserve is entered in the general budget of the European Union as a provision. The corresponding commitment appropriations will be entered in the budget, if necessary, over and above the ceilings.

When the Commission considers that the Reserve needs to be called on, it will present to the two arms of the budgetary authority a proposal for a transfer from the Reserve to the relevant budget lines.

At the same time as it presents its proposal for a transfer, the Commission will initiate a triologue procedure, if necessary in a simplified form, to secure agreement of the two arms of the budgetary authority on the need to use the Reserve and on the amount required.

|---------------------|---------------------|--------------|
| 450 000 | 450 000 | 231 313,78 |

This appropriation is intended to cover the cost of information and communication measures undertaken by the Office.

The Office's external information and communication strategy is central to its work. The Office was set up as an independent investigative body and must therefore have its own communications strategy. The Office's work is often too technical to be immediately comprehensible to the general public. The Office has to inform its interlocutors and the public as a whole of its role and tasks. Public perception of the Office's work is of paramount importance.

As a Commission service, the Office also needs to take account of the democratic deficit existing between Community institutions and the citizens of Europe. The Commission has recognised this deficit and drawn up an action plan to address it.

The communications strategy that the Office has developed and continues to implement must demonstrate its independence.

Legal basis

Regulation (EC) No 1073/1999 of the European Parliament and of the Council of 25 May 1999 concerning investigations conducted by the European Anti-Fraud Office (OLAF) (OJ L 136, 31.5.1999, p. 1).

COMMISSION
EUROPEAN ECONOMIC AREA

Under the agreement establishing the European Economic Area the EFTA countries (with the exception of Switzerland) take part in a wide range of Community policies covered by headings 1a, 3a, 3b, 4 and 5 of the financial framework in exchange for a financial contribution to operating appropriations calculated by applying a 'proportionality factor'. This proportionality factor is equal to the sum of the ratios obtained by dividing the gross domestic product at market prices of each EFTA country by the gross domestic product at market prices of all the EC Member States plus that of the EFTA country concerned.

For 2007 the proportionality factor is estimated at 2,28 % (on the basis of 2005 figures).

These financial contributions will not be formally entered into the budget; each budget heading relating to activities in which the EFTA countries take part will refer to the EFTA contribution as a memorandum item. A summary table, listing the budget headings concerned and the amounts of the EFTA contribution for each budget heading, is published as an Annex to the Community budget. The total EFTA contribution for the operational part for 2007 is estimated at about EUR 9 million in commitment appropriations. The EFTA countries will also share in the administrative expenditure directly linked to the implementation of these policies. The figures and budget headings concerning the contributions by the EFTA countries are still to be discussed with them and must therefore be regarded as provisional.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE GENERAL BUDGET

A. INTRODUCTION

This Annex is drawn up in accordance with Article 30(1) of Council Regulation (EC, Euratom) No 1605/2002 of 25 June 2002 on the Financial Regulation applicable to the general budget of the European Communities (OJ L 248, 16.9.2002, p. 1), as amended by Regulation (EC, Euratom) No 1995/2006 (OJ L 390, 30.12.2006, p. 1).

It provides information about the amounts of the borrowing-and-lending operations guaranteed by the general budget: loans for balance-of-payments support, and borrowing operations to provide macro-financial assistance to non-member countries, European Investment Bank loans to Mediterranean basin countries, in the countries of central and eastern Europe and the western Balkans, for projects in Russia, Ukraine, Belarus, Moldova, European Investment Bank loans for projects of mutual interest in certain non-member countries (Asia and Latin America), European Investment Bank loans to South Africa and Euratom borrowings to contribute to the financing required for improving the degree of efficiency and safety of nuclear power stations in certain non-member countries.

At 31 December 2005, outstanding operations covered by the general budget totalled EUR 16,520 billion; of that total EUR 2,966 billion was inside the European Union and EUR 13,554 billion outside (rounded figures).

B. BRIEF PRESENTATION OF THE VARIOUS CATEGORIES OF BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE GENERAL BUDGET

I. SINGLE FACILITY PROVIDING MEDIUM-TERM FINANCIAL ASSISTANCE FOR MEMBER STATES' BALANCES OF PAYMENTS

1. Legal basis

Council Regulation (EC) No 332/2002 of 18 February 2002 establishing a facility providing medium-term financial assistance for Member States' balances of payments (OJ L 53, 23.2.2002, p. 1).

2. Description

In accordance with Regulation (EC) No 332/2002, the European Union may grant loans to Member States which are experiencing, or are seriously threatened with, difficulties in their balance of current payments or capital movements. Only Member States which have not adopted the euro may benefit from this Community facility. The outstanding amount of loans is limited to EUR 12 billion in principal.

