Executive Summary

During the summer of 2019, 1,137 applications were submitted to the UKFPO's Eligibility Office in advance of the national application to the UK Foundation Programme. A total of 635 applicants were deemed eligible to apply for foundation programme places, 568 (89.45%) of whom later submitted applications to the Foundation Programme (FP), a further 168 (29%) of whom also applied to Academic Foundation Programmes (AFP).

A total of 40 (7.04%) eligibility applicants also applied for Psychiatry Fellowship Programmes (PFF) and 140 (24.69%) chose to apply for Foundation Priority Programmes (FPP) as well.

In addition to the 635 applicants nominated by the UKFPO's Eligibility Office, 7,594 applicants were nominated by UK medical schools. This compares to 7,608 UK nominees in the previous year for 2019.

At the start of the application process, 7,962 applicants applied to the UK Foundation Programme. A total of 1,747 applicants also applied to AFP, with 252 applicants applying for PFF and 1,408 applicants applying for FPP as well. Of those applicants who chose to apply for AFP, 369 also applied for FPP and 93 also chose to apply for PFF. There were 94 applicants who applied for PFF and FPP, but not for AFP and 512 applicants applied for all three programmes, i.e. AFP, PFF and FPP.

A total of 41 applicants were identified as not having met the minimum requirements of the Situational Judgement Test (SJT). Applicants were invited to attend a face-to-face review of their SJT outcomes. A total of 32 applicants attended the review, 15 (47%) of whom were reinstated to the application process with their original SJT score.

A total of 558 AFP posts were advertised in the Autumn of 2019, 551 of which were included in the offers process in January 2020. The overall fill rate for AFP was 99.45%, which is comparable to previous years.

A total of 40 PFF posts were available across England, 33 of which were appointed to. The fill rate for PFF was 82.50%. A total of 319 offers were made for FPP, 107 of which were accepted. The fill rate for FPP was 33.54%. In the majority of cases, unfilled AFP, PFF and FPP posts were included in the main allocation for FP.

In March 2020, 6,855 (96%) applicants were allocated to the primary list. There was a reserve list of 260 applicants. As part of the primary list allocation, 94% of applicants were allocated to one of their top five preferences, 75% were placed at their first preference foundation school, and 83% of applicants allocated to the primary list were placed at one of their top two foundation schools. Less than 6% of primary list applicants were allocated to a preference choice lower than five.

As of 6th October 2019, all medical practitioner roles have been added to the UK Shortage Occupation List (SOL). This includes all postgraduate medical training posts at foundation level. International Medical Graduates (IMGs) applying for training posts in the UK are therefore now exempt from the Resident Labour Market Test (RLMT) and their applications are considered against the same criteria as UK graduates. For UKFP 2020, all applicants were ranked in order of score and preference information regardless of their right to work status in the UK.

A total of 258 applicants were placed on the reserve list this year. The number of applicants placed on the reserve list has decreased compared to 2019 when the list comprised 425 applicants. The reserve list was still higher than in previous years: 45 in 2016 and 25 in 2017, 202 in 2018.

Of the 258 applicants placed on the reserve list, 164 (64%) were UK medical school nominees and 94 (36%) were eligibility applicants.

A total of 6,763 applicants were matched to individual programmes at the beginning of April 2020.

Reserve list batch allocations were scheduled for May and June, details of which have been published later in this report. All applicants were allocated to training places by Thursday 27th June 2020.

Background / Introduction

To apply for the UK Foundation Programme, applicants must be nominated by a UK medical school or the UKFPO's Eligibility Office. Nominated applicants were invited to register and submit an online application form(s) through the national application system, Oriel. All applicants were required to submit an application to the national FP vacancy.

Applicants then had the option to apply to a maximum of two AFP vacancies managed by individual Academic Units of Application (AUoAs). There are fifteen AUoAs, which are either individual foundation schools or a cluster of foundation schools operating in close proximity. Applicants can apply to up to two AUoAs and will have been required to rank individual programmes as part of the application form(s).

For 2020, two new recruitment processes were introduced to select applicants for appointment to the Psychiatry Foundation Fellowship (PFF) Programmes and Foundation Priority Programmes (FPP). These programmes are intended to promote fill in hard to reach geographical and specialty areas. Applicants had the option to apply to either or both of these programmes once they had submitted their main application for FP. The PFF posts were designed in collaboration with the Royal College of Psychiatrists and offer additional exposure to Psychiatry. The FPP posts were identified by individual foundation schools as typically being hard to fill posts for a variety of reasons. These posts offer a range of incentives. The overarching incentive associated with both the PFF and FPP posts is that applicants were notified of their individual programme offers ahead of the national allocation to foundation schools, which offered some security and is thought to have alleviated anxiety for some applicants through notification of their posts for the two year programme earlier in the timeline.

The report summarises the key information in regard to the allocation and recruitment processes for all foundation training places, including details of reserve list batch allocations for two-year programmes and F2 Stand-alone posts.

In Oriel, the term vacancy is used in reference to the advert to which applicants are invited to apply and preference individual programmes. A single vacancy on Oriel holds details of available places at A/UoA level, group level and individual programme level. All allocation and recruitment processes are progressed within the vacancy. There were 18 vacancies published for 2020: 1 national FP vacancy, 15 local AFP vacancies, 1 national FPP vacancy and 1 England only PFF vacancy.

Foundation Schools

Foundation schools are not bricks and mortar institutions. They are a conceptual group of institutions that bring together medical schools, the local health organisation, local education providers and other organisations such as hospices. They aim to offer training to foundation doctors in a range of different settings and clinical environments. The schools are administered by a central local staff which is supported by the local office / deanery.

Training is delivered according to national guidance developed by the UKFPO. There are local variations in some areas. There are a total of 15 AUoAs and 20 foundation schools across the UK Foundation Programme: 17 in England and 1 in each of the devolved nations (Northern Ireland, Scotland and Wales).

COVID-19

Qualifying medical students were registered early this year and asked to support the frontline this year due to unprecedented circumstances in relation to the COVID-19 pandemic. Details of allocations to foundation schools have been provided.

Academic Foundation Programme (AFP)

Background and Introduction

All applicants were required to apply to the national FP vacancy before submitting applications to AFP. Applicants then had the option to apply to a maximum of two AFP vacancies.

A separate vacancy was set up on Oriel for each AUoA. The content of the vacancies was standardised. There were fifteen AUoA vacancies advertised in total. Applicants had the option to apply to a maximum of two AUoAs. Individual programmes were advertised as part of each AUoA vacancy. Applicants were invited to preference programmes using a drag and drop functionality as part of each AFP application.

