Data governance and quality

Turn data into
business assets

Build new sources of
value with data
governance and quality

A smart approach to enterprise data governance makes it easy to discover, consume and monetize data - building a data marketplace that creates value for the organization.

In today's digital economy, many organizations struggle with rigid data platforms that are unable to scale – making it difficult to manage and govern the growing volume, variety and velocity of data. Deriving value from data at scale requires connecting data silos, ensuring high-quality data to support business decisions, managing data relationships and democratizing data across the enterprise.

Of course, data security is an essential part of any enterprise data strategy, and a proper governance framework is essential to securely move data to cloud infrastructure and enable the Green IT benefits of energy and resource efficiency.

Eviden solution

Eviden's data governance and quality offering helps enterprises build a well-defined data governance framework that enables them to define guidelines and rules for enterprise-level data management. It includes all essential facets of data governance, including region-specific regulations, guidelines and rules, best practice data standards, data quality scores, and tracking data lineage across enterprise data pipelines.

Our data governance and quality services are ROI-driven and designed to eliminate the risk of migrating from traditional to modern data architectures like cloud, multi-cloud and hybrid. They include:

Enterprise data cataloging

Master data management

Data quality management

Data security

Data observability

Eviden in action

Data cataloging and protection for a Fortune 100 insurer

Eviden is helping a leading property and casualty insurer lay the foundation for a new enterprise data platform by building enterprise-scale data catalogs and establishing data governance practices.

The insurer was facing regulatory pressures brought on by customer data privacy requirements that vary according to the different US states it serves. To address these challenges, it needed to build a common information model, effectively handle data duplication, and track data pipelines to ensure data privacy and security.

Eviden stepped in and built unified platforms for all the company's data assets, providing a holistic data view and enabling the insurer to explore, discover and reuse data across the enterprise. Our solution delivered:

Visibility into PII data across the enterprise

Self-service access that enabled business users to securely explore, discover, sanitize and reuse data

Accelerated time to market for new products by operationalizing data assets more quickly

Data quality and governance for a global financial services leader

Eviden has worked closely with a major credit card and financial services company to advance its data quality and governance journey. In collaboration with the client, specialists from Eviden's Data Governance Center of Excellence helped customize its data quality and data governance frameworks.

Our teams designed, developed and implemented data stewardship workflows and data quality strategies including profiling, metrics, score carding and reporting. These efforts have delivered value to the client by:

Improving end user confidence in data

Improving the accuracy & consistency of customer & Merchant information

Making reports more maintainable and consistent

Accelerating speed to market, by reducing the time to onboard new applications

EVIDEN

About Eviden ¹

Eviden is a next-gen technology leader in data-driven, trusted and sustainable digital transformation with a strong portfolio of patented technologies. With worldwide leading positions in advanced computing, security, AI, cloud and digital platforms, it provides deep expertise for all industries in more than 53 countries. Bringing together 57,000 world-class talents, Eviden expands the possibilities of data and technology across the digital continuum, now and for generations to come. Eviden is an Atos Group company with an annual revenue of c. € 5 billion.

¹ Eviden business is operated through the following brands: Alia Consulting, AppCentrica, ATHEA, Atos Syntel, Bull, Cloudamize, Cloudreach, Cryptovision, DataSentics, digital.security, Eagle Creek, EcoAct, Edifixio, Energy4U, Engage ESM, Forensik, IDEAL GRP, IDnomic, In Fidem, Ipsotek, Maven Wave, Miner & Kasch, Motiv, Nimbix, Processia, Profit4SF, science+computing, SEC Consult, Visual BI, Worldgrid, X-Perion, zData

About Atos

Atos is a global leader in digital transformation with 112,000 employees and annual revenue of c. € 11 billion. European number one in cybersecurity, cloud and high performance computing, the Group provides tailored end-to-end solutions for all industries in 71 countries. A pioneer in decarbonization services and products, Atos is committed to a secure and decarbonized digital for its clients. Atos is a SE (Societas Europaea) and listed on Euronext Paris.

The purpose of Atos is to help design the future of the information space. Its expertise and services support the development of knowledge, education and research in a multicultural approach and contribute to the development of scientific and technological excellence. Across the world, the Group enables its customers and employees, and members of societies at large to live, work and develop sustainably, in a safe and secure information space.
