Dear Anonymous Referee #1,

Re: Manuscript #HESS-2019-301 entitled “Dynamics of hydrological model parameters: calibration and reliability”.

Many thanks for your positive evaluation, encouragement for the results and scientific significance in this study. We greatly appreciate the Referee’s comments, especially in the focus of the first goal and textural improvements. All suggestions are helpful to improve this manuscript.

We have carefully studied, considered and responded to all comments point-by-point as follows. For clarity, all comments are given in black and responses are given in