Each AUoA had the option to include a maximum of 6 white space questions as part of the 'supporting' section of the application form. Of the 15 AUoAs, 13 opted to include between 3 and 6 white space questions as part of the application. Applicants are not asked to provide a Curriculum Vitae (CV).

The AFP match ranking score comprised of the EPM Decile Score + AUoA Score. The AUoA score was determined locally as in previous years.

Applications to AFP

A total of 558 AFP places were advertised across the UK for 2020; 483 in England, 9 in Northern Ireland, 54 in Scotland and 12 in Wales. Vacancies were advertised on behalf of 15 AUoAs.

A total of 2,558 applications submitted across the 15 AUoA vacancies on Oriel, with 1,747 individuals submitting AFP applications, 811 (46%) of which applied to two AUoAs. The number of AFP applications submitted and the number of individuals applying for AFP has remained relatively static since 2018.

The table below shows a comparison of the number of applicants who applied to AFP and the total number of AFP applications submitted for 2016, 2017, 2018, 2019 and 2020.

Table 1.1: AFP Applications

Applications to AFP	2016	2017	2018	2019	2020
Number of AFP applications submitted	2,252	2,169	2,729	2,778	2,558
Number of individuals who applied for AFP	1,490	1,444	1,802	1,804	1,747

The table below shows the number of AFP applications submitted for 2017, 2018, 2019 and 2020.

Table 1.2: Number of Applications Submitted by Individual Applicants

Number of Applications to AFP	2017		2018		2019		2020	
Applicants who submitted one application	721	49%	875	48%	830	46%	811	46%
Applicants who submitted two applications	723	51%	928	52%	974	54%	936	54%

The number of applicants choosing to apply to two academic foundation schools remains relatively static at approximately fifty percent of the total number of applicants for AFP.

There was a 14% increase in the number of eligibility applicants applying AFP compared to last year.

Applications by Medical School

The table below shows the overall number and percentage of applicants who applied for AFP, the total number of applications for AFP, and the number and percentage of AFP applicants who applied to two AUoAs by medical school.

Table 1.3: Applications by Medical School and Number of Applicants Who Applied to Two AUoAs

AFP Offers

By the time of the offers process in January 2020, a total of 551 posts were available. A total of 760 AFP offers were made in addition to the national FP allocations. A total of 548 offers were accepted, with 12 out of the 15 AUoAs filling all of their posts. The overall fill rate for AFP was 99.45% across the UK.

The majority (75.14%) of posts were filled during the initial round of offers. Of the 15 AUoAs, 4 had filled all of their posts by the end of the first offers cascade, with 7 AUoAs having filled all of their posts by the end of the second cascade and 9 AUoAs having filled all of their posts by the end of the third cascade of offers.

The overall fill rate was 99.45%, with 12 out of 15 AUoAs having filled all their available posts.

The table below provides the AFP fill rate for each cascade of offers.

Table 1.5: AFP Fill Rates

Offer Stage	Programmes	Offers Made	Offers Accepted	Fill Rate
Initial Offers	551	551	414	75.14%
First Cascade	137	137	103	77.50%
Second Cascade	35	35	22	97.82%
Third Cascade	11	10*	4	98.73%
'Mop Up'	7	4	4	99.45%
Overall	3	4	548	99.45%

*Wessex Foundation School had exhausted their applicant point at this stage, hence the reason for not making any new offers despite not having filled all of their vacancies and reached an 100% fill rate.

A total of 194 offers were declined or expired across the applicant cohort throughout the offers process. This compares to 201 the previous year.

Applications and Offers by AUoA

The table below shows the number of posts available, the number of applications received, the number of offers made and accepted, and the number of unfilled AFP posts by AUoA.

Table 1.6: Applications and Fill Rate by AUoA

AUoA	Posts	Applications	Offers Made	Offers Accepted	Unfilled Posts
East Anglia - Cambridge	24	123	33	24	0
East Anglia - Norfolk	12	38	13	12	0
East Midlands	48	109	65	48	0

Totals	551	2,558	764	548	3

Ratios and Fill Rates by Academic Unit of Application (AUoA)

The online application forms for AFP are standardised with some local variation. AUoAs constructed the evidence and supporting sections of the application form. The evidence section invites applicants to provide details of additional achievements such as additional degrees, publications, presentations and prizes. Applicants may also be asked to complete a maximum of six white space questions as part of the supporting information section.

After completing the online application form(s), applicants followed local selection processes depending on which AUoA(s) they applied to. There was a single national offers date, followed by three cascade offers dates. After the third cascade, AUoAs were at liberty to contact applicants directly in attempt to fill any outstanding places; this is referred to as the 'mop-up' process.

There was the option for AFP programmes that were left unfilled to be converted to FP programmes for inclusion in the FP allocation process.

The table below shows the number of AFP vacancies, the number of applications received, the ratio of vacancies to application and the fill rate for each AUoA.

Table 1.7: Ratios and Fill Rates by AUoA

Academic Unit of Application (AUoA)	Number of Vacancies	Number of Applications	Vacancies: Applications Ratio	Fill Rate
East Anglia: Cambridge	24	123	5.13	100.00%
East Anglia: Norfolk and Norwich	12	38	3.17	100.00%
East Midlands	48	109	2.27	100.00%

Applications and Offers by Medical School

Of the total 1,747 applicants who applied for AFP, 648 (37.09%) received at least one offer for an academic training programme. A total of 547 / 648 (84.41%) applicants who received offers, accepted their offer.

The table below provides details of the number and percentage of applicants who received and accepted offers for AFP posts by medical school.

Table 1.8: Applications by Medical School

* UK Med School used for UK graduates applying through the Eligibility Office.

Psychiatry Foundation Fellowships (PFF)

The Royal College of Psychiatrists proposed to appoint 40 fellows, in collaboration with the UKFPO through a competitive process. The posts were located across England only but applicants from all four nations were eligible to apply. The scheme aimed to identify medical students who had expressed an interest in psychiatry as a potential career choice and to support them through to application for specialty training.

As well as having access to educational opportunities relevant to psychiatry, trainees will also access funded weekly psychiatric supervision and be able to attend reflective Balint groups. This is to introduce a strong emphasis on the psychological aspects of medicine to enhance the educational opportunities afforded in non-psychiatric rotations. Fellows may also choose to be linked to College faculties for additional mentoring in a potential subspecialty of interest. Psychiatry supervisors will deliver weekly psychiatric supervision which will run throughout the two-year foundation programme.