3. Effect on the budget

Since both parts of these borrowing-and-lending operations are carried out on identical terms, they affect the budget only if the guarantee is activated in case of default. As of 31 December 2005, the outstanding amount under this instrument was zero.

II. EURATOM BORROWING-AND-LENDING OPERATIONS

2. Description

Please refer to Point 1.2.3.3.

IV. EUROPEAN COMMUNITY GUARANTEE FOR BORROWING PROGRAMMES CONTRACTED BY THE COMMUNITY TO PROVIDE FINANCIAL ASSISTANCE FOR MEDITERRANEAN NON-MEMBER COUNTRIES

1. Legal basis

Council Decision 94/938/EC of 22 December 1994 providing further macro-financial assistance for Algeria (OJ L 366, 31.12.1994, p. 28).

2. Description

An operation for Algeria involving EUR 200 000 000, in two tranches, over a period of no more than seven years, was proposed by the Commission and decided by the Council on 22 December 1994. The first tranche of EUR 100 000 000 was fully reimbursed on 3 November 2000. In view of the clear improvement in Algeria's external position payment of the second tranche is no longer to be made.

3. Effect on the budget

There is no more effect on the budget as there is no outstanding with these countries.

Council Decision 1999/731/EC of 8 November 1999 providing supplementary macro-financial assistance to Bulgaria (OJ L 294, 16.11.1999, p. 27).

Council Decision 1999/732/EC of 8 November 1999 providing supplementary macro-financial assistance to Romania (OJ L 294, 16.11.1999, p. 29).

2. Description

On 22 July 1997 the Council decided to grant Bulgaria long-term, macro-financial assistance of a maximum of EUR 250 000 000, to be paid in two tranches. The first tranche of EUR 125 000 000 was paid to Bulgaria on 10 February 1998. The second tranche of EUR 125 000 000 was paid on 22 December 1998.

On 8 November 1999 the Council decided to grant Bulgaria additional macro-financial assistance of a maximum of EUR 100 000 000. The loan was paid in two tranches. The first tranche of EUR 40 000 000 was paid to Bulgaria on 21 December 1999. The second tranche of EUR 60 000 000 was paid on 29 September 2000.

The effect on the budget is thus limited to:

- payment to the Fund of 9 % of the capital value of the lending and guarantee operations decided and committed after 1 January 2000,
- activation of the budget guarantee should the debtor default.

From 1 January 2007, loans with Bulgaria and Romania cease to be external actions (see Regulation (EC, Euratom) No 2273/2004) and are therefore covered directly by the general budget and no longer by the Guarantee Fund.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE GENERAL BUDGET**2. Description**

Under the Financial Protocols concluded with Mediterranean Basin non-member countries, global amounts are laid down for loans to be granted by the European Investment Bank from its own funds. The European Investment Bank grants the loans for purposes which may contribute to the economic and social development of the countries in question (transport infrastructures, ports, water supply, production and distribution of energy, agricultural projects and promotion of small and medium-sized businesses).

Acting on a proposal from the Commission and after consulting Parliament, the Council decided on 14 April 1997 to renew the Community guarantee to the European Investment Bank for loans for projects in the following Mediterranean countries: Algeria, Cyprus, Egypt, Israel, Jordan, Lebanon, Malta, Morocco, Syria, Tunisia, Turkey, Gaza and the West Bank. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 7 105 000 000, of which EUR 2 310 000 000 is for the abovementioned Mediterranean countries. It covered a period of three years beginning on 31 January 1997 (with a possible six-month extension).

The European Investment Bank is invited to aim to cover the commercial risk on 25 % of its lending from non-sovereign guarantees.

The Council decided on 29 November 1999 to grant a Community guarantee to the European Investment Bank against losses under loans for projects for the reconstruction of the earthquake-stricken areas of Turkey. The guarantee is restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 600 000 000 and covered a period of three years beginning on 29 November 1999 (with a possible six-month extension).

The European Investment Bank is invited to aim to cover the commercial risk on 30 % of its lending from non-sovereign guarantees. This percentage is to be increased whenever possible, in so far as the market allows.

On 22 December 1999, on the basis of a Commission proposal and after consulting Parliament, the Council decided once again to give the European Investment Bank the Community guarantee against losses resulting from loans for projects carried out in the following Mediterranean countries: Algeria, Cyprus, Egypt, Israel, Jordan, Lebanon, Malta, Morocco, Syria, Tunisia, Turkey, Gaza and the West Bank. The guarantee is limited to 65 % of the total value of the appropriations made available plus all the related amounts. It covers a period of seven years from 1 February 2000 to 31 January 2007. If at the end of that period the loans granted by the European Investment Bank have not reached the abovementioned total values, the period is automatically extended by six months.

On 4 December 2000 the Council decided to establish a European Investment Bank special action programme in support of the consolidation and intensification of the EC-Turkey Customs Union. The value of those loans is limited to an overall ceiling of EUR 450 000 000.

That Decision was at the origin of the extension of the contract for the provision of security signed by the European Community and the European Investment Bank on 19 July 2000 in Brussels and 24 July 2000 in Luxembourg, under which the guarantee is limited to 65 % of the total value of the appropriations made available plus all the related sums. The overall ceiling on the appropriations made available is equivalent to EUR 19 460 000 000 and covers a period of seven years from 1 February 2000 to 31 January 2007. If at the end of that period the loans granted by the European Investment Bank have not reached the abovementioned total values the period is extended by six months.

The 2005 Decision restructured the Mediterranean regional mandate to exclude Cyprus, Malta and Turkey which were included in the South Eastern Neighbours mandate.

3. Effect on the budget

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external actions (OJ L 293, 12.11.1994, p. 1) as last amended by Regulation (EC, Euratom) No 2273/2004 (OJ L 396, 31.12.2004, p. 28), any defaults are covered by this Fund within the limit of the amount available.

The effect on the budget is thus limited to:

- payment to the Fund of 9 % of the capital value of the lending and guarantee operations decided and committed after 1 January 2000,
- activation of the budget guarantee should the debtor default,
- the granting, in a series of cases, of interest-rate subsidies of 2 % in non-repayable aid, subject to the overall amounts laid down by the Financial Protocols.

Loans with new Member States cease to be external actions (see Regulation (EC, Euratom) No 2273/2004) and are therefore covered directly by the general budget and no longer by the Guarantee Fund.

2. Description

In response to a call made by the Council on 9 October 1989, the Board of Governors of the European Investment Bank decided on 29 November 1989 to authorise the Bank to provide loans from its own resources to finance investment projects in Hungary and Poland for a total amount not exceeding EUR 1 000 000 000. These loans are granted to finance investment projects which satisfy the Bank's usual requirements for loans from its own resources.

On 14 May 1991 and 15 March 1993 the Council, acting on a proposal from the Commission and after consulting Parliament, decided that this guarantee should be extended to any loans that the European Investment Bank might make in the other countries of central and eastern Europe (Czechoslovakia, Bulgaria and Romania) over a period of two years up to a maximum of EUR 700 000 000.

On 13 December 1993 the Council, acting on a proposal from the Commission and after consulting Parliament, decided to renew for three years the European Union guarantee for EUR 3 000 000 000 in European Investment Bank loans for projects in Poland, Hungary, the Czech Republic, the Slovak Republic, Romania, Bulgaria, Estonia, Latvia, Lithuania and Albania.

It covers a period of three years beginning on 31 January 1997. The Council decided on 14 December 1998 to amend Decision 97/256/EC in order to extend the Community guarantee to the European Investment Bank to loans for projects in Bosnia and Herzegovina. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is EUR 100 000 000 for a period of two years beginning on 22 December 1998. XIII. EUROPEAN COMMUNITY GUARANTEE FOR EUROPEAN INVESTMENT BANK LOANS TO SOUTH AFRICA

1. *Legal basis*

Council Decision 95/207/EC of 1 June 1995 granting a Community guarantee to the European Investment Bank against losses under loans for projects in South Africa (OJ L 131, 15.6.1995, p. 31).

This Decision is the basis of a contract of guarantee signed by the European Community and the European Investment Bank in Brussels on 4 October 1995 and in Luxembourg on 16 October 1995.

Council Decision 97/256/EC of 14 April 1997 granting a Community guarantee to the European Investment Bank against losses under loans for projects outside the Community (central and east European countries, Mediterranean countries, Latin American and Asian countries and South Africa) (OJ L 102, 19.4.1997, p. 33).

This Decision was the basis for a contract of guarantee between the EC and the European Investment Bank signed in Brussels on 25 July 1997 and in Luxembourg on 29 July 1997.

Council Decision 2000/24/EC of 22 December 1999 granting a Community guarantee to the European Investment Bank against losses under loans for projects outside the Community (central and eastern Europe, Mediterranean countries, Latin America and Asia and the Republic of South Africa) (OJ L 9, 13.1.2000, p. 24), as amended.

This Decision was the basis for a contract of guarantee between the European Community and the European Investment Bank signed in Brussels on 19 July 2000 and in Luxembourg on 24 July 2000.

