

2024/1744

24.6.2024

**COUNCIL DECISION (CFSP) 2024/1744**

**of 24 June 2024**

**amending Decision 2014/512/CFSP concerning restrictive measures in view of Russia's actions destabilising the situation in Ukraine**

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on European Union, and in particular Article 29 thereof,

Having regard to the proposal from the High Representative of the Union for Foreign Affairs and Security Policy,

Whereas:

- (1) On 31 July 2014, the Council adopted Decision 2014/512/CFSP<sup>(1)</sup>.
- (2) The Union remains unwavering in its support for Ukraine's sovereignty and territorial integrity.
- (3) In its conclusions of 14 and 15 December 2023, the European Council reiterated its resolute condemnation of Russia's war of aggression against Ukraine, which constitutes a manifest violation of the Charter of the United Nations, and reaffirmed the Union's unwavering support for Ukraine's independence, sovereignty and territorial integrity within its internationally recognised borders and its inherent right of self-defence against Russia's aggression. The European Council also stated that Russia's ability to wage its war of aggression must be further weakened, including by further strengthening sanctions, and through their full and effective implementation and the prevention of their circumvention, especially for high-risk goods, in close cooperation with partners and allies.
- (4) In view of the gravity of the situation, it is appropriate to adopt further restrictive measures.
- (5) It is appropriate to amend the prohibition to land in, take off from or overfly the territory of the Union so that it also applies to any aircraft which is used for a non-scheduled flight and with regard to which a Russian natural or legal person, entity or body is in a position to effectively determine the place or time of its take-off or landing, such as, for example, to fulfil the request of Russian natural persons to be transported to specific holiday destinations or the request of Russian legal persons to transport their employees to business meetings in the Union or their clients to tourist destinations. That amendment is aimed at avoiding circumvention practices of the prohibition to land in, take off or overfly the territory of the Union and at further pursuing the objective of indirectly exerting maximum pressure on the Russian Government in order to end its actions and policies destabilising Ukraine and the military aggression against it. The prohibition does not apply to an aircraft which a Russian person merely pilots without being in a position to effectively determine the place or time for its take-off or landing, such as in the case of pilots employed by non-Russian air carriers. It is appropriate to introduce an exemption for certain aircraft when used for private, non-corporate flights carried out within Union territory and airspace for recreational or training purposes.
- (6) With the aim of having a uniform set of rules across the Union and of combating circumvention of the flight ban, it is appropriate to also introduce an obligation for operators to provide, for non-scheduled flights, upon request of the competent authorities of the Member State of departure, destination or overflying, information needed for the purpose of verifying compliance with the flight ban, including information about ownership of the aircraft and, where reasonable grounds to suspect circumvention of the flight ban exist, about passengers. Such information should be provided within a deadline set by the competent authorities of the Member State or Member States concerned.
- (7) In order to minimise the risk of circumvention, it is appropriate to amend the prohibition on the transport of goods by road within the territory of the Union, including in transit. Union operators which are owned for 25 % or more by a Russian natural or legal person should be prohibited from becoming a road transport undertaking or from transporting goods by road in the Union, including in transit. The prohibition does not apply to road transport

<sup>(1)</sup> Council Decision 2014/512/CFSP of 31 July 2014 concerning restrictive measures in view of Russia's actions destabilising the situation in Ukraine (OJ L 229, 31.7.2014, p. 13).

undertakings owned by dual nationals or Russian nationals having a temporary or permanent residence permit in a Member State. Road transport undertakings should disclose their ownership structure to the national competent authorities, upon their request.