Applicants with a keen interest in Psychiatry were encouraged to submit a separate application for PFF. Shortlisted applicants were required to attend an interview. Offers for these posts were made after AFP offers, prior to offers for FPP and national allocation to foundation schools.

PFF Applications

A total of 40 PFF places were advertised. All nominated and eligible applicants had the option to apply for PFF once they had submitted their FP application. A total of 252 (3.16%) applicants applied for PFF; 213 UK nominees (2.88%) and 39 applicants (6.87%) who applied through the eligibility process.

The table below shows the number and percentage of applicants for PFF by the home foundation school.

Table 2.1: Applications for PFF by Foundation School

Home Foundation School	Number who Applied for FP	Applicants Who Applied for PFF	Percentage Who Applied for PFF
East Anglia	434	20	4.61%

Total	252		

Over half of the applicants who applied for PFF indicated that they wanted to work in London.

PFF Interview Outcomes

A total of 80 applicants were invited to interview, 78 of whom were deemed appointable.

PFF Offers

A total of 3 offer rounds were progressed on the Oriel system with all applicants who had scored highly enough at interview receiving an offer. A final round of offers was conducted offline to offer any posts that remained unfilled to applicants who had initially chosen not to rank the specific posts available. A total of 3 additional offers were accepted during this phase, leaving 7 posts vacant.

The table below provides a summary of the number of offers made and accepted in each round.

Table 2.3: PFF Offers Summary

Offer Round	Offers Made	Offers Accepted
1	40	21
2	13	7
3	3	2
4	4	3
Totals	60	33

At the end of the offers process, a total of 7 programmes remained unfilled: 2 in Northern, 1 in Peninsula, 1 in Severn, 1 in West Midlands North and 2 in Yorkshire and Humber.

The table below provides offers information by foundation school.

Table 2.4: PFF Offers by Foundation School

PFF Preference Information

Of the 33 applicants who accepted offers, 11 (33.33%) were allocated to their first preference, 14 (42.42%) applicants accepted offers for one of their top two preferences and 20 (60.60%) applicants accepted offered for one of their top five choices.

The lowest preference where offers were accepted was where the applicants had ranked the programmes as their tenth preference.

The table below provides information about the programme preferences ranked by foundation school for applicants who accepted offers.

Table 2.6: PFF Applicant Preferences by Foundation School

Foundation Priority Programmes (FPP)

Foundation Priority Programmes (FPP) have been developed to support specific areas of the UK that have historically found it difficult to attract and retain trainees through the foundation and specialty recruitment processes. Priority programmes, specifically designed to attract and retain trainees in remote, rural and coastal geographies, under-doctored geographies and shortage specialties, with psychiatry as an initial priority, have been introduced and evaluated. These programmes offer a range of incentives. FPP places were available across 12/20 foundation schools, including the devolved nations.

For 2020, a total of 322 priority programme places were initially advertised. Applicants had the opportunity to rank individual priority programmes as part of the application form and prior to national allocation to FP. Successful applicants were offered specific programmes prior to national allocation to foundation schools.

FPP Applications

All eligible applicants had the option to apply for FPP once they had submitted their FP application. A total of 1,408 (17.68%) applicants applied for FPP; 1,249 UK nominees (16.91%) and 158 applicants (27.82%) who applied through the eligibility process.

The table below shows the number and percentage of local applicants for FPP by foundation school.

Table 3.1: Applications for FPP by Foundation School

Home Foundation School	Eligible Applicants who Applied for FP	Number of Applicants Who Applied for FPP	Percentage of FP Applicants Who Applied for FPP
East Anglia	434	89	20.51%
Essex, Bedfordshire and Hertfordshire (EBH)	N / A	N / A	N / A
Leicestershire, Northamptonshire and Rutland (LNR)	185	29	15.68%
North Central and East London	599	132	22.04%

Yorkshire and Humber	597	68	11.39%
Eligibility Office	568	158	27.82%
Totals	7,962	1,408	16.91%

The highest proportion of UK nominees applied from Northern, London and West Midlands Foundation Schools. FPP places were available across the following foundation schools: East Anglia, Essex, Bedfordshire and Hertfordshire (EBH), North Central and East London, Northern, Northern Ireland, Scotland, South Thames, Trent, Wales, Wessex, West Midlands North and West Midlands South.

The table below shows the number of applicants, applicants who ranked the school first, as one of their top two preferences, as one of their top five preferences, and the competition ratio for each school / region.

Table 3.2: FPP Preference Information and Competition Ratios

Foundation School/ Region	Number of FPP Places	Applicants Who Ranked the School First	Applicants Who Ranked the School in their Top Two	Applicants Who Ranked the School in their Top Five	Competition Ratio
East Anglia	39	120	248	583	3.08
EBH	43	148	307	1073	3.70
London	40	497	927	1385	12.43
Northern	82	207	408	977	2.52
Northern Ireland	8	27	51	86	3.38
Scotland - North	6	37	72	151	6.17
Scotland - West	36	79	159	429	2.19
Trent	30	72	152	368	2.40
Wales	9	9	18	44	1.00
Wessex	5	49	94	189	9.80
West Midlands North	9	88	163	315	9.78
West Midlands South	15	75	150	358	5.00
Totals	322	1,408			

The top ten most popular FPP posts were located in Essex, Bedfordshire and Hertfordshire (EBH), London and Northern Foundation Schools. From the initial evaluation work, even with incentives, geography still appears to remain the major influencing factor when ranking programmes, even within foundation schools.

FPP Offers

At the time of offers, there were 319 posts available. The cut-off score for the primary list was 71.51. Applicants with a score of 71.51 or above were therefore considered in the offers matching process for FPP. Of the 1,408 applicants who applied for FPP, 490 scored highly enough to be included in the process, with 319 applicants receiving offers. A total of 171 primary list applicants did not receive an offer.

The table below provides information about the number of FPP offers made, accepted, declined and the fill rates by foundation school. A total of 212 (66.46%) FPP places remained unfilled at the end of the process.

Table 3.3: FPP Offers by Foundation School

FPP Preference Information

Out of the 319 applicants who received an offer, 102 received an offer for the programme they had ranked highest, i.e. their first preference. A total of 271 applicants received offers for one of their top ten posts, with 234 (73.35%) of those who received offers being offered a place in one of their top five programme choices.

