

DENTAL RADIOGRAPHY TEN YEARS AGO AND NOW: OVERVIEW OF RESULTS OF POSTAL TLD AUDIT

Vtelenská M., Novák L.

State Institute of radiation Protection, Prague

Since 2002, regular postal audit in dental radiography organized by NRPI Prague belongs to basic radiography QA/QC tools in the Czech Republic. The measured parameters are incident air kerma, field size, and exposure reproducibility. The overall quality of the dental radiograph is also assessed. Ten-year summary of the audit results is presented here.