- (8) Given that there are considerable stocks of diamonds held outside Russia which no longer provide revenue to Russia, but which may need to be exported for processing or imported after processing, it is appropriate to clarify that rough diamonds imported from Russia prior to 1 January 2024 and polished diamonds imported from Russia or manufactured before 1 March 2024 or 1 September 2024, depending upon the weight of the diamond, are not covered by the diamond ban. It is also appropriate to amend the ban on Russian diamonds in order to enable the temporary import or export of jewellery for repairs, auctions and trade fairs. Additionally, it is appropriate to amend the scope of application and the date of entry into force of the requirement to provide traceability-based evidence.
- (9) The market for jewellery incorporating diamonds is global and closely interconnected. Restrictive measures concerning such jewellery are more effective and less likely to be circumvented when they are imposed in alignment with the Union's main partners, such as the G7. Therefore, the indirect import ban on Russian diamonds processed in third countries other than Russia, is temporarily not to apply to jewellery incorporating such diamonds until the Council decides otherwise in view of action taken within the G7 to pursue that measure.
- (10) Russia derives significant revenues from the sale and transport of liquified natural gas (LNG). It is appropriate to prohibit reloading services in the territory of the Union for the purposes of transshipment operations, where such services are used to transship Russian LNG, except in the case of such transshipments to Member States. The prohibition should cover both ship-to-ship transfers and ship-to-shore transfers and re-loading operations. Ancillary services related to such transshipments are also banned. The prohibition does not affect imports into the Union or the security of supply of Member States. The Commission should monitor and report to the Council LNG developments linked to the prohibition and propose mitigating measures in the event of important developments related to it.
- (11) It is also appropriate to prohibit new investment and the provisions of goods, technology and services for the completion of LNG projects such as Arctic LNG 2 and Murmansk LNG. That prohibition should not affect the purchase and import of LNG from Russian terminals and financial services provided to such LNG projects. Such a measure limits the expansion of Russia's LNG capacity and thereby limits Russia's revenues.
- (12) It is appropriate to introduce import restrictions on Russian LNG through Union LNG terminals that are not connected to the interconnected natural gas system. This is a targeted measure only affecting specific facilities in certain Member States. It does not impede in any way imports of Russian LNG through other facilities in the Union and does not have any adverse effects on the Union's gas market and on its security of supply, including on available volumes and prices. Those restrictions should not affect the supply of Russian LNG from the mainland of a Member State to its outermost regions.
- (13) It is appropriate to introduce a sectoral ban prohibiting access to Member States' ports and locks as well as a broad range of services related to maritime transport for vessels which contribute to Russia's ability to wage war against Ukraine. That measure should constrain the activity of vessels involved in the transport of goods generating revenue for Russia's warfare or vessels operated to contribute or support actions or policies supporting Russia's actions against Ukraine. Vessels subject to the restrictive measures are listed in Annex XVI to Decision 2014/512/CFSP. Union restrictive measures, being an essential tool of the Union's common foreign and security policy against Russia's war of aggression against Ukraine, are not directed at Union flagged vessels. Such vessels operate under, and must comply with their obligations in accordance with, Union and national law. The competent authorities of the Member States should implement and enforce Union restrictive measures in their respective jurisdictions in relation to Union flagged vessels. Furthermore, it is appropriate to clarify the scope of the port access ban for Russian-flagged vessels and to add a derogation.
- (14) It is appropriate to introduce a prohibition on purchasing, importing, transferring or exporting Ukrainian cultural property goods and other goods of archaeological, historical, cultural, rare scientific or religious importance, where there are reasonable grounds to suspect that the goods have been unlawfully removed from Ukraine. Furthermore, it is appropriate to introduce a prohibition on related services.