The table below provides information about the top ten preferences ranked by foundation school for applicants who received offers.

Table 3.6: FPP Preferences by Foundation School

Foundation Programme (FP)

FP Places

The national FP vacancy was published on Oriel with information about FP places. Some foundation schools provided details of programmes that are typically available based on previous years. Applicants were advised that programme numbers might be indicative and subject to change prior to the national allocation. At this time, a total of 6,692 FP places were advertised. This is in addition to AFP (558), PFF (40) and FPP (319) posts. Please refer to appendices 1 and 2 for information on programme numbers.

Nominations and Eligibility

UK Nominations

At the time of the close of the application window, a total of 7,594 students / graduates had been nominated by UK medical schools, 7,394 (97.37%) of whom submitted an FP application.

The overall percentage of UK medical students applying to the UK Foundation Programme decreased from 94.8% for 2015, 94.1% for 2016 to 92.58% for 2017. However, the percentage of UK nominees who submitted applications has increased in 2018 to 97.26% and 97.54% in 2019. The percentage of nominees who applied decreased slightly for 2020, with 97.37% of students choosing to submit an application for FP.

Eligibility

The UKFPO's Eligibility Office received a total of 909 complete applications for 2020. A total of 635 applicants were considered eligible or eligible with conditions: 248 and 387 respectively. These applicants were invited to submit an FP application in October 2019. A total of 568 (89.45%) applicants later applied to the two-year programme. Of the total number of Eligibility Office applicants who applied to FP, 164 (30%) were students of non-EEA medical schools, 254 (45%) were students of EEA medical schools and 150 (25%) were UK medical schools graduates who qualified before 5th August 2018.

Applications to FP

A total of 8,243 applicants were nominated or deemed eligible to apply for the 2018 UK Foundation Programme. This number comprised of 7,608 nominations by UK medical schools and a further 635 applicants who applied through the UKFPO's Eligibility Office.

A total of 7,962 applications were submitted to the national FP vacancy; 7,394 from UK nominees and 568 from applicants who applied through the eligibility process. There were 10 FP applications in progress following the close of the application window, i.e. the applicants had started their applications but not submitted by the deadline.

The table shows the percentage of nominated applicants who applied to FP from 2016-2020.

Table 4.1: Applicant profile comparison 2016, 2017, 2018, 2019 and 2020

	2016	2017	2018	2019	2020
Nominated applicants*	7,909	7,889	8,122	8,412	8,243
Applications submitted	7,858	7,742	7,873	8,137	7,962
Percentage who submitted applications	99%	98%	97%	96%	97%

*Please refer to appendix 3 for the number of applicants nominated by UK medical school.

Additional Educational Achievements

The Educational Performance Measure (EPM) is a measure of clinical and non-clinical skills, knowledge, and performance up to the point of application to the Foundation Programme. All applicants to the Foundation Programme, including the Academic Foundation Programme, will be awarded an EPM score. The EPM score constitutes the decile score and up to a maximum of 7 points for additional achievements. Applicants can earn up to 5 points for additional degrees awarded by the time of application (prior to medical school or an intercalated degree). Applicants can earn a maximum of 2 points for educational research papers published in a peer-reviewed journal with a PubMed ID number (1 point per paper).

The table below provides a comparison of the number and percentage of applications requiring verification and those submitted without additional evidence for consideration 2017, 2018, 2019 and 2020.

Table 4.2: Comparison of Number and Percentage of Applications Requiring Verification

	2017	2018	2019	2020
Number of applications requiring verification	5,247	5,494	5,627	5,671
Percentage of applications requiring verification	68%	70%	69%	71%
Number of applications not requiring verification	2,495	2,365	2,489	2,291
Percentage of applications not requiring verification	32%	30%	31%	29%

The table below shows the types of additional educational achievements submitted in 2020.

Table 4.3: Additional Educational Achievements

Number of applicants who submitted evidence of an additional degree	4,297
Number of applicants who submitted evidence of one publication	107
Number of applicants who submitted evidence of two publications	36
Number of applicants who submitted evidence of an additional degree and one publication	742
Number of applicants who submitted evidence of an additional degree and two publications	490

Independent verifying panels considered the evidence submitted. A total of 254 system scores were amended as part of the verification process, 120 of which were amended to 0.

Person Specification Criteria

A total of 7,914 applicants sat the SJT as part of the 2020 allocation process. For a summary of SJT scores by medical school, please see the table below on page 24.

The table below shows the distribution of applicants at each of the SJT sittings.

Table 4.4: Applicant Attendance at SJT Sitings

SJT Sitting	Applicants in Attendance	Extenuating Circumstances	Non-Attendance	Totals
Friday 6 th December 2019	5,972	43	13	6,028
Monday 10 th January 2020	1,936	6	47	1,989
Monday 13 th January 2020 (contingency date)	6	0	0	6
Totals	7,914*	49	60	8,023

*The total number of applicants who sat the SJT includes military applicants for the defence deanery.

A total of 60 applicants failed to attend the SJT and were subsequently withdrawn from the application process: 25 applicants from UK medical schools and 35 from medical schools outside of the UK.

Situational Judgement Test (SJT) Scores by Medical School

The table below provides details of SJT scores by medical school. The scores included in the table are for all applicants who sat the SJT. The data also includes scores for applicants who accepted offers for Academic Foundation Programmes (AFP) and the defence deanery.

Table 4.5: SJT Scores by Medical School/ Medical Schools Category

Medical School	UKFP 2020 SJT Scores			
	Ave	SD	Max	Min
Brighton and Sussex Medical School	39.689	3.700	46.821	29.378

University of Swansea	40.712	3.159	46.391	32.889

*New medical school which has seen its first graduating cohort in 2020.

Exceptionally Low Scoring SJT Reviews

In accordance with the process for managing exceptionally low SJT scores, a total of 41 applicants were identified as having an SJT score of 3.5 or more standard deviations below the mean: 13 from UK medical schools and 28 from medical schools outside of the UK. For UK students, the medical schools were informed prior to the applicants being notified of their exceptionally low SJT score.

Applicants were invited to attend a face-to-face review of their SJT outcome on Thursday 27th February 2020 in Birmingham. There was also the option for applicants to attend the review via Skype. A total of 32 applicants accepted to attend a review of their score. A total of 22 applicants opted to attend the review via Skype. On the day, 1 applicant failed to attend their interview. A total of 19 (61%) out of the 31 applicants who attended the reviews were Eligibility Office applicants. A total of 2 UK graduates chose not to attend the reviews.

