

Global Energy Review 2020

Acknowledgements

This study, a cross-agency effort, was prepared by the Energy Modelling Office in the Directorate of Sustainability, Technology and Outlooks in co-operation with the directorate of Energy Markets and Security and the Energy Data Centre. The study was designed and directed by Laura Cozzi, Chief Energy Modeller.

The lead authors and coordinators of this report were: Zakia Adam (data management), Heymi Bahar (renewables), Christophe Barret (oil), Jean-Baptiste Dubreuil (gas), Musa Erdogan (data management), Carlos Fernández Alvarez (coal), Timothy Goodson (energy and CO2 trends), Stefan Lorenczik (electricity), Claudia Pavarini (electricity and visualization), Laszlo Varro (macroeconomic context and implications), and Brent Wanner (electricity, renewables and nuclear).

The report also benefited from analysis, data and input from Yasmine Aarsalane (macroeconomic analysis), Paulina Becerra Zavala (electricity), Amrita Dasgupta (macroeconomic analysis), Mathilde Daugy (electricity), Chiara Delmastro (weather correction), Connor Donovan (electricity), Astha Gupta (India), Julia Guyon (China), Pharoah Le Feuvre (biofuels), Francesco Mattion (historical data), Gergely Molnar (gas), Sebastian Papapanagiotou (electricity), Daniele Perugia (electricity), Apostolos Petropoulos (transport), Julian Prime (electricity), Roberta Quadrelli (historical data), Alan Searl (China), Siddharth Singh (India) and Dan Wetzel (China).

Valuable comments, feedback and guidance were provided by other senior management and numerous other colleagues within the IEA, in particular, Laszlo Varro, Peter Fraser and Tim Gould.

Thanks go to the IEA Communication and Digitalisation Office for their help in producing the report and website materials, particularly to Jad Mouawad, Jethro Mullen, Astrid Dumond, Jon Custer, Christopher Gully, Katie Lazaro, Julie Puech, Rob Stone and Therese Walsh.

Andrew Johnston carried editorial responsibility.