- (15) In 2020, Russia introduced new provisions in its Arbitration Procedure Code with the purpose of ensuring, unless otherwise established by an international treaty of Russia or by agreement of the parties, the exclusive competence of courts in Russia in disputes with the participation of persons in respect of which restrictive measures are applied or in disputes of one Russian or foreign person with another Russian or foreign person, if the basis for such disputes is restrictive measures. Such legislation, which has been extensively applied by Russian courts, has the clear objective or effect of forcing the satisfaction of claims against assets of Union companies in a foreign jurisdiction, claims which they would otherwise be prohibited from satisfying pursuant to Decision 2014/512/CFSP and Council Regulation (EU) No 833/2014<sup>(2)</sup>, or pursuant to Council Decision 2014/145/CFSP<sup>(3)</sup> and Council Regulation (EU) No 269/2014<sup>(4)</sup>. Consequently, with a view to increasing the costs on the Russian Federation of its illegal actions in Ukraine, and determining it to end such actions, it is appropriate to enable the possibility to subject companies which make use of those provisions of Russian law to a transaction ban.
- (16) The Central Bank of Russia has developed the ‘System for Transfer of Financial Messages’ (SPFS), a specialised financial messaging service to exchange financial data, which is aimed at neutralising the impact of the measures established in Decision 2014/512/CFSP and Regulation (EU) No 833/2014, in particular concerning the banking and financial sector. With a view to containing the development of the SPFS, reducing Russia’s capacity to wage war and preventing the frustration of the measures established in Decision 2014/512/CFSP and Regulation (EU) No 833/2014, it is appropriate to prohibit Union entities which operate outside of Russia from directly connecting to the SPFS or equivalent specialised financial messaging services set up by the Central Bank of Russia, and to add a transaction ban on Union operators with specifically listed entities using that system outside Russia. Those measures do not concern entities established and operating in Russia, including subsidiaries of Union entities. Union entities should not be prohibited from dealing with Russian entities which use the SPFS, provided that those Union entities do not connect to the SPFS themselves. In addition, in order to avoid unintended consequences on the financing of, and payment for, legitimate business transactions and transactions for other justified purposes, targeted exceptions should be introduced allowing Union entities to connect to the SPFS.
- (17) Certain credit and financial institutions established outside of the Union might be facilitating transactions that frustrate the measures established in Decision 2014/512/CFSP and Regulation (EU) No 833/2014. Therefore, it is appropriate to establish a transaction ban on Union operators with credit and financial institutions as well as crypto assets providers, established outside of the Union, when the Council has determined that those entities facilitate transactions that support Russia’s defence-industrial base through the export, supply, sale, transfer or transport towards Russia of dual-use goods and technology, sensitive goods and technology, common high priority items or firearms and ammunition.
- (18) It is appropriate to further broaden the existing prohibition on the provision of support, including financing and financial assistance or any other benefit, from a Union, Euratom or Member State programme to any legal person, entity or body established in Russia or to any legal person, entity or body majority owned by them. Targeted exemptions should also be introduced.
- (19) In order not to unduly restrict the right to employment of Union nationals who resided in Russia before the invasion of Ukraine in February 2022 and who are employed by subsidiaries of Union and of partner countries’ entities in Russia, an exemption should be introduced from the prohibition to provide certain services to the Government of Russia or to legal persons, entities or bodies established in Russia.
- (20) The Russian Government and Russian courts have been undertaking actions to illegitimately deprive Member State intellectual property rights holders of their protection in Russia. This has resulted in an undue competitive advantage for the Russian industry and contributed to Russia’s revenues, further enabling it to wage war in Ukraine. In order to neutralise that, it is appropriate to impose restrictions on accepting applications for registrations in the Union of certain intellectual property rights by Russian nationals, natural persons resident in Russia and Russian companies.

(2) Council Regulation (EU) No 833/2014 of 31 July 2014 concerning restrictive measures in view of Russia’s actions destabilising the situation in Ukraine (OJ L 229, 31.7.2014, p. 1).

(3) Council Decision 2014/145/CFSP of 17 March 2014 concerning restrictive measures in respect of actions undermining or threatening the territorial integrity, sovereignty and independence of Ukraine (OJ L 78, 17.3.2014, p. 16).

(4) Council Regulation (EU) No 269/2014 of 17 March 2014 concerning restrictive measures in respect of actions undermining or threatening the territorial integrity, sovereignty and independence of Ukraine (OJ L 78, 17.3.2014, p. 6).

In particular, and without prejudice to their procedural rules, Intellectual Property Offices and other competent institutions should not allow the filing of such applications. Moreover, in complying with that obligation, if any such applications are filed, Intellectual Property Offices and other competent institutions should not be required to issue a formal decision of refusal, thereby allowing the possible re-filing once the current restriction is repealed. In order to implement that restriction, Intellectual Property Offices and other competent institutions should be enabled to request the necessary information from natural persons and companies applying for registration of the relevant intellectual property rights.