The criteria for the reviews was amended in 2019 and this criteria for the reviews was applied again in 2020. Applicants were required to demonstrate a level of competence and understanding in their responses for them not to be considered a risk in terms of patient safety, rather than needing to demonstrate exceptional performance at the review, as was the case in previous years.

Of the 31 applicants who attended the reviews, 15 (%) were successful at the review and were included in the allocation process to FP with their original SJT score. This amounts to 37% of the total number of applicants (41) who were initially considered as having an exceptionally low SJT score this year.

Preferences

Applicants had the option to amend the order in which they ranked programme preferences, i.e. each of the 20 foundation schools, on Oriel until Thursday 13th February 2020. Applicants could change their rankings as many times as they wished until this deadline had been reached.

For applicants who had linked their applications at the start of the process, opting to amend the order in which they ranked foundation schools will have broken the link, even if both applicants chose to amend their preferences in exactly the same way. This is the only way to break a link between applications.

The table below shows the number of indicative programmes available at each foundation school, the number of applicants who ranked each foundation school first and the competition ratio for each foundation school at the close of the application window.

Table 4.6: FP Preference Information by Foundation School

Foundation School	Number of FP Programmes Available	First Choice Preferences	Competition Ratio
East Anglia	233	191	0.82
Essex, Bedfordshire and Hertfordshire (EBH)	255	177	0.69
Leicestershire, Northamptonshire and Rutland (LNR)	146	109	0.75

University of Lancaster	40	17	42.50%
University of Leeds	199	87	43.72%
University of Leicester	164	40	24.39%
University of Liverpool	227	124	54.63%
University of Manchester	417	232	55.64%
University of Nottingham	303	76	25.08%
University of Oxford	138	26	18.84%
University of Southampton	186	53	28.49%
University of Swansea	69	36	52.17%
Totals	6,681	2,662	39.84%

Of the UK graduates who applied through eligibility, 37 out of 130 (28.46%) ranked the foundation school linked to their graduating medical school as their first preference. There were 93 UK medical school graduates who chose not to rank their home UoA as their first-choice allocation.

Primary List Allocations

In addition to the 547 AFP, 34 PFF and 107 FPP posts that were filled, there were 6,855 standard FP places available at the time of the national allocation in March 2020. The highest scoring applicants were placed on the primary allocation list. At the time of the primary list allocation, 100% of places were filled.

A total of 7,113 applicants remained in the application process at the time of the primary list allocation: 6,681 UK nominees and 432 Eligibility Office applicants. A total of 6,855 (96%) applicants were allocated to the primary list, 94% of whom were allocated to one of their top five foundation schools. In line with previous years, 75% of applicants allocated to the primary list were allocated to their first preference, with 83% of applicants being placed at one of their top two foundation schools. Less than 6% of primary list applicants were allocated to a preference choice lower than five.

Of the 6,855 applicants allocated to the primary list, 6,517 (95%) were nominated by UK medical schools and 338 (5%) applied through the eligibility process. At the time of the primary allocation run, the 2020 UK Foundation Programme was oversubscribed by 258 applicants, who were placed on the reserve list. The cut off score for allocation to the primary list was 68.865.

The table below provides a summary of the total number of eligible applicants who were included in the allocation run, allocated to the primary list and who were placed on the reserve list.

Table 4.12: National Allocation Results

Applicants	Number of Applicants Included in the Process	Number Allocated to the Primary List	Percentage Allocated to the Primary List	Number Placed on the Reserve List	Percentage Placed on the Reserve List
UK Nominees	6,681	6,517	97%	164	2%
Eligibility Office	432	338	78%	94	22%
Totals	7,113	6,855	96%	260	4%

Linked Applications

A total of 428 applicants allocated to the primary list were linked: 214 linked pairs. A total of 27 linked pairs were broken as part of the allocation process.

Special Circumstances

A total of 122 out of 124 applicants were pre-allocated to a particular foundation school on the grounds of special circumstances as part of the primary list allocation. Of those applicants remaining in progress at the time of national allocation, 1.74% were pre-allocated as part of the primary list. A total of 4 out of 5 Eligibility Office applicants were pre-allocated to a particular foundation school on the grounds of special circumstances as part of the primary list allocation.

The following table shows the number of applicants who were pre-allocated as part of the primary list allocation under each criterion.

Table 4.13: Special Circumstances Granted by Criterion

Criterion	Description	Number Approved	Percentage Approved
1	Parent / legal guardian of child under 18	60	89.55%
2	Primary carer for disabled person	10	58.82%
3	Medical condition requiring local treatment	46	68.66%
4	Unique Circumstances	8	18.60%
Total		124	1.74%

Reserve List

At the time of the national allocation, 258 applicants were placed on the reserve list: 164 (64%) were UK nominees and 94 (36%) were Eligibility Office applicants. Due to changes to the immigration law, all applicants were allocated based on their total application score only, regardless of their right to work status in the UK. This meant that a higher proportion of UK nominees were placed on the reserve list this year compared to previous years.

Table 4.14: Reserve List Applicants by Home UoA

Unit of Application	Number of Home Students Placed on the Reserve List	Percentage of Total Applicants Placed on Reserve List
East Anglia	6	2%
EBH*	N/A	N/A
LNR	1	0%

Total / Overall	258	

*There is no local medical school linked to EBH Foundation School.

The UKFPO endeavoured to allocate all reserve list applicants as soon as notifications of vacant posts were received due to primary list applicant withdrawals and failed medical school finals.

For UKFP 2020, it was acknowledged at the time of primary list match to programme allocations that it might not have been possible to allocate all applicants on the reserve list due to oversubscription. However, additional programmes were created to ensure all eligible applicants were allocated to a foundation training place by Thursday 27th June 2020.

There were three reserve list batch allocations: Thursday 22nd April, Thursday 4th June 2020 and Thursday 27th June 2020.

Reserve List Applicants by Medical School

A total of 164 applicants from UK medical schools and 94 applicants who applied through eligibility were placed on the reserve list. Of the 94 Eligibility Office applicants who were placed on the reserve list, 41 graduated from UK medical schools.

The table below shows the number of FP applicants and the number and percentage of FP applicants placed on the reserve list placed on the reserve by UK medical school.

Table: 4.15: Reserve List Applicants by UK Medical School

Medical School	Number of FP Applicants	Number Placed on the Reserve List	Percentage Placed on the Reserve List
Brighton and Sussex Medical School	112	2	1.79%
Cardiff University	289	10	3.46%

University of Oxford	138	0	0.00%
University of Southampton	186	6	3.23%
University of Swansea	69	0	0.00%
Totals	6,681	164	2.45%

As in previous years, foundation schools were notified of applicants from their linked UK medical schools who were expected to be placed on the reserve list by the UKFPO the day before allocations were released. Mechanisms were put in place for pastoral support for UK students / graduates in this situation.

All reserve list applicants were informed of their rank within their cohort.

UKFP 2020 Allocation Results by Foundation School

The table below provides the number and percentage of applicants included in the national allocation run who selected each foundation school as their first preference, the number of applicants allocated to places who did not rank the school as their first preference (i.e. non-first preference spaces), the number of percentage of applicants who were pre-allocated based on special circumstances, to their first preference, and to one of their top five preferences, and the lowest scores for allocated applicants by foundation school. The lowest scores have been provided with the inclusion of applicants pre-allocated based on special circumstances and without. This table includes FP applicants not withdrawn at the time of the national allocation. Applicants who accepted an AFP offer earlier in the process are not included.

Table 4.16: FP Allocation Results by Foundation School

Unit of Application	Places	1st pref apps	% 1st pref apps	Non-1st pref spaces	No. allocated via spec circs	% allocated via spec circs	No. allocated to 1 st pref	No. allocated to top 5 prefs	% allocated to 1st pref	% allocated to top 5 prefs	Lowest placed pref	Lowest allocated score (excl. s/c)	Lowest s/c allocated score

Match to Programme Results

Applicants who had been allocated to foundation schools who employ a two-stage matching process received notifications of their match to group results on Monday 23rd March 2020. A total of 3,462 were matched to individual groups at this time. This applied to applicants who had been placed at Leicestershire, Northamptonshire and Rutland (LNR), North West of England, Scotland, South Thames, Trent, Yorkshire and Humber Foundation Schools.

A total of 6,763 applicants were matched to programmes on Thursday 9th April 2020.

A total of 92 applicants had withdrawn their applications subsequent to the released of primary list allocation results and prior to the point at which local matching process were carried out.

The table below shows the number of places available, the number of applicants matched to individual programmes and the fill rate by foundation school.

Table 4.21: Match to Programme Results by Foundation School

Unit of Application (UoA)	Number of FP Places Available	Number of Applicants Matched to Programmes	Fill Rate
East Anglia	254	249	98.03%
Essex, Bedfordshire & Hertfordshire (EBH)	279	273	97.85%

Medical School Category	Applicants Matched to Programme
UK Medical School	5,537
UK Medical School – Qualified Prior to 5 th August 2018	119
EEA Medical School	474
Non-EEA Medical School	633
Total	6,763

Reserve List Batch Allocations

There were 6,855 programmes available and 7,113 applicants remaining in the process at the time of the national allocation run. This created a reserve list of 258 applicants.

The UKFPO endeavoured to place all reserve list applicants at the earliest opportunity. All applicants remaining on the reserve list were allocated to a foundation training place by Thursday 27th June 2020.

There were three reserve list batch allocations, which took place on the following dates: -

First Reserve List Batch Allocation: Thursday 22nd April 2020

Second Reserve List Batch Allocation: Thursday 4th June 2020

Third Reserve List Batch Allocation: Thursday 27th June 2020

The table below provides a summary of reserve list allocations made as part of each batch allocation by foundation school.

Table 4.23: Reserve List Batch Allocations by Foundation School

Foundation School	Number of Applicants Allocated – First Reserve List Batch Allocation	Number of Applicants Allocated – Second Reserve List Batch Allocation	Number of Applicants Allocated – Third Reserve List Batch Allocation
East Anglia	9	5	2
Essex, Bedfordshire and Hertfordshire (EBH)	3	0	6

Totals	75	68	117

Oversubscription

At the time of the second reserve list allocation, there were over 100 applicants remaining on the reserve list, approximately 50% of whom had qualified from UK medical schools. The decision was therefore taken to overbook foundation schools to ensure all eligible applicants were allocated to a training place and also to support places where applicants were expected to defer their start dates due to various reasons in light of COVID-19. As notifications of withdrawals, largely due to failed finals, have subsequently been received later in the process in July, foundation schools confirmed individual group and programme allocations for reserve list applicants.

First Reserve List Batch Allocation

At the time of the first batch allocation there were 75 places and 254 applicants on the reserve list. This included 7 inter-foundation school transfer (IFST) applicants and 2 applicants who had initially been placed in error. A total of 75 applicants were allocated across the UK: 58 UK nominees and 17 eligibility applicants. A total of 188 applicants remained on the reserve list: 112 UK nominees and 76 eligibility applicants.

The table below shows a summary of applicants remaining on the reserve list after the first batch allocation.

Table 4.24: Applicants on Reserve List after First Batch Allocation by Medical School

Nation	Foundation School	Qualifying Medical School	Reserve List
England	East Anglia	Cambridge (University of), School of Clinical Medicine	1

Second Reserve List Batch Allocation

At the time of the second reserve list batch allocation, there were 184 applicants remained on the reserve list, 108 of whom had been nominated by UK medical schools. The second reserve list batch allocation was released on Thursday 4th June 2020. A further 68 applicants were allocated to training places as part of this batch, leaving over 100 applicants on the reserve list, just eight weeks prior to the start of the programme.

The table below shows a summary of applicants remaining on the reserve list after the second batch allocation.

Table 4.25: Applicants on Reserve List after Second Batch Allocation by Medical School

Nation	Foundation School	Qualifying Medical School	Reserve List
England	East Anglia	Norwich Medical School, University of East Anglia	3

Total		119*	

*Includes IFSTs that now needed to be reallocated when appropriate places become available.

Third Reserve List Batch Allocation

All applicants remaining in the process were allocated to training places on Thursday 27th June 2020.

Each nation supported the proposal to overbook reserve list applicants and allocate additional funding where necessary. Additional places were identified across the four nations based on the number of home students remaining on the reserve list and with a proportionate distribution of the number of eligibility applicants who were still awaiting allocations. Where possible, foundation schools allocated additional reserve list applicants to established posts where deferrals were expected due to COVID-19 and/or where late notifications of withdrawals were received.

F1 Recruitment

Due to the unprecedented circumstances that arose due to COVID-19, qualified medical students were invited to work in interim F1 posts across the UK to support the frontline.

A separate recruitment process was implemented for provisionally registered doctors working in Foundation Interim Year 1 (FiY1) posts, who had not been allocated as part of the national application process, and who wanted to commence F1 from August 2020 (the offering was for Locum Appointment for Training (LAT) posts in England, Northern Ireland and Wales, and two-year programmes in Scotland).

This is the recruitment mechanism put in place to facilitate entry to training for those who has supported the frontline and whose circumstances may have changed in light of the pandemic.

In total, 25 applications were submitted, with 7 applicants being considered eligible and invited to interview. Applications were deemed ineligible where applicants had qualified from overseas medical schools, had not undertaken FiY1 posts, and the UKFPO were not able to verify their eligibility. The UKFPO only considered applications from UK graduates and those who had been deemed eligible by the Eligibility Office as part of the application process for UKFP 2020, who had withdrawn prior to the pandemic.

All 7 applicants were invited to attend a remote interview via Microsoft Teams on Monday 22nd June 2020. The interview panel consisted of two clinicians working in foundation who asked a series of questions about the applicants' journey and a clinical scenario question, which was based on patient safety. All of the applicants were deemed appointable at interview.

In their applications, the applicants submitted preference information to indicate which foundation schools they would most like to be allocated to. It was made clear that appointable applicants would only be allocated to vacant training places once all reserve list applicants for UKFP 2020 had been placed. All offers were subject to there being places available at the end of the process.

The 7 seven applicants allocated to F1 posts through this alternate selection process had all qualified from UK medical schools: University of Aberdeen, The University of Edinburgh, University of Glasgow, King's College London (KCL), University of Liverpool, St. George's University, London (SGUL), University College of London (UCL).

The table below provides the allocation results for F1 trainees recruited to by interview by foundation school.

Table 4.26: Additional F1 Allocations by Foundation School

Foundation School	Number of Applicants Allocated by Interview
North West of England	1
Peninsula	1
Scotland	3
Wales	1
South Thames	1

Final Position in August 2020

At the start of the programme in August 2020, foundation trainees commenced in over 99% of foundation training places across the UK.

The table below provides the numbers of places available at the time of the primary list allocation, the number of places available by the time of the final reserve list batch allocation, i.e. following the creation of additional posts to support oversubscription and the management of deferrals due to COVID-19, places filled, unfilled places and the overall fill rate by foundation school.

Table 4.27: Position and Fill Rates at the Start of the Training Year in August 2020

Foundation School	Places in March 2020	Final Post Number	Places Filled	Unfilled Places	Fill Rate
East Anglia	257	249	249	0	100.00%

Totals	6,855	6,928	6,889	39	99.44%

Eligibility

Eligibility Applications

Overseas graduates and applicants who graduated from UK medical schools more than two years prior to the start of the programmes were invited to apply through the eligibility application process during the summer from Monday 24th June – Wednesday 7th August 2019.

A total of 909 applications were submitted through the online application system. At the close of the application window, 28 applications had been withdrawn. A total of 909 applications were considered for eligibility. At the end of this process, 635 applicants were deemed eligible to apply for FP; 248 applicants were fully eligible at this time and a further 387 applicants were deemed eligible subject to various conditions, such as passing the clinical assessment and PLAB, for example.

The table below provides the profile of eligibility office applicants by medical school category.

Table 5.1: Eligibility Office Applicant Profile by Medical School Category

Medical School Category	Number of Applicants	Percentage of Total Eligibility Applicants
EEA Med School	398	43.78%
Non-EEA/UK Med School	336	36.96%
UK Med School	175	19.25%
Total	909	

**This figure includes applicants who graduated from Newcastle University Medicine Malaysia (NUMED) and University of Nicosia, Cyprus; 91 and 53 respectively, both of which are UK campuses as qualifying students are awarded a Primary Medical Qualification (PMQ).*

In the autumn of 2018, 568 (89.45%) Eligibility Office applicants submitted an application to the national FP vacancy, a further 168 (26.46%) of whom also applied to AFP through local AUoA vacancies.

Applicant Profile: Qualification More Than Five Years Prior to the Start of the Programme

The table below shows the number of applicants who qualified more than five years prior to the start of the 2020 Foundation Programme.

Table 5.2: Applicants Who Graduated More Than Five Years Prior to the Start of the Programme

Number of Years Qualified Prior to August 2019	Eligibility Status	Number of Applicants
5 – 10 Years	Ineligible	22

Subtotal		10
Total		87

Foundation schools were advised of applicants who qualified more than five years prior to August 2020.

Clinical Assessment

Applicants who graduated more than two years prior to the start of the FP / AFP 2020 were required to undertake the clinical assessment. The standard format includes a 16-station clinical OSCE examination. The stations are carefully mapped to assess performance against the UKFPO curriculum.

The clinical assessment was delivered by the Manchester University Foundation NHS Trust, formerly University Hospital of South Manchester at a cost of £850 per assessment. Each applicant paid the fee directly to the clinical assessment provider.

There were 160 applicants who were required to undertake the clinical assessment for 2020. This compares to 180 applicants in 2019 and 165 applicants in 2018. Of the 160 applicants required to pass the clinical assessment, 121 (76%) paid for the assessment, 116 (73%) of whom actually sat the assessment in Manchester. There were 39 applicants who were withdrawn prior to the assessment for lack of payment. Of the 116 applicants who sat the clinical assessment, 91 (78%) passed, 25 (22%) applicants failed the assessment. A total of 5 applicants did not attend the assessment, none of whom had already requested for their FP application to be withdrawn.

The table below shows the profile of applicants required to undertake the clinical assessment.

Table 5.3: Clinical Assessment Applicant Profile by Medical School Category

Medical School Category	Number of Applicants Required to Pass Clinical Assessment	Number of Applicants Who Sat the Clinical Assessment
EEA Med School	30	25
Non-EEA/UK Med School	49	31
UK Med School	81	60
Totals	160	116

Applications to FP and AFP

The table below shows the number of Eligibility Office applicants who applied to FP, the number of AFP applications submitted on behalf of Eligibility Office applicants (individual applicants could submit a maximum of two AFP applications), the number of Eligibility Office applicants who applied to AFP and the percentage of Eligibility Office applicants who had applied for FP who also applied to AFP by medical school category, i.e. graduates from medical schools overseas and UK medical school graduates who qualified more than two years prior to the start of the programme.

Table 5.4: Eligibility Office Applicant Profile FP to AFP

Medical School Category	Total Number of Applicants to FP	Number of AFP Applications Submitted	Number of Applicants to AFP	Percentage of Eligibility Office Applicants Who Applied to AFP
Overseas Graduates	415	131	84	20.24%
UK Med School	153	37	23	15.03%
Totals	568	168	107	18.84%

There were 168 AFP applications submitted on behalf of 568 Eligibility Office applicants, 57 (35.85%) of whom applied to two AUoA vacancies on Oriel.

The number of eligibility applicants applying for AFP increased by 12% compared to the previous year for UKFP 2019.

The following table shows the distribution of AFP applications from Eligibility Office applicants by AUoA.

Table 5.5: Distribution of AFP Applications from Eligibility Office Applicants

Academic Unit of Application	Number of Applicants

West Midlands South	7	1.62%
Yorkshire and Humber	16	3.70%
Total	432	

The information in this table takes account of withdrawals from the close of the preferencing window on Thursday 13th February 2020 to the time of national allocation in March 2020, i.e. applicants who withdrew during this timeframe are have not been included in these figures. Applicants who accepted AFP offers have also been excluded from the data.

Applications to PFF and FPP

A total of 40 (7.04%) eligibility applicants also applied for Psychiatry Fellowship Programmes (PFF) and 140 (24.69%) choose to apply for Foundation Priority Programmes (FPP).

Person Specification Criteria

A total of 383 Eligibility Office applicants sat the SJT; 218 in December 2019, 159 in January 2020 and 6 applicants attended the sitting on the contingency date.

Of the 41 applicants identified as not having met the minimum requirements of the SJT, 28(68.29%) had applied through the Eligibility Office, 13 of whom attended a face-to-face review of their outcome. A total of 6 applicants who applied through eligibility were successful at the reviews and included in the allocation.

Special Circumstances

At the time of national allocation, there were 5 eligibility applicants remaining in the process who had been approved for pre-allocation on the grounds of special circumstances, 4 of whom were pre-allocated to the primary list and 1 who was placed on the reserve list.

The table below shows the number of applications approved for pre-allocation on behalf of Eligibility Office applicants by each of the four criteria.

Table 5.7: Special Circumstances Granted by Criterion for Eligibility Office Applicants

Criterion	Description	Number of Applicants Approved for Pre-Allocation
1	Parent / legal guardian of child under 18	5
2	Primary carer for disabled person	0
3	Medical condition requiring local treatment	0
4	Unique circumstances	0

AFP Offers Accepted for Eligibility Office Applicants

The following table shows the number and percentage of AFP offers made and accepted by Eligibility Office applicants by medical school category.

Table 5.8: Eligibility Office Applicant Profile for AFP Offers Accepted

Medical School	Number Applied for AFP	Number Offered AFP**	% Offered AFP	Number Accepted Offer	% Accepted Offers
Overseas Graduates	95	4	4.21%	3	75.00%
UK Med School*	1,652	335	20.27%	329	98.20
Totals	1,747	339	19.40%	333	98.23%

PFF and FPP Offers for Eligibility Office Applicants

Of the 256 applicants who applied for PFF, 39 (15%) were eligibility office applicants, none of whom were offered a post. There were 158 (11%) out of 1,408 of the applicants who applied for FPP had previously applied through the eligibility route, 9 of whom receive an offer for a priority programme.

Eligibility Office Allocation Results

A total of 355 (61%) of applicants who applied through eligibility were allocated to foundation schools as part of the primary list.

Of those that were allocated to the primary list who applied through eligibility, 256 (3.67%) applicants were from EEA medical schools, 72 (1.03%) applicants were from non-UK/EEA medical schools, and 25 (0.36%) were UK graduates, 17 of whom qualified from UK institutions more than two years prior to the start of the programme. There were 8 applicants who were allocated who qualified from overseas campuses linked to UK medical schools: 1 from Newcastle University Medicine Malaysia (NUMED) and 7 from University of Nicosia (St. George's University of London).

The table below shows the number allocation results for applicants who applied through eligibility by foundation school.

Table 5.9: Eligibility Office allocations by Foundation School

Unit of Application (UoA)	Number of FP Places	Eligibility Office Applicants Allocated	Percentage Eligibility Applicants Allocated	Percentage Fill with Eligibility Applicants

Eligibility Office Reserve List Allocations

A total of 432 eligibility applicants remained in the process at the time of national allocation, 94 of whom were placed on the reserve list. All reserve list applicants were allocated by Thursday 27th June 2020.

The table below shows how many eligibility applicants were allocated in each reserve batch.

Table 5.10: Eligibility Applicant Reserve List Allocations

Reserve List Batch Allocation	Number of Eligibility Applicants Allocated
Thursday 22 nd April	17
Thursday 4 th June 2020	25
Thursday 27 th June 2020	51
Total	93

Foundation Interim Year 1 (FiY1) Allocations

The Foundation Interim Year 1 (FiY1) initiative was launched to help provide additional support to the workforce in response to the COVID-19 pandemic. It allowed final year medical students to volunteer to work as foundation doctors ahead of the usual UK Foundation Programme (UKFP) start date in August.

The initiative was a huge success with 5,607 graduates volunteering across the UK. Feedback to date has indicated the interim F1 doctors provided helpful additional resource and gained valuable experience.

The table below provides the number of students who were due to qualify from UK medical schools this year, the number of eligible FiY1 applications received, including Eligibility Office applicants who applied for UKFP 2020, and the number of FiY1 allocations to foundation schools across the UK.

Table: 6.1: UK Graduates, Eligible FiY1 Applications and FiY1 Allocations

Number of students due to qualify from UK medical schools	7,588
Number of eligible FiY1 applications received	5,607
Number of FiY1 trainees allocated to foundation schools in the UK	5,475

Please note that due to the resource implications of the data collection, it is not possible to provide precise figures at the time of writing this report on the number of FiY1 trainees assigned by foundation schools to individual employing organisations in the UK. Exact figures can be provided in due course if required. It is acknowledged that not all trainees will have commenced their FiY1 due to the various implications of the COVID-19 pandemic, for example, if they were unfortunately taken ill, were required to shield, were unable to travel, etc.

In addition to the FiY1 arrangements, medical students from all years could also volunteer to undertake other supportive roles in the NHS.

APPENDIX 1

Indicative Programme Numbers

The table below shows the indicative AFP post and FP programme numbers that were advertised in August and September 2019, respectively.

Foundation School/ Unit of Application (UoA)	FP Places	AFP Places	FPP Posts	PFF Posts	Total Programmes
East of England – Cambridge	233	24	83	5	634
East of England – Norfolk		12
