Received and published: 9 February 2018

1) "the authors could think of shortening the results section at some points, because the results are somehow quite obvious from the beginning of the results section on."

We welcome this suggestion to shorten the result section, and will do so with an aim for improving its flow in the revised manuscript.

2) L. 15: Rephrase and remove "by the user": e.g. "Factor 2 multiples . . . are chosen in this study as specific set of resolutions."

C1

We agree with the reviewer, and will modify the revised manuscript accordingly.