- (21) It is appropriate to prohibit the acceptance, by political parties, foundations, alliances, non-governmental organisations, including think tanks, and media service providers in the Union, of financing, donations or any other economic benefits or support from Russia, whether directly or indirectly. In view of the continued concerted efforts by Russia to interfere with democratic processes in the Union and to undermine its democratic foundations, including through influence campaigns and the promotion of disinformation aimed at undermining the territorial integrity, sovereignty and independence of Ukraine and through promoting pro-Russian propaganda aimed at justifying and supporting Russia's war of aggression against Ukraine, it is appropriate that funding from Russia and its proxies to actors in the Union which form part of the public-opinion forming processes be prohibited. Those propaganda and disinformation campaigns are capable of undermining the foundations of democratic societies and are an integral part of the arsenal of modern hybrid attacks. Restricting that financial support aims to safeguard the integrity of the Union's political processes, protect Union citizens from manipulation and defend the internal affairs of the Union from malign interference by ensuring the protection of the principles of rule of law, democracy and media pluralism. Member States can counter such interference with democratic processes and undermining of democratic foundations, as appropriate within the confines of existing national compliance frameworks. Consistent with the fundamental rights and freedoms recognised in the Charter, in particular with the right to freedom of expression and information, the freedom to conduct a business and the right to property as recognised in Articles 11, 16 and 17, respectively, thereof, that restriction does not prevent media service providers and their staff from carrying out any other activities in the Union, such as research and interviews. Moreover, that restriction does not modify the obligation to respect the rights, freedoms and principles referred to in Article 6 of the Treaty on European Union, including in the Charter, and in Member States' constitutions, within their respective fields of application.
- (22) With a view to increasing awareness of enforcement action, it is appropriate that Member States report about penalties imposed for violations of the restrictive measures.
- (23) It is appropriate to introduce a derogation to allow the satisfaction of certain claims brought by Russian persons, entities and bodies if that is strictly necessary for the divestment from Russia or the wind-down of business activities in Russia.
- (24) To help combat the re-exportation of common high priority items found on the battlefield in Ukraine or critical to the development, production or use of Russian military systems, it is appropriate to require Union operators that are selling, supplying, transferring or exporting common high priority items to third countries, other than the partner countries listed in Annex VIII to Regulation (EU) No 833/2014, to implement due diligence mechanisms capable of identifying and assessing risks of re-exportation to Russia and mitigating such risks. Moreover, it is appropriate to require Union operators to ensure that legal persons, entities and bodies established outside the Union that they own or control also implement those requirements.
- (25) Decision 2014/512/CFSP requires Union operators to contractually prohibit the re-exportation to Russia and re-exportation for use in Russia of sensitive goods and technology, certain common high priority items, or firearms and ammunition ('no-Russia clause'). In the case of contracts falling within the scope of Article 5b of Decision 2014/512/CFSP that were concluded before 19 December 2023, the obligation under that Article should be considered as met if the contract contains a general clause that prohibits exportation and re-exportation of the goods and technology in question to jurisdictions targeted by Union restrictive measures, and sets out adequate remedies in the event of a breach of that clause.
- (26) The Commission will assess the impact that the entry into force of the existing obligation under Article 5b of Decision 2014/512/CFSP to use a 'no-Russia clause' has on deterring circumvention. It will also assess very closely trade data, export statistics and other information concerning circumvention patterns regarding the goods referred

to in that Article, including the role that subsidiaries of Union operators in third countries may play in such patterns. On that basis, the Commission will assess whether the 'no-Russia clause' is appropriate for its purpose and consider any other appropriate actions to curb Russia's access to sensitive goods which enable it to pursue the war in Ukraine, including the possibility of requiring Union operators to ensure that their subsidiaries in third countries also use the 'no-Russia clause'.

