COMMISSION REGULATION (EC) No 976/2008

of 6 October 2008

amending Regulations (EC) No 2430/1999, (EC) No 418/2001 and (EC) No 162/2003 as regards the terms of the authorisation of the feed additive 'Clinacox', belonging to the group of coccidiostats and other medicinal substances

(Text with EEA relevance)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Regulation (EC) No 1831/2003 of the European Parliament and of the Council of 22 September 2003 on additives for use in animal nutrition⁽¹⁾, and in particular Article 13(3) thereof,

Whereas:

(1) The additive diclazuril (Clinacox 0,5 % Premix), belonging to the group of coccidiostats and other medicinal substances, was authorised under certain conditions in accordance with Council Directive 70/524/EEC⁽²⁾, Commission Regulations (EC) No 2430/1999⁽³⁾, (EC) No 418/2001⁽⁴⁾ and (EC) No 162/2003⁽⁵⁾ authorised that additive for 10 years for use for chickens for fattening, turkeys for fattening and chickens reared for laying respectively, linking the authorisation to the person responsible for putting that additive into circulation. That additive was notified as an existing product in accordance with Article 10 of Regulation (EC) No 1831/2003. Since all the information required under that provision was submitted, that additive was entered into the Community Register of Feed Additives.

(2) Regulation (EC) No 1831/2003 provides for the possibility of modifying the authorisation of an additive further to a request from the holder of the authorisation and an opinion of the European Food Safety Authority (the Authority). The holder of the authorisation of the additive diclazuril (Clinacox 0,5 % Premix) has submitted an application with which it proposes changing the conditions of the authorisation by introducing a maximum residue limit (MRL) as evaluated by the Authority. At the same time it provided the necessary data to support that request.

(3) In its opinion adopted on 16 April 2008⁽⁶⁾, the Authority concluded that no MRLs are required for chickens and turkeys for fattening. However, in case MRLs were considered necessary, it suggested values. Because it is possible that the chickens reared for laying enter in the food chain, not separately from the other chickens, it is necessary to consider the possibility to provide MRLs also for that animal category. It also considered that applying a withdrawal period of zero days would not compromise consumer safety.

(4) To ensure a high level of safety for the consumers and to improve the controls of the correct use of diclazuril, it is appropriate to establish MRLs as proposed by the Authority. Because there are no relevant physiological differences between the chickens for fattening and chickens reared for laying it is appropriate to establish the same MRLs also for the latter category.

(5) Commission Regulations (EC) No 2430/1999, (EC) No 418/2001 and (EC) No 162/2003 should therefore be amended accordingly.

(6) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

It is appropriate that the emergency measures provided for in Decision 2007/365/EC apply also to those plants.
- (3) The results of the emergency measures laid down in Decision 2007/365/EC were assessed by the Standing Committee on Plant Health in April 2008. It was concluded that the list of susceptible plants should be updated.

(4) Decision 2007/365/EC should therefore be amended accordingly.