Council Decision 2005/47/EC of 22 December 2004 amending Decision 2000/24/EC to take into account the enlargement of the European Union and the European Neighbourhood Policy (OJ L 21, 25.1.2005, p. 9).

Council Decision 2006/1016/EC of 19 December 2006 granting a Community guarantee to the European Investment Bank against losses under loans and loans guarantees for projects outside the Community (Pre-Accession countries, Neighbourhood and Partnership countries, Asia and Latin America and the Republic of South Africa) (OJ L 414, 30.12.2006, p. 95).

2. *Description*

In accordance with the provisions of Decision 95/207/EC, the European Union will guarantee European Investment Bank loans to South Africa up to a maximum total amount of EUR 300 000 000.

The budget guarantee covers all the debt-servicing (repayment of principal, interest and ancillary costs) in connection with these loans.

Acting on a proposal from the Commission and after consulting Parliament, the Council decided on 14 April 1997 to renew the Community guarantee to the European Investment Bank for loans for projects in the Republic of South Africa. The guarantee is restricted to 70 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling of the appropriations made available is equivalent to EUR 7 105 000 000, of which EUR 375 000 000 is for the Republic of South Africa. It covered a period of three years beginning on 1 July 1997 (with a possible six-month extension).

The European Investment Bank is invited to aim to cover the commercial risk on 25 % of its lending from non-sovereign guarantees.

Acting on a proposal from the Commission and after consulting Parliament, the Council decided on 22 December 1999 to renew the Community guarantee to the European Investment Bank for loans for projects in the Republic of South Africa. The guarantee is restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums. The overall ceiling for the Republic of South Africa is EUR 825 000 000. It covers a period beginning on 1 July 2000 and ending on 31 January 2007. If, on expiry of this period, the loans granted by the European Investment Bank have not attained the overall amounts referred to above, the period will be automatically extended by six months.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE GENERAL BUDGET

The European Investment Bank is invited to aim to cover the commercial risk on 30 % of its lending from non-sovereign guarantees. This percentage is to be increased whenever possible, in so far as the market allows.

Decision 2005/47/EC was the basis for a restated and amended contract of guarantee between the European Community and the European Investment Bank signed in Brussels on 30 August 2005 and in Luxembourg on 2 September 2005 setting up a guarantee restricted to 65 % of the aggregate amount of the appropriations made available, plus all related sums.

3. Effect on the budget

Since the entry into force of Council Regulation (EC, Euratom) No 2728/94 of 31 October 1994 establishing a Guarantee Fund for external actions (OJ L 293, 12.11.1994, p. 1) as last amended by Regulation (EC, Euratom) No 2273/2004 (OJ L 396, 31.12.2004, p. 28), any defaults are covered by this Fund within the limit of the amount available.

The effect on the budget is thus limited to:

- payment to the Fund of 9 % of the capital value of the lending and guarantee operations decided and committed after 1 January 2000,
- activation of the budget guarantee should the debtor default.

BORROWING-AND-LENDING OPERATIONS — BORROWING-AND-LENDING OPERATIONS GUARANTEED BY THE GENERAL BUDGET

Technical notes on Table 1

(a) For balance of payments, 'NCI' and 'Euratom' operations the amounts borrowed should correspond to the amounts lent.

However, the funds borrowed may be exchanged under swap operations for other currencies (at different interest rates) and these currencies are then lent.

Divergent movements in the parities against the euro of the currencies borrowed and lent are the reasons for the differences between the columns 'Repayments' and 'Amount outstanding' for borrowing-and-lending operations.

The differences in interest rates for the currencies used in borrowing-and-lending operations are the reasons for differences in the column 'Interest' for these two types of operations.

(b) Exchange rate: the amounts in column 2 'Equivalent at date of signature' are converted at the rate applicable on the date of signature. As regards refinancing operations, Table 1 shows both the initial operation (e.g. in 1979) and the replacement operation (e.g. in 1986), the amount for the latter being converted at the rate of the initial operation. The resulting duplication affects the annual figures but is eliminated in the total.

All other amounts are converted at the rate applicable at 31 December 2006.

(c) Column 3 'Initial amount received/paid up to 31 December 2006': with reference to 1986, for example, this column shows the cumulative total of all amounts received up to 31 December 2006 under loans signed in 1986 (table 1), including refinancing (which produces some duplication).

(d) Column 4 'Amount outstanding at 31 December 2006': these are net figures, with no duplication as a result of refinancing operations. They are obtained by subtracting from the column 3 figure the cumulative total of repayments made up to 31 December 2006, including repayments in respect of refinancing operations (total not given in the tables).

(e) Column 7 = column 4 – column 5.