- (27) It is appropriate to require Union operators to contractually prohibit their commercial counterparts in third countries from using, or allowing the use of, the intellectual property rights, trade secrets or material or information protected by intellectual property rights or protected as trade secret transferred to them in connection with common high priority items to be sold, supplied or exported to Russia or for use in Russia. To ensure compliance with that obligation, Union operators should include an obligation to adopt proper remedies in such agreements. Union operators should report any breaches detected to the national competent authorities. In the case of contracts falling within the scope of this restriction that were concluded before 25 June 2024, that obligation should be considered as met if the contract contains a general clause that prohibits using, or allowing the use of, the intellectual property rights, trade secrets or material or information protected by intellectual property rights or protected as trade secret in question, and sets out adequate remedies in the event of a breach of that clause.
- (28) In order to ensure alignment with the interpretation of the Court of Justice of the European Union in Case C-72/11, it is appropriate to amend the provision prohibiting circumvention to clarify that the requirements of knowledge and intent are met not only where a person deliberately seeks the object or effect of circumventing restrictive measures but also where a person participating in an activity having the object or effect of circumventing restrictive measures is aware that such participation may have that object or that effect, and accepts that possibility.
- (29) It is appropriate to add 61 new entities to the list of natural or legal persons, entities and bodies set out in Annex IV to Decision 2014/512/CFSP, namely the list of persons, entities and bodies supporting Russia's military-industrial complex in its war of aggression against Ukraine, on which tighter export restrictions regarding dual-use goods and technology, as well as goods and technology which might contribute to the technological enhancement of Russia's defence and security sector, are imposed. In addition, it is justified to include on that list certain entities in third countries other than Russia that are involved in the circumvention of trade restrictions and that engage in the procurement of sensitive items used for, for example, the production of Unmanned Aerial Vehicles, or that provide material support for Russian military operations.
- (30) It is appropriate to expand the list of items which contribute to Russia's military and technological enhancement or to the development of its defence and security sector by adding items which have been used by Russia in its war of aggression against Ukraine and items which contribute to the development or production of its military systems, including certain machine tools and certain 'All Terrain Vehicles'.
- (31) It is appropriate to impose further restrictions on exports of goods which could contribute in particular to the enhancement of Russian industrial capacities, such as chemicals, including manganese ores and compounds of rare-earths, plastics, excavating machinery, monitors and electrical equipment. In addition, five common high priority items should be added to the restrictions on exports of goods.
- (32) Additionally, it is appropriate to introduce further restrictions on the import of helium which generates significant revenues for Russia, thereby enabling the continuation of its war of aggression against Ukraine.
- (33) The price cap mechanism provides that specific projects that are essential for the energy security of certain third countries may be exempted from the price cap agreed by the Price Cap Coalition. In close coordination with the Price Cap Coalition, the exemption provided for in relation to the Sakhalin-2 (Сахалин-2) Project, located in Russia, should be extended until 28 June 2025 to ensure Japan's energy security needs.
- (34) In line with the Union's common foreign and security policy objectives of preserving peace, reinforcing international security and promoting international cooperation, democracy and the rule of law, and more specifically the objectives pursued by Decision 2014/512/CFSP, it is appropriate to ensure that documents held by the Council, the Commission and the High Representative of the Union for Foreign Affairs and Security Policy ('the High Representative') concerning the enforcement of the restrictive measures set out in Decision 2014/512/CFSP or in

Regulation (EU) No 833/2014, or concerning the prevention of the violation or circumvention of those measures, are subject to professional secrecy and enjoy the protection afforded by the rules applicable to the Union institutions, since information contained in those documents could be used to obstruct the enforcement of those measures or to compromise their effectiveness, given that the persons and entities concerned could act in such a way as to prevent their enforcement. That protection should also be ensured for proposals from the High Representative for the amendment of Decision 2014/512/CFSP and any related preparatory documents as their disclosure might affect the effectiveness of the measures set out in Decision 2014/512/CFSP and the preparation of, and negotiation on the basis of, future proposals. Certain measures which are included in such proposals, and which cannot be adopted by the Council for various reasons, are often included by the High Representative in subsequent proposals. It is important to protect that power of initiative from any influence exerted by public or private interests that attempt, outside of organised consultations, to compel the Union institutions and Union services to propose, adopt, amend or agree on an amendment. Their disclosure could render the possible new measures ineffective due to the fact that their intended adoption would have already been revealed. Thus, it should be presumed that disclosure of those documents would harm the security of the Union or that of one or more of its Member States or the conduct of their international relations.

- (35) It is appropriate to expand the lists of partner countries that apply a set of export control measures or a set of restrictive measures on imports of iron and steel and a set of import control measures which are substantially equivalent to those set out in Decision 2014/512 (CFSP) and in Regulation (EU) No 833/2014.
- (36) The Union is committed to avoiding threats to nuclear safety and security. Consequently, the measures in this Decision do not seek to undermine the planning, construction and engineering, commissioning, maintenance or fuel supply of the newly built nuclear project Paks II. For that reason, it is appropriate to introduce a horizontal exemption from the prohibitions in this Decision for the Paks II project, with a notification obligation for such activities.
- (37) Finally, it is necessary to make certain technical amendments, including by deleting references to transitional periods which have expired. The deletion of references to transition periods which have already expired is not intended to have any legal effects on past or ongoing contracts or on the applicability of those transition periods.
- (38) Further action by the Union is needed in order to implement certain measures.
- (39) Decision 2014/512/CFSP should therefore be amended accordingly,

HAS ADOPTED THIS DECISION:
